CHECKLIST ENVIRONMENTAL ASSESSMENT

**Proposed Action:** Approve Drilling Permit (Form 22)
**Project/Well Name:** Pennel MC43-22SH
**Operator:** Denbury Onshore, LLC

**Location:** T8N, R59E, Sec 22 NESE
**County:** Fallon MT; **Field (or Wildcat):** Pennel

**Proposed Project Date:** 9/29/2022

---

**I. DESCRIPTION OF ACTION**

Denbury Onshore plans to drill a horizontal well into the Mission Canyon Formation 7,283’ TVD / 13,293’ MD. Surface casing to be set at 1,700’ and cemented to surface.

---

**II. PROJECT DEVELOPMENT**

**1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED**

Montana Bureau of Mines and Geology, GWIC website (Fallon County Wells).

US Fish and Wildlife, Region 6 website
ENDANGERED, THREATENED, PROPOSED AND CANDIDATE SPECIES MONTANA COUNTIES, Fallon County

Montana Natural Heritage Program Website (FWP)
Heritage State Rank= S1, S2, S3, T8N R59E

Montana Cadastral Website
Surface Ownership and surface use Section 22 T8N R59E

Montana Department of Natural Resources MEPA Submittal

---

**2. ALTERNATIVES CONSIDERED**

**No Action Alternative:** The proposed well would not be drilled.

**Action Alternative:** Denbury Onshore, LLC. would have permission to drill the well.
III. IMPACTS ON THE PHYSICAL ENVIRONMENT

3. AIR QUALITY

Long drilling time: No, 2-4 days.
Unusually deep drilling (high horsepower rig): No, triple derrick rig.

Possible H2S gas production: Yes, possible H2S gas, slight chance from Mississippian Formations.
In/near Class I air quality area: No Class I air quality area in the area of review.
Air quality permit for flaring/venting (if productive): Yes, DEQ air quality permit required under 75-2-211. AQB review.

Comments: No special concerns – using rig to drill to 7,283’ TVD / 13,293’ MD. If there are no gas gathering systems nearby, associated gas can be flared under Board Rule 36.22.1220.

4. WATER QUALITY

Salt/oil based mud: Surface hole to be drilled with freshwater mud system. Intermediate and production hole to be drilled with oil based mud system.
High water table: No high-water table at this well location.
Surface drainage leads to live water: No, an unnamed ephemeral drainage is located about 850 feet to the south.

Water well contamination: Denbury’s permit shows there are 10 water wells within ½ mile radius. GWIC shows no water wells within ½ radius, but shows several oil/gas wells.

Porous/permeable soils: Sandy clay.
Class I stream drainage: No class I streams in the area.
Groundwater vulnerability area: No.
Mitigation:
- Lined reserve pit:
  - X Adequate surface casing
  - Berms/dykes, re-routed drainage
  - X Closed mud system
  - X Off-site disposal of solids/liquids (in approved facility)
Comments: Steel surface casing to be set and cemented to surface to protect ground water. (Rule 36.22.1001).

5. SOILS/VEGETATION/LAND USE
Vegetation: Area is grassland.
Stream crossings: No stream crossings anticipated.
High erosion potential: Small cut of 7.3’ and small fill of 4.2’ required.
Loss of soil productivity: No, location will be restored after drilling if nonproductive.

Unusually large wellsite (Describe dimensions): No, 350’ X 350’ location for a one well pad.

Damage to improvements: Slight.
Conflict with existing land use/values: Slight.
   Mitigation
   __ Avoid improvements (topographic tolerance)
   __ Exception location requested
   _X_ Stockpile topsoil
   __ Stream Crossing Permit (other agency review)
   _X_ Reclaim unused part of wellsite if productive
   __ Special construction methods to enhance reclamation

Access Road: Access will be off Pennel Rd, existing dirt road, and a new access of 671’ will be built into location.

Drilling fluids/solids: All drill cuttings will be collected in temporary metal pits at the surface and then hauled to a disposal facility.

6. HEALTH HAZARDS/NOISE

Proximity to public facilities/residences: No occupied structures within ¼ mile.
Possibility of H2S: Yes, possible H2S gas, slight chance from Mississippian Formations.
Size of rig/length of drilling time: Triple derrick rig, 2-4 days drilling time.
   Mitigation:
   _X_ Proper BOP equipment
   __ Topographic sound barriers
   __ H2S contingency and/or evacuation plan
   __ Special equipment/procedures requirements
   __ Other:

7. WILDLIFE/RECREATION

Sage Grouse: In general habitat and requires sage grouse approval from the Sage Grouse Habitat Conservation Program. Sage Grouse letter received on 7/13/22.
Proximity to sensitive wildlife areas (DFWP identified): None.
Proximity to recreation sites: None.
Creation of new access to wildlife habitat: No.
Conflict with game range/refuge management: No.
Threatened or endangered Species: Species listed as endangered or threatened in Fallon County are the Whooping Crane, Northern Long-eared Bat, Red Knot, Black-footed Ferret, and piping Plover. The
Montana Natural Heritage Program website lists six (6) species of concern: Brewer’s Sparrow, Loggerhead Shrike, Chestnut-collared Longspur, Greater Sage-Grouse, Baird’s Sparrow, and Bobolink.

Mitigation:
__ Avoidance (topographic tolerance/exception)
__ Other agency review (DFWP, federal agencies, DNRC Trust Lands)
__ Screening/fencing of pits, drillsite
__ Other:

Comments: Private grazing surface lands. There may be species of concern that maybe impacted by this wellsite. We ask the operator to consult with the surface owner as to what he would like done, if a species of concern is discovered at this location. The Board of Oil & Gas has no jurisdiction over private surface lands. No concerns.

IV. IMPACTS ON THE HUMAN POPULATION

8. HISTORICAL/CULTURAL/PALEONTOLOGICAL

Proximity to known sites:
Mitigation
__ avoidance (topographic tolerance, location exception)
__ other agency review (SHPO, DNRC Trust Lands, federal agencies)

Other:

9. SOCIAL/ECONOMIC

Substantial effect on tax base
__ Create demand for new governmental services
__ Population increase or relocation

Comments: No concerns.

IV. SUMMARY

No long term impacts expected. Some short term impacts will occur, but can be mitigated. I conclude that the approval of the subject Notice of Intent to Drill (does/does not) constitute a major action of state government significantly affecting the quality of the human environment, and (does/does not) require the preparation of an environmental impact statement.
