IMPORTANT INFORMATION

- **Only file this form if the property transfer occurred prior to July 1, 2008** or some type of ownership/name change has occurred that does not require the filing of a deed.
- Do not file this form if only a portion of the water right is being transferred. Complete and file form 641 DNRC Ownership Update Divided Interest.
- Do not file this form if your only use of water is from an irrigation district, municipal system, water users association, or other public water supply.
- Water rights in Montana, including all irrigation water rights, must have a valid DNRC water right number to be of record. However, existing rights for livestock and individual domestic as opposed to municipal uses based on an in stream flow or groundwater source appropriated before July 1, 1973, do not need a DNRC water right number. If the water use does not have a DNRC water right number and does not fall within the above narrow exception, then you do not have a water right. Contact the DNRC for information on how to acquire a water right.

Described below is further explanation of exempt rights or water rights which are valid without a DNRC water right number. A DNRC water right number is not required for the following if the use began:

- prior to January 1, 1962: groundwater used for individual domestic use, as opposed to municipal use;
- prior to January 1, 1962: groundwater used for stock;
- between January 1, 1962 through June 30, 1973: groundwater used for stock or domestic purpose and a GW1, GW2, or GW3 form is properly filed in the courthouse; or
- prior to July 1, 1973: instream surface water used for stock or domestic purposes.

If a water right does not have a DNRC number, and does not fall within the above exceptions, then there is no water right.
