

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name:	Rocky Torgerson Access Road
Proposed Implementation Date:	2015
Proponent:	Rocky Torgerson
Location:	T16N-R54E-Sec 36
County:	Dawson County

I. TYPE AND PURPOSE OF ACTION

Rocky Torgerson (Proponent) has filed an application with the DNRC for the purpose of creating an all weather access road to deeded land located east of the state trust land T16N-R54E-Sec 36. The requested easement would be 224.21 feet in length and 30 feet in width encompassing .15 acres.

II. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED:

Provide a brief chronology of the scoping and ongoing involvement for this project.

The Proponent has submitted a DS 406a form. . The requested easement would be 224.21 feet in length and 30 feet in width encompassing .15 acres. The proponent of the project has provided a copy of DS-457 Notice of Settlement of Damages signed by the surface lessee

2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:

None

3. ALTERNATIVES CONSIDERED:

Alternative A- Approve the easement right of way application.
Alternative B- No action.

III. IMPACTS ON THE PHYSICAL ENVIRONMENT

- *RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.*
- *Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.*
- *Enter "NONE" if no impacts are identified or the resource is not present.*

4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE:

Consider the presence of fragile, compactable or unstable soils. Identify unusual geologic features. Specify any special reclamation considerations. Identify any cumulative impacts to soils.

Alternative A- Some soil disturbance would take place where the access road would be routed. The soil in the area of the proposed access route is a Thin Silty/ Shallow with Gravel complex. The soil structure is not fragile or unstable.

Alternative B-No Impact

5. WATER QUALITY, QUANTITY AND DISTRIBUTION:

Identify important surface or groundwater resources. Consider the potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality. Identify cumulative effects to water resources.

Alternative A- No Significant Impact

Alternative B- No Impact

6. AIR QUALITY:

What pollutants or particulate would be produced? Identify air quality regulations or zones (e.g. Class I air shed) the project would influence. Identify cumulative effects to air quality.

Alternative A- Pollutants and Particulates may be increased during the construction phase of the project. After the completion of the project pollutant and particulate levels should return to normal. Increase in pollutants during construction should be negligible.

Alternative B- No Impact

7. VEGETATION COVER, QUANTITY AND QUALITY:

What changes would the action cause to vegetative communities? Consider rare plants or cover types that would be affected. Identify cumulative effects to vegetation.

Alternative A- Where the construction takes place there may be disturbance to the vegetation cover. The current plant community in the area is comprised mostly native species. Current Species on the site include but are not limited to Western Wheatgrass (*agropyron smithii*), Bluebunch Wheatgrass (*agropyron spicatum*), Green Needlegrass (*stipa viridula*), Little Bluestem (*schizachyrium scoparium*), Needle and Thread (*stipa comata*), Threadleaf Sedge (*carex filifolia*), Blue Grama (*bouteloua gracilis*), Sandberg Bluegrass (*poa secunda*), Prairie Junegrass (*koleria pyramidata*). Due to the minor amount of disturbance and relocation of the fence, the area will be removed from any grazing pressure and be allowed to naturally reseed and recover.

Alternative B- No Impact

8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS:

Consider substantial habitat values and use of the area by wildlife, birds or fish. Identify cumulative effects to fish and wildlife.

Alternative A- There may be very minimal effects on any animal habitats within the boundaries of the project construction. Wildlife that inhabit the project area include antelope, deer, coyotes, rodents, reptiles. Wildlife may be temporarily disturbed during the construction of the project. After completion of the project there should be no lasting impacts to these species.

Alternative B- No Impact

9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES:

Consider any federally listed threatened or endangered species or habitat identified in the project area. Determine effects to wetlands. Consider Sensitive Species or Species of special concern. Identify cumulative effects to these species and their habitat.

Alternative A- A search of the Montana Natural Heritage Program database shows no threatened endangered or species of concern have been noted in the general project area. The proposed project is not located within Greater Sage Grouse Core or General Habitat. No significant impact.

Alternative B- No Impact

10. HISTORICAL AND ARCHAEOLOGICAL SITES:

Identify and determine effects to historical, archaeological or paleontological resources.

Alternative A-Upon inspection of the parcels by the Eastern Land Office staff no significant findings were noted within the project area. A search of the TLMS database showed one recorded site of lithic scatter on the tract (24DW519). This site is located north of the highway off of the gumbo bluffs and not in the area of proposed construction.

Alternative B- No Impact

11. AESTHETICS:

Determine if the project is located on a prominent topographic feature, or may be visible from populated or scenic areas. What level of noise, light or visual change would be produced? Identify cumulative effects to aesthetics.

Alternative A- The proposed easement would encompass an area of approximately .15 acres. Impacts to the aesthetics of the area should be minimal. The tract is currently crossed by 2 county roads and 1 state highway. No significant impacts.

Alternative B- No Impact

12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY:

Determine the amount of limited resources the project would require. Identify other activities nearby that the project would affect. Identify cumulative effects to environmental resources.

Alternative A- No significant impact

Alternative B- No Impact

13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA:

List other studies, plans or projects on this tract. Determine cumulative impacts likely to occur as a result of current private, state or federal actions in the analysis area, and from future proposed state actions in the analysis area that are under MEPA review (scoped) or permitting review by any state agency.

None

<p style="text-align: center;">IV. IMPACTS ON THE HUMAN POPULATION</p> <ul style="list-style-type: none">• <i>RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.</i>• <i>Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.</i>• <i>Enter "NONE" if no impacts are identified or the resource is not present.</i>
--

14. HUMAN HEALTH AND SAFETY:

Identify any health and safety risks posed by the project.

Alternative A- Any construction work would be completed by trained professionals. There are inherent risks involved in the heavy construction industry and the workers accept risks as an occupational hazard.

Alternative B- No Impact

15. INDUSTRIAL, COMMERCIAL AND AGRICULTURE ACTIVITIES AND PRODUCTION:

Identify how the project would add to or alter these activities.

Alternative A- It should have a neutral effect on Industrial, Commercial and Agricultural activities and production.

Alternative B- No Impact

16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT:

Estimate the number of jobs the project would create, move or eliminate. Identify cumulative effects to the employment market.

Alternative A- No significant impact

Alternative B- No Impact

17. LOCAL AND STATE TAX BASE AND TAX REVENUES:

Estimate tax revenue the project would create or eliminate. Identify cumulative effects to taxes and revenue.

Alternative A- No significant impact

Alternative B- No Impact

18. DEMAND FOR GOVERNMENT SERVICES:

Estimate increases in traffic and changes to traffic patterns. What changes would be needed to fire protection, police, schools, etc.? Identify cumulative effects of this and other projects on government services

Alternative A- No significant impact.

Alternative B- No Impact

19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS:

List State, County, City, USFS, BLM, Tribal, and other zoning or management plans, and identify how they would affect this project.

Alternative A- No Significant Impact

Alternative B- No Impact

20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES:

Identify any wilderness or recreational areas nearby or access routes through this tract. Determine the effects of the project on recreational potential within the tract. Identify cumulative effects to recreational and wilderness activities.

Alternative A- No Significant Impact

Alternative B- No Impact

21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING:

Estimate population changes and additional housing the project would require. Identify cumulative effects to population and housing.

Alternative A- No Significant Impact

Alternative B- No Impact

22. SOCIAL STRUCTURES AND MORES:

Identify potential disruption of native or traditional lifestyles or communities.

Alternative A- No Significant Impact

Alternative B- No Impact

23. CULTURAL UNIQUENESS AND DIVERSITY:

How would the action affect any unique quality of the area?

Alternative A- No Significant Impact

Alternative B- No Impact

24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:

Estimate the return to the trust. Include appropriate economic analysis. Identify potential future uses for the analysis area other than existing management. Identify cumulative economic and social effects likely to occur as a result of the proposed action.

Alternative A- This will provide income for the trust in the form of the purchase of a permanent easement. The amount of which has not been set at this time

Alternative B- No Impact

EA Checklist Prepared By:	Name: Scott Aye	Date: 6-23-15
	Title: Land Use Specialist	

V. FINDING

25. ALTERNATIVE SELECTED:

Alternative A

26. SIGNIFICANCE OF POTENTIAL IMPACTS:

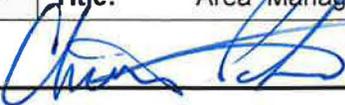

The granting of the requested right of way easement upon state owned trust lands for the proposed Torgerson access should not result in nor cause significant environmental impacts. The predicted environmental impacts have been identified and mitigation measures addressed in the EA checklist. The predicted impacts will be adequately mitigated through the construction and reclamation plans. The proposed action satisfies the trust fiduciary mandate and ensures the long term productivity of the land. An environmental assessment checklist is the appropriate level of analysis for the proposed action

27. NEED FOR FURTHER ENVIRONMENTAL ANALYSIS:
