

CATEGORICAL EXCLUSION DOCUMENTATION FOR DNRC FOREST MANAGEMENT ACTIVITY

Project Name: Checkerboard Timber Permit

Proposed Implementation Date: 1/1/2017

Proponent: DNRC Helena Unit

Type and Purpose of Action: DNRC Helena Unit is proposing a timber harvest in T09N R10E Section 16. See attached map. Under the proposed timber harvest the DNRC would harvest and sell approximately 95 MBF of green ponderosa pine and Douglas-fir sawlogs and salvage approximately 50 MBF of dead ponderosa pine. Additional activities under the proposed action would include piling of unmerchantable dead ponderosa pine and the construction of approximately 1000 feet of temporary road that would be reclaimed and grass seeded at the completion of the project.

The goal of the timber harvest is to restore a semblance of historic condition, create fire resilient ponderosa pine dominated forest, salvage dead and dying ponderosa pine and Douglas-fir, and generate an estimated \$4200.00 revenue for the trust beneficiaries and \$864.50 for forest improvement.

Post timber harvest operations could include prescribed burning, slashing, thinning, grass seeding, and herbicide treatment. All slash would be treated to meet state laws and Montana forest management best management practices would be implemented. The proposed project term is 2 years to complete implementation.

By process of the adoption of the Forest Management Rules on February 27, 2003, pursuant to ARM 36.2.523(5)(a), the Department of Natural Resources and Conservation, Trust Land Management Division, has adopted the above categorical exclusions for activities conducted on state forested trust lands. "Categorical Exclusion" refers to a type of action that does not individually, collectively, or cumulatively require an EA or EIS unless extraordinary circumstances occur (ARM 36.2.522(5)).

Extraordinary Circumstances:

Will the proposed action affect one or more of the following resources, species or situations in the project area? If the resource, species, or situation is present, but project design avoids potential adverse effects on the resource, the answer is "No". One "Yes" answer indicates that Categorical Exclusion is not appropriate for the project, and an EA or EIS must be conducted.
