CHECKLIST ENVIRONMENTAL ASSESSMENT

**Proposed Action:** Approve Drilling Permit (Form 22)
**Project/Well Name:** Reddig 13-3
**Operator:** Lustre Oil Company, LLC

**Location:** NW SW Section 3 T30N R44E
**County:** Valley MT, **Field (or Wildcat):** Lustre

**Proposed Project Date:** 5/20/2022

---

### I. DESCRIPTION OF ACTION

Lustre Oil Company, LLC plans to drill a well to 5755’ MD / 5746’ TVD to test the Ratcliffe Formation in an open hole completion.

---

### II. PROJECT DEVELOPMENT

1. **PUBLIC INVOLVEMENT, AGENCIES, GROUPS, OR INDIVIDUALS CONTACTED**

   Montana Bureau of Mines and Geology, GWIC website (Valley County Wells).

   US Fish and Wildlife, Region 6 website

   ENDANGERED, THREATENED, PROPOSED AND CANDIDATE SPECIES MONTANA COUNTIES, Valley County

   Montana Natural Heritage Program Website (FWP)
   Heritage State Rank= S1, S2, S3, T30N R44E

   Montana Cadastral Website
   Surface Ownership and surface use Section 4 T30N R44E

   Montana Department of Natural Resources MEPA Submittal

2. **ALTERNATIVES CONSIDERED**

   **No Action Alternative:** The proposed well would not be re-entered.

   **Action Alternative:** Lustre Oil Company, LLC would have permission to drill the well.

---

### III. IMPACTS ON THE PHYSICAL ENVIRONMENT
3. AIR QUALITY

Long drilling time: No, 3-4 days drilling time.
Unusually deep drilling (high horsepower rig): No, triple drilling rig to drill well.

Possible H2S gas production: None anticipated.
In/near Class I air quality area: Yes, within boundary of the Fort Peck Indian Reservation.
Air quality permit for flaring/venting (if productive): Yes, DEQ air quality permit required under 75-2-211. AQB review.

Comments: No special concerns – using rig to drill well to 5755’ MD / 5746’ TVD to test the Ratcliffe Formation. If there are no gas gathering systems nearby, associated gas can be flared under Board Rule 36.22.1220.

4. WATER QUALITY

Salt/oil based mud: Use freshwater and freshwater mud system for surface hole. Water based KCl mud to be used on intermediate. Oil based mud to be used for drilling production interval.
High water table: No high-water table anticipated at this location.
Surface drainage leads to live water: No, closest drainage is an unnamed ephemeral drainage about 800’ to the south.

Water well contamination: No water wells within a ½ mile radius.

Porous/permeable soils: Yes, sandy gravel.
Class I stream drainage: No.
Groundwater vulnerability area: No.
Mitigation:
   ___ Lined reserve pit
   ___ Adequate surface casing
   ___ Berms/dykes, re-routed drainage
   X Closed mud system
   X Off-site disposal of solids/liquids (in approved facility)
Comments: Steel surface casing will be run to 1000’ and cemented to surface to protect ground water. (Rule 36.22.1001).

5. SOILS/VEGETATION/LAND USE

Vegetation: Grassland.
Stream crossings: Only ephemeral drainages.
High erosion potential: Yes, large cut of 22.3’ and a medium fill of 17.8’ required.
Loss of soil productivity: None, location to be restored after drilling well, if well is nonproductive.

Unusually large wellsite (Describe dimensions): No, 300’ X 300’.

Damage to improvements: Slight, surface use is grazing land.
Conflict with existing land use/values: Slight
Mitigation
   __ Avoid improvements (topographic tolerance)
   __ Exception location requested
   __ Stockpile topsoil
   __ Stream Crossing Permit (other agency review)
   X Reclaim unused part of wellsite if productive
   __ Special construction methods to enhance reclamation

Access Road: Access will be off Frazer Rd N and existing dirt road.

Drilling fluids/solids: Lustre will be utilizing a closed loop system and will be processing the cuttings through Clean Harbor's centrifuge and Poly tanks. The cuttings will be flock/processed before they are hauled to Wisco/Omni Environmental for disposal. Drilling fluids will also be processed back to clean KCL fluid and sent to Wisco/Omni for disposal as well.

6. HEALTH HAZARDS/NOISE

Proximity to public facilities/residences: Nearest residence is about 3/10 of a mile to the southeast.
Possibility of H2S: None anticipated.
In/near Class I air quality area: Yes, within boundary of the Fort Peck Indian Reservation.
Size of rig/length of drilling time: 3-4 days drilling time.
Mitigation:
   X Proper BOP equipment
   __ Topographic sound barriers
   __ H2S contingency and/or evacuation plan
   _ Special equipment/procedures requirements
   __ Other:

7. WILDLIFE/RECREATION

Sage Grouse: General habitat. Program analysis received 3/14/22.
Proximity to sensitive wildlife areas (DFWP identified): None.
Proximity to recreation sites: None.
Creation of new access to wildlife habitat: None.
Conflict with game range/refuge management: None.
Threatened or endangered Species: Species identified as threatened or endangered are the Pallid Sturgeon, Whooping Crane, Piping Plover, Red Knot, Northern Long-eared Bat, and Monarch Butterfly. MTFWP Natural Heritage Tracker website lists seven (7) species of concern. They are the Hoary Bat, Swift Fox, Sprague’s Pipit, Ferruginous Hawk, Chestnut-collared Longspur, Baird’s Sparrow, and Brewer’s Sparrow.

Mitigation:
   __ Avoidance (topographic tolerance/exception)
Other agency review (DFWP, federal agencies, DNRC Trust Lands, Sage Grouse Habitat Conservation Program)
  - Screening/fencing of pits, drillsite
  - Other:
Comments: Private grass lands. There may be species of concern that maybe impacted by this wellsite. We ask the operator to consult with the surface owner as to what he would like done if a species of concern is discovered at this location. The Board of Oil & Gas has no jurisdiction over private surface lands. No concerns.

### IV. IMPACTS ON THE HUMAN POPULATION

#### 8. HISTORICAL/CULTURAL/PALEONTOLOGICAL

Proximity to known sites: None.
  \[\text{Mitigation}\]
  - avoidance (topographic tolerance, location exception)
  - other agency review (SHPO, DNRC Trust Lands, federal agencies)
Other:

#### 9. SOCIAL/ECONOMIC

Substantial effect on tax base
  - Create demand for new governmental services
  - Population increase or relocation
Comments: No concerns.

### IV. SUMMARY

No long term impacts expected. Some short term impacts will occur, but can be mitigated. I conclude that the approval of the subject Notice of Intent to Drill (does/\textbf{does not}) constitute a major action of state government significantly affecting the quality of the human environment, and (does/\textbf{does not}) require the preparation of an environmental impact statement.
