

**STATE OF MONTANA
NATURAL STREAMBED AND LAND
PRESERVATION ACT (310 LAW)**

Application No. _____
Date Submitted to District _____

TEAM MEMBER REPORT

1. Applicant _____
Name of perennial stream _____ County _____
Location of proposed activity _____, _____, _____, Section _____ Township _____ Range _____

2. Onsite inspection at _____ on _____ at _____.
(location) (date) (time)

3. Review considerations:

Comment

- effects of soil erosion and sedimentation _____

- risk of flooding or erosion problems upstream or down _____

- effects of stream channel alterations _____

- effects on streamflow, turbidity, or water quality caused
by materials used or by removal of ground cover _____

- effects on fish and aquatic habitat _____

Are there reasonable alternatives to reduce disturbance to stream or better accomplish the purpose of the project? yes (see comments) no

4. Recommendation:

- Approval as proposed
- Approval with modifications
- Denial
- Request for time extension

5. Modifications/Comments:

- See attached (if more room is necessary)

6. Signature of Team Member(s)

318 AUTHORIZATION REVIEW

I have reviewed the above project on behalf of the Montana Department of Environmental Quality (DEQ) pursuant to the Montana Water Quality Short-term Water Quality Standards for Turbidity 75-5-318 MCA:

- O This project **will not** increase turbidity if completed according to the conditions listed in the 310 or 124 permit. Therefore, application to DEQ for a 318 authorization **is not** required.
- O Impacts to the physical and biological environment from turbidity generated as a result of this project are uncertain. Therefore, the applicant must contact the Montana Department of Environmental Quality, 1520 East Sixth Avenue, Box 200901, Helena, MT 59620-0901, (406 444-3080) to determine project specific narrative conditions required to meet short-term water quality standards and protect aquatic biota.
- O Turbidity generated from this project is expected to be short-term and have only temporary and minor impacts on the physical and biological environment. Therefore, compliance with the conditions stated in *DEQ's Short Term Water Quality Standard for Turbidity Related to Construction Activity*, as well as other conditions listed in the 310 or 124 permit, are appropriate for this project.
