

Project Notification
Green Calico Blowdown Salvage Timber Permit
1/13/2026

The Montana Department of Natural Resources and Conservation (DNRC), Plains Unit is proposing to harvest timber on the following state owned parcels:

S10 T22N R27W & S32 T23N R27W

The Green Calico Blowdown Salvage project is located approximately 15 miles Northeast of Thompson Falls, MT, on the Thompson River Road.

The primary objective of the proposed project is to recover trees that have been blown down from a recent wind event.

This project would encompass 184 acres and yield an estimated 70 MBF. Treatment would be focused on the recovery of logs from downed trees as well as root pulled trees. The proposed harvest would contribute to the DNRC's sustained yield as mandated by state statute 77-5-222.

The DNRC, Trust Land Management Division, adopted categorical exclusions for certain forest management activities conducted on state forested trust lands (ARM 36.11.447). "Categorical Exclusion" refers to a type of action that does not individually, collectively, or cumulatively require an EA or EIS, pursuant to MEPA (MCA 75-1-101 through 324) and DNRC Administrative Procedures for MEPA (ARM 36.2.521 through 543), unless extraordinary circumstances occur (ARM 36.2.522(5)).

There would be road activities with this project. One bermed off road will be opened up to access the sale area. No new construction or reconstruction of any roads.

There would be no other activities other than blowdown salvage associated with this project.

Would monitor for noxious weeds in project area.

In preparation for this project, specialists such as wildlife biologists, hydrologists, soil scientists, and archeologists will be consulted.
