

# National Bison Range Water Compact (85-20-1601, MCA)

-  National Bison Range
-  Highway
-  Active USGS Gages
-  NHD Streams

## Consumptive Water Right

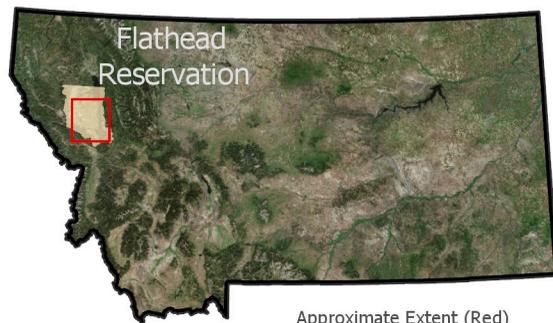

Use of up to 755 animal units (one male bison = 1.5 AU, one female = 0.9 AU.), flow from springs and seeps for the production of Bison forage, administrative uses, including domestic, lawn & garden, storage and dust abatement.

## Non-Consumptive Water Right

Use in the amount of 177 gallons per minute from Mission, Pauline, Trisky and Elk Creeks, when such flows are naturally available, from springs, seeps and naturally-occurring surface flows for bird habitat and instream flow.
