Question #1: Does DNRC/the State have any suggestions/modifications for the team inspections? This is another place where there would potentially be exposure/contact with others.

Answer: If FWP requests an inspection, any team member can waive participation. The board can make a permit decision without attending an inspection. If FWP does not request an inspection, no inspection need to occur and the board can make a permit decision without one and still stay within the statutory requirements.

Note: *If FWP is the only entity present at the inspection, they will fill out the inspection form. The other team members can select a representative to sign the form and indicate whether the 15-day waiting period should be waived. A little messy, but doable.*
