

### Arborview Elementary Tree Plan May, 2014

Summary: Arborview’s school grounds total 10 acres, of which space/playground is around 4 acres. We have a total of 9 trees. Some are scattered around the playground with a few located near the building entrances. There are also 2 young trees in the boulevard strip planted by the city.

Sketch: Colored-in area represents grass/irrigated spots.

Goals: We want to increase the amount of trees, provide more shade for our school and playground, and improve the overall look of the grounds. Eventually we would like to create a nature area, and make more privacy along Oak Street and Elm Avenue by planting trees along the side.

Timeframe:

- September – December: Create or update school plan, inventory trees, examine curriculum
- January – March: Enjoy lessons or activities towards ReLeaf program, plan Arbor Day activities
- April – May: Hold Arbor Day Celebration!
