

Stipulations for 20N 2E 36, NE4, Less 6.4 Acre Radar Station

Prospective bidders are hereby notified that the subject parcel has a history of weed presence and requires active management. The lessee will be responsible for controlling weeds in accordance with the lease stipulations

*The lessee shall seed the parcel by **April 15** of the current crop year. If the parcel is not seeded by this date, the lessee must implement appropriate weed control measures, which may include chemical, mechanical, or other approved methods, for the remainder of the growing season. At no time shall weeds be allowed to go to seed or spread beyond the boundaries of the parcel.*

Additionally, the lessee must submit a farm management plan to DNRC that is consistent with recommendations from appropriate agricultural agencies, such as FSA, MSU Extension, and NRCS.
