A GUIDE TO EXAMINATION REMARKS

This guide is arranged alphabetically by remark category. Within each category, remarks are organized into sections. Remarks are either information/clarification remarks or issue remarks. Remarks may be “formatted” (see below) or they may be free text remarks for unique situations. Remarks are arranged sequentially by remark number. Each remark is coded with a letter designation which indicates a category.

Following each remark in this guide are references to the [Supreme Court Water Right Claim Examination Rules \(W.R.C.E.R.\)](#) and to the Claim Examination Manual when applicable. Claim Examination Manual (Man. Ref.) references where the remark is discussed.

Formatted Remarks: Within each remark category, most remarks are assigned Remark ID numbers, e.g., S25. Remark ID numbers identify a specific remark to be applied to a water right. Entering the formatted Remark ID into the Remark tab queries the remark from a library in the database. Any available variables in the remark can be populated (not all formatted remarks have variables). Variables in a formatted remark are indicated in this guide by being highlighted in gray.

Free Text Remarks: Remarks describing claim-specific or unique situations do not have formatted Remark ID numbers. Instead, these unique remarks are entered in the Remark tab in the database under the appropriate code, e.g., SN for a source name information remark or SNIS for a source name issue remark. By selecting the appropriate remark category abbreviation, the free text remark will print below the relevant element on a review abstract (see [Table V.1](#) and [V.2](#) below). Formatted remarks are preferred—if a situation occurs that may apply to other claims, ask a supervisor about the possibility of creating a new formatted remark.

Unpublished remarks: Miscellaneous remarks (coded as M or MS) and General Remarks (coded as R or RM) will only appear on internally generated documents and while accessing the database.

EXAMINATION MANUAL REMARK CATEGORIES

The remark categories are organized by water right element. For remarks to print in the appropriate location on abstracts, remarks must be identified with the proper category.

When coding a free text remark, choose the remark type according to whether the remark is an informational remark or an issue remark: ‘OW’ is an information remark for ownership; ‘OWIS’ is an issue remark for ownership.

For ease of use, any remark followed by a list of water right numbers, such as the decree exceeded remark (D5), should list the water right numbers in numerical order, without basin designation (000000-00 or 00000000).

REMARK CATEGORY SECTIONS

A. Information or Clarification Remarks: This section lists remarks which explain an aspect or feature of a water right element. Examples may include identifying a secondary point of diversion or noting a limited period of use agreement. Information or clarification remarks appear below the appropriate element on the review abstract (see example indicated by → below). In the department's summary report and on the decree abstract, the information remark will either print below the applicable element, or in a “remarks area” (see example indicated by → below) directly above the “Issue Box” (explained in next section).

REVIEW ABSTRACT:

Source: - MAGPIE CREEK
Source Type: SURFACE|WATER
→ ALSO KNOWN AS HOWELL SPRING DIVERSION (1910)
ALSO KNOWN AS FREEMAN CREEK (1900)

DECREE ABSTRACT:

→ THE FOLLOWING ELEMENTS WERE AMENDED BY THE CLAIMANT ON 10/18/1999: MAXIMUM ACRES, VOLUME.

THE FOLLOWING ISSUES WERE IDENTIFIED BY THE DNRC DURING ITS EXAMINATION OF THIS WATER RIGHT CLAIM. THESE ISSUES MAY REMAIN UNRESOLVED IF NO OBJECTIONS ARE FILED.

THE PERIOD OF DIVERSION FROM THE SOURCE INTO STORAGE CANNOT BE IDENTIFIED.

B. Issue Remarks: This section lists remarks identifying potential factual and/or legal issues discovered during claim examination. These remarks alert the claimant to potential issues during claimant contact prior to the Water Court issuing a decree. The issue remarks are also utilized by other parties reviewing claims. Careful consideration is required before applying an issue remark to a claim as statute requires the Water Court to resolve all issue remarks. These remarks will appear below the applicable element as underlined text on a review abstract (see example indicated by → below). Issue remarks will appear in the “Issue Box” of the department's summary report and the decree abstract.

REVIEW ABSTRACT:

Flow Rate: 1.88 CFS

→ FLOW RATE MAY REQUIRE MODIFICATION BASED ON RESOLUTION OF MAXIMUM ACRES ISSUE.

DECREE ABSTRACT:

THE FOLLOWING ISSUES WERE IDENTIFIED BY THE DNRC DURING ITS EXAMINATION OF THIS WATER RIGHT CLAIM. THESE ISSUES MAY REMAIN UNRESOLVED IF NO OBJECTIONS ARE FILED.

FLOW RATE MAY REQUIRE MODIFICATION BASED ON RESOLUTION OF MAXIMUM ACRES ISSUE.

THE TETON COUNTY WATER RESOURCES SURVEY (1962) APPEARS TO INDICATE 0.00 ACRES IRRIGATED.

THE PRIORITY DATE MAY BE QUESTIONABLE. THIS CLAIM IS FOR A FILED APPROPRIATION ON SPRING COULEE WITH A PRIORITY DATE PREDATING CASE NO. 388 TETON COUNTY.

C. Legacy and Archived Remarks: This section lists historical remarks generally no longer used in examination. Most remarks are from a former database system. These remarks have been updated or converted in the current Oracle database. Keep in mind these remarks are still in use by the Water Court and appear in decrees issued prior to December 2003. On occasion, when no current remark is adequate, these archived remarks may be used. Check with a supervisor or the Bureau Chief prior to using such remarks. Usually these remarks are used for a post-decree revision by the Water Court. In addition, some remarks are obsolete: “incidental use” remarks have been converted to purpose information remarks.

D. Water Court, Court Ordered, Post-Decree, Indian Reservation or Federal Right Remarks:

Water Court Remarks: In the objection resolution process by the Water Court, the water master makes revisions to a hard copy of the decree abstract and sends it to the department to update the database record. As these remarks are used frequently by the water masters when making revisions, the remarks have been assigned reference numbers and added to the remarks library. In addition to the Water Court remarks listed in this chapter, there are three general information remarks which are very broad in nature and can apply in nearly every category of remarks. Because of the nature of the following three remarks, they are mentioned here, and not categorized by element. **Water Court remarks are NOT for use in examination.**

G981 THE ANY ELEMENT MAY BE INCORRECT. THE ANY ELEMENT APPEARS TO BE ENTER VARIABLE. SEE DNRC MEMORANDUM DATED MM/DD/YYYY.

G985 THE ANY ELEMENT MAY BE INCORRECT. THE ANY ELEMENT APPEARS TO BE ENTER VARIABLE.

G986 THE WATER COURT HAS BEEN PRESENTED WITH EVIDENCE INDICATING THE ANY ELEMENT MAY BE INCORRECT. THE ANY ELEMENT MAY BE ENTER VARIABLE.

Court Ordered Remarks: **Court Ordered remarks are ONLY to be used during examination when the Court has issued an order specifying the use of such a remark.** Notice of these Court Orders will be distributed to the appropriate staff.

Post-decree Remarks: Post-decree remarks are used for correcting errors in decreed information found after the decree is issued. These remarks must be approved by the Water Court before they can be added to a decreed right because of due process notice requirements.

Indian Reservation and Federal Rights Remarks: Indian Reservation and Federal Rights remarks are generally specified by Court Order and pertain to a

specific basin(s). They are only to be used when specifically directed to do so (by a supervisor).

E. Database Generated Remarks: These remarks are automatically generated by the Oracle database. Database generated remarks may be added as a result of entering data into the Related Rights tab or by running standards at the conclusion of the examination of a claim. The Supreme Court Rules specifically direct the DNRC to add these standard remarks when certain situations exist.

Table V-1: Information/clarification and issue remark categories will print below the water right element on the review abstract. For the summary and decree abstracts, only the information remarks print below the water right element. Issue remarks print in the Issue Box:

DUPLICATE RIGHT (DU)

Added to claims that appear to be in duplicate or are redundant. Duplicate rights are identified when the claimed elements and supporting documentation provided are exactly the same on more than one statement of claim. Redundant rights are more difficult to identify. Many of the elements are the same on more than one statement of claim. The one element that will not be the same in a redundant situation is the priority date. See [Man. Ref. VI.J.3.h] for further examples of duplicate and redundant rights.
