

LION POINT TIMBER SALE SAMPLE CONTRACT

STATE OF MONTANA - TIMBER SALE CONTRACT FOR STUMPAGE SOLD BY THE TON

VERSION 18 – JANUARY 2018

DEPARTMENT OF NATURAL RESOURCES & CONSERVATION 2705 Spurgin Road Missoula, MT 59804	NAME, ADDRESS AND PHONE NUMBER OF PURCHASER: _____ _____ _____	
	Tax I.D. Number _____	
LAND OFFICE Southwestern	SALE NAME Lion Point	SALE NUMBER _____
UNIT OFFICE Missoula	AWARD DATE _____	TERMINATION DATE October 31, 2029

THIS CONTRACT IS MADE AND ENTERED INTO by and between the State of Montana, acting through its Department of Natural Resources & Conservation, Trust Land Management Division (hereinafter called the State) and (, a sole proprietorship; or , a partnership; or , Inc. a corporation) (hereinafter called Purchaser) having an office and principal place of business at the address shown above. Purchaser's bid on the timber described in this contract has been accepted by the State after having been estimated, appraised and advertised for sale as required by law. Therefore, in consideration of the mutual promises contained in this agreement, the State agrees to sell and the Purchaser agrees to purchase the designated timber located on the areas described in this Contract at the specified rates of payment and in strict conformity with the requirements, standards, specifications and conditions set forth in this Contract.

TIMBER SALE CONTRACT

TABLE 1 - LEGAL DESCRIPTION OF THE GROSS SALE AREA			
The timber designated for sale under this Contract is within the following sale area			
Subdivisions	Section	Tw	Rge
W1/2	16	14N	24W
E1/2	30	14N	24W
W1/2	24	14N	25W
N1/2	26	14N	25W
ALL	36	14N	25W
Total approximate acres in gross sale area:	2,375		
Number of harvest units (Including Right-of-Way):	13		
Total acres in harvest units (Including Right-of-Way):	899		

TABLE 1 (continued) - ESTIMATED SALE VOLUME	
The state does not guarantee the product weight, by species or in total, to equal the estimated advertised weight in quantity or product designation.	
Product	Estimated Quantity (Tons)
Sawlogs	20,619
Ponderosa Pine Sawlogs	2,967
Other Material (Pulp/Firewood) – Optional	Not estimated
Total Estimated Volume	23,586

TABLE 1 (continued) - PAYMENT RATES			
Payment	Amount		Requirements
Performance Bond Amount:	20% of bid value		See Section II.A.1-3.
	Product	Amount	
Stumpage Rate per ton:	Sawlogs	Bid Rate	See Section II.B.1-3.
	Ponderosa Pine Sawlogs	\$1.00/ton	
	Other Material	\$1.00/ton	
Forest Improvement (FI) Fee Per ton:	Sawlogs	\$3.34	See Section II.B.4

I. GENERAL TERMS

A. DEFINITION OF CONTRACT LANGUAGE: The following definitions apply to terms used in this Contract:

1. Administrator – The Forest Management Bureau Chief, Trust Land Management Division, Department of Natural Resources & Conservation
2. Board – The Montana Board of Land Commissioners.
3. Department – The Department of Natural Resources and Conservation.
4. Draw – A swale or drainageway that may not have perceptible or definite beds or banks.
5. Environmental Law – Includes, but is not limited to, the following laws and any regulations promulgated under these laws: the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) (42 U.S.C. § 9601 *et seq.*), as amended; the Resource Conservation and Recovery Act (“RCRA”) (42 U.S.C. §§ 6901 – 6987), as amended; the Clean Air Act (42 U.S.C. § 7401, *et seq.*), as amended; the Safe Drinking Water Act (42 U.S.C. § 300f *et seq.*), as amended; the Clean Water Act (33 U.S.C. § 1401 *et seq.*), as amended; the Clean Air Act of Montana (Mont. Code Ann. § 75-2-101 *et seq.*), as amended; the Montana Water Quality Act (Mont. Code Ann. § 75-5-101 *et seq.*), as amended; the Montana Solid Waste Management Act (Mont. Code Ann. § 75-10-201 *et seq.*), as amended; the Montana Hazardous Waste Act (Mont. Code Ann. § 75-10-401 *et seq.*), as amended; the Montana Comprehensive Environmental Cleanup and Responsibility Act (Mont. Code Ann. § 75-10-701 *et seq.*) as amended; and the Montana Underground Storage Tank Act (Mont. Code Ann. § 75-11-501 *et seq.*) as amended.
6. Forest Officer – The State field representative assigned the job of contract administration for this timber sale Contract. Except as otherwise expressly stated in the Contract, the Forest Officer is not authorized to modify the Contract on behalf of the State.
7. Hazardous or deleterious substance – Means a substance that, because of its quantity, concentration, or physical, chemical, or infectious characteristics, may pose an imminent and substantial threat to public health, safety, or welfare or the environment, and is:
 - a. A substance that is defined as a hazardous substance by section 101(14) of CERCLA, 42 U.S.C. § 9601(14), as amended.
 - b. A substance identified by the administrator of the United States Environmental Protection Agency as a hazardous substance pursuant to section 102 of CERCLA, 42 U.S.C. § 9602, as amended.
 - c. A substance that is defined as a hazardous waste pursuant to section 1004(5) of RCRA, 42 U.S.C. § 6903(5), as amended, including a substance listed or identified in 40 CFR 261.
 - d. Any petroleum product.
8. Operating period – The annual time period during which field activities (logging, hauling, construction, etc.) may be conducted.
9. Paid or payment – Except as otherwise expressly stated in the Contract, full remuneration by either cash, money order or certified check.
10. Purchaser – The signatory party to this Contract other than the Administrator. Purchaser is also defined to include employees and agents of the Purchaser authorized to conduct activities as required for execution of the timber sale Contract. As an independent contractor, neither the

TIMBER SALE CONTRACT

Purchaser, its employees or agents are considered employees of the State of Montana pursuant to work performed under this Contract.

11. Sawlog – A green or dead log as further defined under Section VII.C.
12. State – The State of Montana and its agents and employees.
13. Stream – A stream is a natural watercourse of perceptible extent that has a sandy or rocky bottom or definite banks and confines and conducts continuously or intermittently flowing water.
14. Stumpage – The rate paid in dollars per ton as specified in Table 1 for Sawlogs and/or Other Material.
15. Supervisor – A person designated by the Purchaser in charge of operations on site at the sale area at all times when construction or harvesting operations are in progress. The Supervisor has authorization to receive notices from the Forest Officer and take appropriate action with regard to breach and/or violations of the terms of the contract.

B. REMOVAL OF TIMBER AND TITLE TRANSFER:

1. Provided the Purchaser has paid for timber as required in Section II.B.1, ADVANCE STUMPAGE PAYMENT, the Purchaser has the right to cut and remove timber from the sale area provided all Contract requirements related to the commencement of operations have been met.
2. Title to all timber included in this contract shall be retained by the State until:
 - a. The timber has been paid for.
 - b. The timber has been measured, as described in Section III.A. MEASUREMENT AND LOG ACCOUNTABILITY.
 - c. The timber has been properly marked and ticketed as described in Section III.C & E. MEASUREMENT AND LOG ACCOUNTABILITY, and removed from the gross sale area,
3. Title to timber remaining on the gross sale area at termination of the contract shall remain with the State of Montana.
4. As documented in this contract, or otherwise agreed to, all roads and other improvements become the property of the State as they are constructed.

C. TERM OF CONTRACT: This Contract is effective upon approval and execution by the Administrator and shall terminate on the Termination Date shown on page 1 unless terminated sooner for successful completion or for gross or persistent breach and/or failure to promptly and properly remedy contract violations of the Contract terms pursuant to Section IV. B, TERMINATION.

D. PRE-OPERATIONS MEETING: No activity may occur on the sale area until a pre-operations meeting is conducted between the Purchaser and the State. The Purchaser shall notify the Forest Officer at least seven (7) days prior to the start of operations to schedule the pre-operations meeting. The Forest Officer will specify to the Purchaser what information the Purchaser must provide to the State at the pre-operations meeting.

E. ANNUAL OPERATING PLAN: Purchaser may be required to submit a written annual operating plan, as specified by, and at the request of the Forest Officer.

F. CONTRACT TERM EXTENSION:

1. In the event that Purchaser's operations are delayed and Purchaser is not able to complete the requirements of this Contract prior to the termination date, the State may grant an extension of

TIMBER SALE CONTRACT

the term of this Contract. An extension will be considered by the State under only the following circumstances:

- a. The State determines an extension is in its best interests;
 - b. Purchaser applies for the extension in writing at least 30 days prior to the termination date.
 - c. The State notifies the Purchaser that an extension is required.
 - d. Purchaser has provided the State with written notice from the surety that the performance bond on this contract has been extended for a period commensurate with the requested contract extension.
 - e. Purchaser has made a good faith effort to complete the sale.
 - f. The extension request is not based on poor log and/or market conditions.
2. If the contract term extension is granted, Purchaser shall conduct continuous operations through the operating periods and/or resume operations at the start of the next operating period until the requirements of this Contract are completed. No extension shall be granted for a period longer than eighteen (18) months after the termination date as provided herein unless a longer extension is determined to be in the State's best interest.
 3. If the extension is requested and granted because of delays resulting from matters within Purchaser's control, the following will apply:
 - a. Purchaser shall pay an extension fee of \$ 500.00.
 - b. Stumpage rates for any volume cut, skidded or hauled during the extension period will be escalated a minimum of 10% to reflect the interest lost to the trust beneficiaries.
 - c. No de-escalation will occur from the time the extension is granted by the Administrator, as documented in a signed modification, through the remainder of the Contract.
 4. An extension may be granted to the Purchaser without penalty if the State prohibits logging activity for more than 2 weeks during the operating period described in this Contract.
 5. All conditions of this contract shall remain in force during any period of extension, unless those conditions are amended by the terms of the extension.
 6. In the event the Contract terminates pursuant to Section I.C, TERM OF CONTRACT due to expiration of the time within which its performance shall have been completed, and the Department has not granted an extension, the Purchaser shall immediately cease all operations within the Gross Sale Area as shown in Table 1. Operations beyond the contract termination date for which the Department has not granted an extension will be treated as trespass.
- G. LIABILITY FOR LOSS:** The Purchaser is responsible for loss, degradation, or damage to timber while the timber is in his, her or its custody, including but not limited to, timber which has been felled, skidded or decked and/or timber which has been lost, damaged or stolen after removal from the sale area but before scaling or weight is recorded.
- H. SUPERVISION:** When construction or harvesting operations are in progress, the Purchaser shall have exclusive control over the way the Contract is executed if, as determined by the Department, the Purchaser has and is complying with all terms and conditions provided herein. Purchaser is required to have a supervisor(s) in charge of operations on the sale area at all times. Such supervisor(s) shall have authorization to receive notices from the Forest Officer and take appropriate action with regard to breach and/or violations of the terms and conditions of the Contract.

TIMBER SALE CONTRACT

I. COMPLAINTS:

1. Complaints by the Purchaser concerning any action or decision of a Forest Officer, including suspension orders, must be made in writing to the Administrator postmarked within 30 days of the disputed action or decision. In the interim, Purchaser must comply with the directions of the Forest Officer.
2. Upon receipt of a complaint, the Administrator, or a designated representative, shall promptly hold an informal conference with the Purchaser and the Forest Officer to review the disputed action. The Purchaser shall be given adequate notice of the conference and shall be given the opportunity to present evidence and an argument to rebut the reasons given by the Forest Officer for the disputed action. After review, the Administrator shall notify the Purchaser in writing of his decision. The decision of the Administrator is final on behalf of the State, except regarding termination of the contract.

J. ASSIGNMENT: This contract shall not be assigned in whole or in part unless approved in writing by the Administrator.

K. MODIFICATIONS:

1. This contract, together with the attachments listed herein, contains the entire agreement of the parties and no statements, promises or inducements made by either party, or agents of either party, that are not contained in such written Contract shall be valid or binding. This Contract, except as described in Section I.K.2 below, cannot be enlarged, modified or altered except upon written agreement signed by all parties to this contract. Only the Administrator, his successor, his designated representative, or the Board of Land Commissioners, is authorized to enter into such modification on behalf of the State.
2. To protect cultural or natural resources the State may modify provisions of the Contract without prior agreement by the Purchaser. If such modifications occur the State will provide equitable compensation to the Purchaser for those modifications.

L. EQUAL EMPLOYMENT OPPORTUNITY: Pursuant to Section 49-3-207, MCA, any hiring by the Purchaser under this agreement must be based on merit and qualifications and there must be no discrimination based on race, color, religion, creed, political ideas, sex, age, marital status, physical or mental disability, or national origin by any person performing this Contract.

M. LIABILITY INSURANCE:

1. Prior to the execution of this Contract, the Purchaser or their agents shall obtain, carry and keep in good standing for the remainder of the contract period, with any extensions:
 - a. Comprehensive general liability insurance coverage to the limit of \$1,000,000.00 per occurrence and \$2,000,000.00 per aggregate. Each such policy shall include endorsements, which shall name the State as an additional insured and shall provide that the State shall be given 30 days' written notice, at the address stated above, prior to cancellation or any material change in such policy.
 - b. Automobile Liability Insurance: The Purchaser shall purchase and maintain coverage with split limits of \$500,000 per person (personal injury), \$1,000,000 per accident occurrence (personal injury), and \$100,000 per accident occurrence (property damage), OR combined single limits of \$1,000,000 per occurrence to cover such claims as may be caused by any act, omission, or negligence of the contractor or its officers, agents, representatives, assigns, or subcontractors.
2. In lieu of such coverage, the Purchaser may provide proof of self-insurance in at least an amount equal to that provided above.

TIMBER SALE CONTRACT

3. Prior to the commencement of any work to be performed under this contract, Purchaser shall deliver to the State a certificate of insurance from the insurer(s) of the Purchaser or their agents certifying that coverage in at least the amounts stated above is in force. Such certificate shall be submitted to the State for approval of the insurer(s), the amount, and the form. The State reserves the right to require a certified copy of any such policy or to examine the policy itself.
4. A self-insured Purchaser shall provide an equivalent certificate of insurance subject to the approval of the State.
5. It is further understood and agreed that this Contract shall terminate immediately in the event that the mandatory liability insurance coverage required under this part is for any reason not obtained or is discontinued.

N. WORKERS' COMPENSATION INSURANCE:

1. Prior to the commencement of any work under this Contract, Purchaser shall provide written verification to the Administrator that all individuals who are to be engaged in work under this Contract, including but not limited to employees, agents or independent contractors of the Purchaser or of its subcontractors, are either insured for workers' compensation coverage or are exempted from such coverage as certified independent contractors pursuant to § 39-71-401 MCA.
2. It is expressly understood and agreed that no such individual may engage in work in furtherance of this Contract at any time during its period unless either insured for workers' compensation coverage or exempted from such coverage as indicated above.
3. It is understood and agreed that this Contract shall terminate immediately if workers' compensation coverage or exemptions required under this part is discontinued for any individuals engaged in work under this Contract.

O. SAFETY: The Purchaser, employees, subcontractors and their employees shall conduct their activities in a safe and workmanlike manner, shall cooperate in making it possible for the Forest Officer to safely, efficiently, and economically perform his, her or its administrative duties, and shall comply with federal and State safety standards for logging operations as established by the United States Department of Labor, Occupational Safety and Health Administration (OSHA; 29 Code of Federal Regulations 1910 and any other such applicable regulations promulgated by OSHA) and as required by Title 50, Chapter 71 of the Montana Code Annotated, and any regulations promulgated to implement the statutes found in that Title and Chapter of the Montana Code Annotated. The Purchaser, and not the State, is responsible for instituting and maintaining all precautions, procedures and programs for the safety of all persons on the project site, and the State hereby disclaims any and all responsibility for injuries or accidents occurring at the site.

P. SAWMILLS PROHIBITED: No sawmills shall be allowed to operate on the gross sale area.

Q. LOG CHIPPERS OR GRINDERS: No log chippers or grinders shall be allowed to operate on the gross sale area unless written approval to do so is granted by the Forest Officer. In order for approval to be granted, the Purchaser shall identify a method acceptable to the State for the measurement of all wood to be ground or chipped. If the Purchaser intends to operate a log chipper outside of the gross sale area, provisions must be made for obtaining certified weights of either the material removed from the sale or of the resultant products.

R. SALE DELAYED OR PRECLUDED BY JUDICIAL ACTION OR GOVERNMENT REGULATORY ACTION:

1. In the event judicial action, change in applicable law, or implementation of government regulatory action renders proceeding with this contract unlawful, the State will suspend or terminate the Contract in whole or in part. Upon notice of such suspension or termination, Purchaser shall

TIMBER SALE CONTRACT

immediately cease all or any portion of such operations under the Contract as directed by the State. If a court of competent jurisdiction has entered a final judgment rendering further proceeding with this Contract unlawful, or government regulatory action takes effect, the State may terminate the Contract or, at the State's option, suspend the Contract in whole or in part, pending appeal of the court's final judgment. If the Contract is suspended, the State shall not be liable to the Purchaser for damages or losses resulting from the delay. In the event the Contract is terminated due to judicial action, a change in law, or government regulations, the State shall be liable to Purchaser only as follows:

- a. The State shall refund any portion of advance stumpage payments or down payments not needed to compensate the State for timber removed.
 - b. The State shall release any portion of the performance bond not needed to compensate the State for timber removed or other losses suffered by the State due to breach of contract by the Purchaser.
 - c. The State shall reimburse the Purchaser for the portion of reasonable costs of constructing or improving roads or of installing other facilities on State lands pursuant to this Contract that the Purchaser has not been able to use for removing timber. The Purchaser shall provide documentation requested by the State of the Purchaser's actual costs of constructing or improving such roads or installing other improvements.
- S. VENUE AND CHOICE OF LAW:** In the event of litigation concerning this agreement, venue shall be in the First Judicial District, Lewis and Clark County, Montana, and this agreement shall be governed by the laws of the State of Montana both as to interpretation and performance.
- T. AUTHORIZATION TO ENTER:** The Purchaser is authorized to enter the sale area only for purposes related to the performance of this Contract.
- U. USE BY OTHERS:** The State reserves the right to issue timber permits or other permits on the sale area for forest products not included in this Contract or for other uses not in conflict with this Contract. The State also reserves the right to permit other persons to cross the sale area to gain access to other lands for fire suppression or for other purposes. Where the Purchaser improves or reconstructs an existing road, the use thereafter by the Purchaser shall accommodate safe use by others.
- V. OTHER OPERATIONS BY THE STATE:** The State reserves the right to at any time conduct within the gross sale area forest management operations including, but not limited to, slash piling, burning, handwork, broadcast burning, mop-up, patrolling, thinning and tree planting during the term of this Contract.
- W. INDEMNITY AND LIABILITY:**
1. The Purchaser agrees to indemnify the State, its officials, agents, and employees, while acting within the scope of their duties and hold the State harmless from and against all claims, demands, and causes of action of any kind or character, including the cost of defense, arising in favor of the Purchaser's employees or third parties on account of bodily or personal injuries, death or damage to property arising out of services performed, goods or rights to intellectual property provided or omissions of services or in any way resulting from the acts or omission of the Purchaser and/or its agents, employees, subcontractors or its representatives while engaged in work under this Contract, all to the extent of the Purchaser's negligence.
 2. The Purchaser shall be responsible for, indemnify, defend and hold the State harmless from and against any loss, cost (including, without limitation, reasonable legal, accounting, consulting, engineering and similar expenses), damage, claim, fine or liability, including the necessity for tests, inspections or other work, and any damage, claim, fine or liability arising as a result of such tests, inspections or other work, the State must perform:

TIMBER SALE CONTRACT

- a. Based upon an actual or alleged violation by the Purchaser of, or failure by the Purchaser to comply with, any Environmental Law during the term of this Contract;
 - b. Arising from the discharge, release, threatened release, handling, storage, treatment, deposit or disposal of any Hazardous or Deleterious Substances caused or exacerbated by the activities of the Purchaser on or in the gross sale area during the term of this Contract; or
 - c. Otherwise arising out of or in connection with any environmental condition or action caused or created by the Purchaser.
- X. OTHER LAWS AND REGULATIONS:** This Contract is subject to all applicable federal, state, county, and municipal laws, ordinances, and regulations in effect at the date of this Contract or which may, from time to time, be adopted, and which do not impair the obligations of this Contract and which do not deprive the Purchaser of an existing property right recognized by law. A violation by the Purchaser of any federal, state, county, and/or municipal laws, ordinances and/or regulations while conducting operations under the terms of this Contract, shall, in the discretion of the State, constitute sufficient reason for the suspension or termination of this Contract. If any part of the lands or premises under this Contract are used or allowed or permitted to be used for any purpose contrary to the laws of this state or the United States, such unlawful use shall, in the discretion of the State, constitute sufficient reason for the suspension or termination of this Contract.
- Y. FORCE MAJEURE:** Neither party shall be responsible for failure to fulfill its obligations due to causes beyond its reasonable control, including without limitation, acts or omissions of government or military authority, acts of God, materials shortages, transportation delays, fires, floods, labor disturbances, riots, wars, terrorist acts, or any other causes, directly or indirectly beyond the reasonable control of the nonperforming party, so long as such party is using its best efforts to remedy such failure or delays. Force majeure will not relieve the Purchaser from liability for damage or otherwise excuse performance of this Contract should the Purchaser cause a fire for which they would be liable under § 50-63-103, MCA.

II. CHARGES AND PAYMENTS

A. PERFORMANCE BOND:

1. As a guarantee of the faithful performance of this Contract, Purchaser shall furnish a bond, with sufficient sureties, to the State in an amount equal to the potential loss to the State in the event of Purchaser's breach or default under the terms of this Contract as determined by the Administrator (§ 77-5-202 (a), MCA). The performance bond may be in cash, bond, irrevocable letter of credit, or certificate of deposit with sufficient sureties. A letter of credit must be automatically renewable without amendment for the term of the contract. The performance bond the Purchaser must submit for this contract is shown in Table 1.
2. Upon full performance of the terms of the Contract, the State shall release the performance bond.
3. Upon substantial performance of the terms of the Contract, the Administrator may release a portion of the performance bond not needed to compensate the State for any remaining timber to be removed or any other losses that may be suffered by the State due to breach of Contract by the Purchaser. The bond shall not be reduced to less than five percent (5%) of the estimated value of the timber sold.

B. PAYMENTS: The Purchaser agrees to make payments to the Treasurer of the State of Montana as follows:

1. **ADVANCE STUMPAGE PAYMENTS:** The Purchaser is required to pay for all timber in advance of cutting at the rates shown in Table 1. Advance stumpage payments will be held by the State to cover the Purchaser's estimated timber cutting for at least six (6) weeks of operations. Advance

TIMBER SALE CONTRACT

stumpage payments may be reduced just before completion of the sale or when cutting requirements are to be suspended for at least 3 months. Advance stumpage payments may be in cash, bond, irrevocable letter of credit, or certificate of deposit with sufficient sureties.

2. **INITIAL ADVANCE STUMPAGE PAYMENT:** The initial advance payment will be made by the Purchaser prior to the start of timber cutting operations.
3. **PAYMENT SCHEDULE:** Payments in full for individual invoices will be made by the Purchaser as called for by the Administrator; in no event will payments be made by the Purchaser more than 14 days from the date of billing.
4. **FOREST IMPROVEMENT PAYMENTS:** The Purchaser is required to pay a fee for Forest Improvement on all sawlogs cut, both live and dead. The Forest Improvement fee for this sale is shown in Table 1. The Purchaser agrees to make these payments concurrently with stumpage payments.

C. ROAD USE AND MAINTENANCE PAYMENTS:

1. **PAYMENTS:** The Purchaser is required to make payments for road use and maintenance at the rates listed in Table 1 or as amended by revisions to road use permits. Payments will be made as called for by the Administrator or as otherwise directed in this contract.
2. **ALTERNATE HAUL ROUTES:** The Purchaser is authorized by the State to use the haul route described in this contract and attachments. If the Purchaser chooses to use an alternate haul route, that haul route must be approved by the State. Road use charges, maintenance requirements and payments may be adjusted to reflect the haul route used by the Purchaser. The Purchaser is responsible for obtaining any right-of-way required for an alternate haul route and for meeting all requirements of any agreements associated with that right-of-way. Proof of any such agreement must be provided to the State prior to use. Stumpage fees and Forest Improvement fees are not subject to a downward adjustment under this clause.

III. MEASUREMENT AND LOG ACCOUNTABILITY

A. PRODUCT MEASUREMENT:

1. The State will determine the value of products removed from the sale based on the total gross weight of material hauled. Weight tickets will be used to obtain the total value.
2. When mixed products with different payment rates per ton are hauled on one load, the entire load will be charged at the rate of the product with the highest value contained in the load.
3. Upon request by the State, the most recent load delivered to a receiving mill must be made available for inspection by the State or their representatives. The weight ticket identifying the load must remain affixed to the load.

B. WEIGHT TICKETS: The Purchaser is required to furnish weight tickets to the State as agreed to by the Forest Officer and the Purchaser.

1. All weight tickets shall be mailed or delivered with corresponding load tickets, as outlined below, directly to the DNRC Unit or Land Office administering this contract. In this case, send truck tickets to **(Missoula Unit DNRC, 3206 Maverick Lane, Missoula, MT 59804)**. This requirement may be waived or changed by the Forest Officer.
2. Weight tickets shall show gross, tare and net weights and the corresponding load ticket number of each product load. Weight tickets must be from State of Montana certified scales, and all weight tickets must have mechanically stamped weights for the gross and tare weights unless

TIMBER SALE CONTRACT

otherwise permitted in writing by the Forest Officer. Weight tickets will be mailed or delivered to the State on a bi-weekly basis or as otherwise agreed to by the Forest Officer. A weight ticket will be considered as missing if not furnished within 4 weeks of the load delivery date. Failure to comply with this provision is a contract violation.

3. Truck ticket information may be provided to DNRC electronically if all required ticket information is provided. Contact Forest Product Sales Supervisor (406) 542-4276 at the Forest Management Bureau to implement electronic transfer. The information must be provided to the State on a bi-weekly basis prior to the tenth (10th) and twenty-fourth (24th) of each month. The paper copy of the weight tickets must also continue to be provided to the State. The requirement to supply the paper copy of the weight tickets may be waived by the Administrator.
- C. LOAD TICKETS:** The Purchaser will be issued load ticket books with consecutively numbered tickets for uniquely identifying truckloads of logs. A load ticket shall be attached to the driver's side bunk log of each product load prior to hauling, with the Scaler's copy given to the State from the delivery point. The Purchaser shall complete each ticket with the sale information required by the State. The Purchaser shall provide to the Forest Officer a complete list of destinations to which loads will be delivered. The State, at its discretion, may require a separate ticket book for each destination. Failure to comply with this provision is a contract violation.
- D. SORTING OF PRODUCTS:** The State may require separate ticket books for any loads sorted by the Purchaser by size or species or by specific products intended for different delivery points. Load tickets designated for a specific product must only be used for that specific product. When a load ticket is used with an incorrect product it is a contract violation.
- E. LOAD MARKING:** The Purchaser is required to mark all loads of logs before removal from the loading area to assist in identification while in transit or at the point of delivery. Marking shall be accomplished by painting "ST" in blue paint and the last three digits of the truck load ticket number on log ends of at least three logs on each load, both front and back. The driver's side bunk log shall be one of the marked logs. Failure to comply with this provision is a contract violation.
- F. PROMPT DELIVERY:** The Purchaser will deliver loads from the timber sale area to a receiving log yard directly without diversion. "Over-nighting" loads during transit are expressly forbidden unless approved by Forest Officer prior to hauling. Failure to comply with this provision is a contract violation.
- G. SCALE RULE:**
1. Any sawlogs scaled by the State shall be scaled using the Scribner Decimal "C" log rule. Log scaling will follow the procedures listed in the National Forest Log Scaling Handbook (FSH 2409.11) excluding Region 1 supplements.
 2. In cases where conversion is required, a conversion factor of **6.52** tons per thousand board feet will be used for sawlogs.

IV. CONTRACT VIOLATIONS AND PENALTIES

A. SUSPENSION:

1. **FAILURE TO PAY ADVANCE STUMPAGE:** If Purchaser fails to submit advance stumpage payments as directed by the Administrator pursuant to the terms of this Contract within 30 days of the request for such payments, all operations covered by this Contract shall immediately cease upon written or oral order from the State until all required advance stumpage payments, or guarantee of payment satisfactory to the State, have been made. The cutting and removal of timber may resume only upon receipt of written notice to the Purchaser from the State that acknowledges adequate payment or guarantee.

TIMBER SALE CONTRACT

2. **LOSS OF BOND:** If the surety bond or other bond securing performance of this Contract is canceled or otherwise becomes ineffective, operations covered by this Contract shall immediately cease upon written or oral order from the State to the Purchaser. Cutting and removal of timber may resume only upon receipt of written notice from the State that acknowledges adequate bond.
3. **OTHER CONTRACT VIOLATIONS:**
 - a. Should the Forest Officer observe a condition that violates the terms of this Contract, the Forest Officer may verbally notify the Purchaser or its employees or subcontractors of such condition and immediately suspend all or part of the operations in the sale area to prevent harm to the interests of the State or the public. Should the Purchaser or its employees or subcontractors fail to comply with any verbal suspension order, the Administrator may terminate the Contract pursuant to Section IV. B. Termination. The Forest Officer may rescind his/her verbal suspension order upon satisfactory cure of the Purchaser's violation and operations may resume.
 - b. Suspension orders may be given in writing or verbally to the Purchaser, or to his, her or its employees or subcontractors. Once given, the Purchaser, and his, her or its employees or subcontractors shall immediately comply with such order of suspension and failure to do so shall constitute grounds for termination of this Contract. Suspension orders are reviewable under the provisions described in Section I.I. COMPLAINTS.
 - c. The Administrator may issue a written notice of suspension depending upon the severity of the violation and Purchaser's ability to cure. Such notice shall contain information regarding:
 1. The breach observed and harm anticipated;
 2. The contract provisions violated;
 3. If possible, the measures required to cure the violation and allow operations to resume; and
 4. The deadline within which the Purchaser must cure the violation.Should the Purchaser fail to cure the violation as required, or to obtain a written variance from the Administrator, the Administrator may charge the Purchaser a \$250 per day penalty for every day that the violation persists. Operations may resume only upon written notice from the Administrator. If satisfactory measures or remedies cannot be found to cure the violation, the Administrator may immediately terminate the Contract pursuant to Section IV.B. TERMINATION.

B. TERMINATION:

1. Gross or persistent contract violations and/or failure to promptly and properly remedy contract violations by the Purchaser pursuant to the terms of this Contract shall be grounds for termination of the Contract by the State.
2. If this Contract is terminated by the State, the Administrator shall immediately notify the Purchaser of the termination and the reasons for it by certified mail. Such notice shall describe in what respects the Contract has been breached, the means, if any, by which the breach can be remedied and the consequences of such termination. The Contract shall be terminated 18 days from the date the notice is mailed to the Purchaser at the address stated in this Contract.
3. Upon receipt of the notice of termination the Purchaser shall immediately cease all operations pursuant to and permitted by the contract until the termination is resolved as provided pursuant to this Section of the Contract, Section IV.B. TERMINATION.
4. The Purchaser has 18 days after mailing of the notice of termination within which to file with the State a notice of appeal for a hearing before the Board of Land Commissioners or its appointee. If a timely notice of appeal is filed, the Contract remains in effect until the decision of the Board, but any suspension order shall remain in effect in the interim. The Board or its appointee shall conduct an informal open hearing to determine whether the Contract should be reinstated.

TIMBER SALE CONTRACT

5. If the Contract is reinstated the Purchaser will not be penalized for any delays that resulted from the appeal.
6. If the Contract is terminated for breach and not reinstated, it is understood that the State may refuse to accept bids or proposals submitted under 77-5-212 MCA from the Purchaser on future State timber sales and permits for a minimum period of 2 years.

C. LIABILITY FOR DAMAGES:

1. The Purchaser shall be liable for any damages sustained by the State arising from Purchaser's breach of the terms of this Contract and the State may cause all or part of the performance bond to be forfeited to recover such damages.
2. In the event that a portion of the timber sale under this Contract is resold as a result of the Purchaser's forfeiture and the stumpage rate pursuant to the resold contract is lower than the stumpage rate provided herein, the difference between the original rate and the new rate shall be considered damages and the Purchaser shall be liable to the State for those damages. The State may cause all or part of the Purchaser's performance bond to be forfeited to recover such damages.

D. STATE'S OPTION TO COMPLETE CONTRACT REQUIREMENTS: If the Purchaser fails to complete the requirements described in this Contract in a timely manner or if the Contract is terminated pursuant to Section IV.B. TERMINATION, the State reserves the right to complete the work itself or through a contractor. The Purchaser will be billed for any additional costs incurred by the State due to the Purchaser's failure to perform the requirements of this Contract. These additional costs may include State employee time and expenses that were extraordinary to the normal administration of the contract, such as time and expenses incurred to hire a replacement contractor. Purchaser's failure to make payment within 14 days from the date of billing may cause all or part of the performance bond to be forfeited to recover such costs.

E. WAIVER OF PENALTIES: The penalties specified in this section shall be regarded as liquidated damages and may be waived or reduced at the discretion of the Administrator in exceptional cases.

F. FOREST PRACTICES LAWS: The Purchaser shall conduct logging operations in compliance with all laws relating to forest practices in the State of Montana. The Purchaser shall be responsible for all reclamation and penalties that result from violations of applicable forest practices laws.

G. LOGGING REQUIREMENT VIOLATIONS:

1. **HIGH STUMPS:** The Purchaser may be charged \$25.00 for each tree stump cut higher than 12 inches on the side adjacent to the highest ground except in unusual cases when this height is not considered practical.
2. **LONG BUTTS:** The Purchaser may be required to pay \$25.00 per long butt for cutting long butts that contain useable material in excess of the minimum net scale in percentage of gross shown in Table 2.
3. **LARGE TOPS:** The Purchaser may be required to pay for cutting tops larger than the Top Diameter Inside Bark (DIB) shown in Table 2. This charge will be at the current contract rate for the net volume by species, or \$25.00 per large top, whichever is greater.
4. **UNDESIGNATED TREES:**
 - a. Undesignated or reserve trees that are cut or damaged as a result of Purchaser's operations shall be considered cut in trespass and the Purchaser may be charged three times the highest Contract stumpage rate (minimum \$10.00/ton) for the Contract product class(es) the tree contains.

TIMBER SALE CONTRACT

- b. If the Forest Officer determines that a suitable replacement for a reserve tree as described above is not available, Purchaser agrees to pay the State \$500.00 per tree, in addition to the rates charged in Section IV.G.4.a. UNDESIGNATED TREES.
5. **FAILURE TO REMOVE:** The State may charge the Purchaser for trees that are designated for cutting under the terms of this contract and/or logs that meet the Manufacturing and Recovery Standards shown in Table 2 that are not removed from the sale area or presented for measurement. This charge may be up to triple the Contract stumpage rate plus the Forest Improvement rate for the class of material contained in those trees fixed in accordance with the terms of this Contract. If the State removes such material from the sale area, the Purchaser will be required to reimburse the State for all applicable cutting, yarding, processing, loading and hauling costs.
6. **LOSS IN WEIGHT DUE TO PURCHASER DELAY:** Up to a 15% increase in net weight of logs will be added by the State for loss in weight due to delay by the Purchaser in delivering cut logs to the manufacturing point. A delay is defined as in excess of 30 days after felling.

H. MEASUREMENT AND LOG ACCOUNTABILITY VIOLATIONS:

1. **MISSING LOAD TICKETS:** The Purchaser will be charged up to \$500.00 for each unused load ticket that the Purchaser has lost or misplaced while in his, her or its possession. An unused ticket is defined as a ticket that is not turned into the State with an associated truckload weight.
2. **FAILURE TO ATTACH OR COMPLETE LOAD TICKET:** The Purchaser may be charged \$500.00 per load for failure to attach a load ticket to each product load prior to hauling, or for failure to complete the load ticket with all required information.
3. **MISSING WEIGHT TICKETS:**
 - a. The Purchaser will be charged up to triple the Contract stumpage rate plus the Forest Improvement rate $[(\text{stumpage} + \text{FI}) \times 3 = \text{penalty}]$ for each truck weight ticket not furnished to the State.
 - b. The Forest Officer will notify the Purchaser of each missing weight ticket.
 - c. The load weight will be determined by averaging weights from other loads hauled by the Purchaser to the same mill within the same billing period, or 30 tons for single loads and 38 tons for loads with a pup trailer attached.
 - d. For Other Material, as defined by this Contract, the minimum stumpage for purposes of penalty shall be \$10.00 per ton or the Contract stumpage rate multiplied by 3, whichever is higher. The Forest Improvement fee is not included in Other Material penalties.
4. **IMPROPERLY LABELED PRODUCT:** The Purchaser may be charged \$500.00 per load for loads with an incorrect load ticket for the product (Sawlog or Other Material) in the load. In addition, the stumpage paid for an improperly ticketed load shall be at the highest Contract stumpage rate for products hauled pursuant to this Contract.
5. **IMPROPERLY MARKED LOADS:** The Purchaser may be charged \$40.00 per load for each load not marked in accordance with Section III.E. LOAD MARKING.

I. RESOURCE PROTECTION VIOLATIONS:

1. The Purchaser may be charged five hundred dollars (\$500.00) per piece of equipment determined to have entered sale area without Forest Officer inspection in accordance with VI.J. NOXIOUS WEED MANAGEMENT. This charge does not relieve the Purchaser from requirement VI.J. NOXIOUS WEED MANAGEMENT.

- J. FAILURE TO MEET COMPLETION DATES:** The Purchaser may be charged \$100.00 for each complete calendar day the Purchaser fails to meet the deadlines shown in Table 3 and Table B1.
- K. LATE PAYMENTS:** The Purchaser may be charged \$100.00 per day beginning the 15th day after the billing date for failure to pay for forest products, pursuant to Section II.B PAYMENTS.

V. FIRE PROTECTION

- A. FIRE REGULATIONS:** The Purchaser is required to conduct all operations in accordance with the Montana Forest Fire Regulations, Attachment C.
- B. FIRE PREVENTION:** During the time that this Contract remains in force, the Purchaser shall, to the greatest extent practicable, prevent forest fires on the area described in this Contract and in its vicinity, and shall require all employees, contractors and employees of contractors to do likewise.
- C. OPEN BURNING REQUIREMENTS:** The Purchaser is required to conduct any burning of slash or other debris in accordance with the Montana Department of Environmental Quality open burning restrictions. The Forest Officer must be notified prior to the start of any burning operations.
- D. FIRE SUPPRESSION:** Unless prevented by circumstances over which he, she or it has no control, the Purchaser shall place qualified employees, contractors and employees of contractors and all equipment at the disposal of any authorized State, County, or Federal Forest Officer for the purpose of fighting forest fires. Payment for such services shall be made at rates to be determined by the Forest Officer, which shall be within a range of payment rates shown in the Interagency Incident Business Management Handbook, NWCG Handbook 2. Any employees or equipment furnished by the Purchaser, contractors or employees of contractors, shall be relieved from fire fighting as soon as it is practicable for the Forest Officer to obtain other adequate labor or equipment.
- E. FIRE COSTS:** The costs borne by the State for suppressing fires that are intentionally lit by the Purchaser or that are caused by negligence or fault in the Purchaser's operations shall be paid by the Purchaser to the State. The Purchaser shall also be liable for property and resource damage resulting from these fires.
- F. FIRE REPORTING:** Any wildfires, which the Purchaser detects or suppresses, must be reported as soon as possible to the responsible fire protection agency and the Department.
- G. SUSPENSION OF OPERATIONS:** When fire danger reaches extreme levels that cause operations to be curtailed through Stage II, Hoot Owl requirements or other measures, the State may suspend operations until fire conditions in and/or around the sale area improve. The State will grant a contract extension to compensate for the time suspended.
- H. CONTACT INFORMATION:** The Purchaser will provide the Forest Officer with phone numbers of the Purchaser and their employees and contractors when logging operations are in progress (including nights and weekends), in order to establish contact if a wildfire occurs within the sale area or on other lands accessed by road systems associated with the sale.

VI. RESOURCE PROTECTION

- A. DAMAGE PREVENTION:** The Purchaser shall use reasonable skill and care in all operations to prevent damage to soils, trails, meadows, stream banks, stream channels, wetlands, lakeshores or other natural features of the sale area.
- B. STREAM PROTECTION:**
1. Construction and logging equipment will not be operated in Streamside Management Zones. An exception may be provided for through this Contract or the Forest Officer may grant written permission. Additional protection measures may be required in Section VII.G, SPECIAL OPERATING REQUIREMENTS and in Contract Attachments.
 2. The Purchaser shall notify the Forest Officer immediately if debris from logging or construction enters a stream or stream channel.
 3. The Purchaser shall remove any debris resulting from logging or construction operations, which may affect the natural flow of any streams traversing the sale area. This work will be completed in a manner that causes the least disturbance to the streams, as directed by the Forest Officer.
 4. Logs shall not be hauled, skidded or yarded across streams unless the logs are fully suspended, or otherwise yarded as specified in this Contract. The Forest Officer must approve all logging and construction plans, including changes, before implementation.
 5. All operations shall be conducted in a manner to comply with Montana Water Quality Standards, the Streamside Management Zone Law, and all applicable permits.
- C. CULTURAL RESOURCES:** If a cultural resource is discovered, the Purchaser shall immediately suspend all operations in the vicinity of the cultural resource and notify the Forest Officer. Operations may only resume if authorized by the Forest Officer. Cultural resources identified and protected elsewhere in this contract are exempted from this clause. Cultural resources, once discovered or identified, are not to be disturbed by the Purchaser, or his, her or its employees and/or sub-contractors.
- D. DISCOVERY OF THREATENED AND ENDANGERED SPECIES:**
1. If a specific habitat feature for a federally listed threatened or endangered species is encountered, the Purchaser shall suspend all operations in the vicinity of the observation or discovery and immediately notify the Forest Officer. Operations may resume only if authorized by the Forest Officer. Habitat features identified and protected elsewhere in this contract are exempted from this clause.
 2. If a federally listed threatened or endangered species is encountered, the Purchaser shall immediately notify the Forest Officer. The Purchaser may be required to suspend operations in the vicinity of the observation or discovery. If suspended, operations may resume only if authorized by the Forest Officer.
- E. SANITATION:** The Purchaser's operations, as described by this contract, shall comply with all applicable State laws, rules and regulations concerning sanitation in operations. Refuse resulting from the Purchaser's activities, including the use, servicing, repair, or abandonment of equipment, shall be removed, buried or otherwise disposed of in a manner that complies with all State laws and meets the approval of the Forest Officer. The Purchaser shall not service tractors, trucks and similar pieces of equipment on lands that directly drain into or are within 100 feet of lakes, streams or recreational facilities. No logging camp will be located on the gross sale area without prior approval by the Forest Officer.

TIMBER SALE CONTRACT

- F. HAZARDOUS SUBSTANCES:** In addition to the indemnification provided in Section I.W.2. INDEMNITY AND LIABILITY, with respect to Hazardous Substances, the following duties shall apply:
1. The Purchaser shall know and comply with regulations governing the storage, handling, application, disposal, and reporting of pesticides, herbicides, containers, biological waste, petroleum products, dust abatement compounds, and other hazardous substances. The Purchaser shall obtain the approval of the Forest Officer to store, handle, apply or dispose of these substances on State land.
 2. The Purchaser shall not transport, handle, store, load, apply, or dispose of any hazardous substance in such a manner as to pollute water supplies or waterways, or cause damage or injury to people, land, desirable plants, and animals.
- G. PROTECTION OF IMPROVEMENTS:** The Purchaser shall to the greatest extent practicable protect from damage all gates, signs, telephone lines, power lines, fences, irrigation ditches, cattle guards, drainage structures, road improvements, and any other improvements or infrastructure within the gross sale area and/or along haul routes. Damages caused by the Purchaser, his, her or its employees or subcontractors, and expenses associated with the repair or replacement of damaged structures and improvements are the sole responsibility of the Purchaser.
- H. PROPERTY CORNER RESTORATION:** The Purchaser is required to replace any General Land Office township, section, quarter or meander corners, monuments or witness trees on or adjacent to the timber sale area which may have been moved, disturbed or lost, as a result of the Purchaser's logging or construction operations. Any necessary replacements must be carried out by a licensed surveyor at the Purchaser's expense.
- I. PASSABLE ROADS:** The Purchaser will leave all roads and trails free from obstruction by logs, brush or debris following the completion of logging operations. Temporary or permanent obstructions may be acceptable if approved by the Forest Officer.
- J. NOXIOUS WEED MANAGEMENT:** All equipment used in road construction and off-road logging activity must be pressure-washed by the Purchaser and inspected by the Forest Officer prior to entering the sale area. This cleaning will remove all dirt, plant parts, and material that may carry noxious weed seeds into the sale area. Other equipment and vehicles entering and leaving the sale area shall be cleaned prior to start up and kept reasonably clean during the course of operations. All subsequent move-ins of logging and construction equipment shall be treated the same as the initial move-in.
- K. WILDLIFE PROTECTION:**
1. The Purchaser is authorized to enter areas closed by gates, barricades or berms with motorized vehicles only for the purposes related to the performance of this contract. Motorized vehicle entry for purposes other than contract performance, such as hunting or transporting game animals will be considered trespass and prosecuted to the fullest extent of the law (Montana Code Annotated § 45-6-203).
 2. The Purchaser is prohibited from carrying firearms while conducting contract operations [ARM 36.11.432(1)(m); 36.11.433(1)(d); 36.11.443(2)].
 3. The Purchaser will store human or pet food, livestock food, garbage, and other attractants in a bear-resistant manner.
 4. The Purchaser will not bury or discard attractants in the sale area, or burn attractants (such as food leftovers) in an open campfire.
 5. The Purchaser will provide each employee with a copy of Attachment D "Working in Bear Habitat" Brochure.

VII. LOGGING

A. TREES DESIGNATED FOR CUTTING: All trees meeting the following requirements must be cut by the Purchaser.

1. **TREES IN UNITS:** Trees that meet the Minimum Log Size of Trees Designated for Cutting in Table 2 are to be cut in each unit according to the Marking specifications shown in Section VII.F. UNIT DESIGNATIONS.
2. **RIGHT-OF-WAY TREES:** All trees within road right-of-way boundaries must be cut.
3. **DAMAGED TREES:** Reserved trees, which are root-cut, damaged by felling or skidding, uprooted or broken off by the Purchasers operations may be designated for cutting by the Forest Officer. The Forest Officer may mark additional reserve trees to replace those that have been cut or damaged.
4. **FIRE KILL, INSECT INFESTATIONS AND WIND THROWN:** The Purchaser may be required to cut and remove at current contract rates, fire-killed, high hazard, disease infected, insect-infested or wind thrown (defined as blown down or wind-damaged to the extent that the tree is expected to fall or is dying) trees that occur in any part of the gross sale area while this Contract is in effect, if the Forest Officer determines that the stumpage value per ton of the additional timber is approximately equal to the value of the timber being harvested under this Contract .

B. TREES RESERVED FROM CUTTING:

1. **LEAVE TREES:** Trees, both live and dead, marked to leave or otherwise described to leave are reserved from cutting. Any trees not specifically required to be cut are reserved from cutting.
2. **BOUNDARY AND BEARING TREES:** Trees marking the boundaries of ownership, logging units, equipment restriction zones, streamside management zones, road rights-of-way, and bearing trees, are reserved from cutting unless otherwise designated by this contract or by the Forest Officer.
3. **VALID CLAIMS:** Timber to which there exists a claim under valid contracts with the State of Montana is exempted from this sale.

C. LOG MANUFACTURING AND RECOVERY STANDARDS:

1. **SAWLOG STANDARDS:** Trees cut by the Purchaser shall be manufactured to secure the maximum utilization of forest products according to III.G.1. All logs that meet or exceed the Manufacturing and Recovery Standards in Table 2 and this section shall be skidded to landings and hauled by the Purchaser.
 - a. Logs shall be bucked to utilize the entire length of the tree to the top diameter specified under Manufacturing and Recovery Standards in Table 2.
 - b. Logs meeting utilization specifications in Table 2 shall be manufactured in such a manner as to minimize waste during bucking operations.
 - c. A tree or log larger than 5.6" top DIB is considered to be a sawlog if it contains Scribner Decimal C Net Scale $\geq 33\%$ of Gross.
2. **OTHER MATERIAL:** The Purchaser may elect to remove other material that does not meet Sawlog Manufacturing and Recovery Standards in Table 2, only if approved by the Forest Officer. Such products shall be billed at the rate for other material shown in Table 1.
 - a. All contract provisions apply to the removal of Other Material.

TIMBER SALE CONTRACT

- b. Other Material that has been manufactured by the Purchaser shall be decked and hauled separately from sawlogs. All decked non-sawlog material must be hauled, or disposed of by the Purchaser in accordance with instructions of the Forest Officer. All hauled loads will have a truck ticket assigned and will meet the specifications in Section III, MEASUREMENT AND LOG ACCOUNTABILITY.
 - c. Butt cut logs (the first log cut above the stump) that meet LOG MANUFACTURING AND RECOVERY STANDARDS in Table 2, but do not meet TREES DESIGNATED FOR CUTTING minimum top DIB and length, may be considered as Other Material, not sawlogs.
3. DOWN WOODY MATERIAL: **5 to 15** tons per acre of downed woody material larger than 3 inches in diameter shall be left scattered throughout the sale units. The Forest Officer will determine the appropriate amount of material and may designate pieces to be left for this purpose that would otherwise be skidded and hauled under Sections VII.C.1 or VII.C.2, LOG MANUFACTURING AND RECOVERY STANDARDS.
 4. NUTRIENT RETENTION: Removal from the site of fine branches and leafy material shall be minimized.
 5. SNAGS: The Purchaser will retain a minimum of **2** snags per acre and **2** recruitment trees per acre that are >21 inches dbh within each harvest unit unless superseded by Section VII.F, UNIT DESIGNATIONS. If snags and recruitment trees of this size class are not available, the next largest available size class shall be retained. If snags present human safety concerns, the Purchaser may substitute snag recruits for snags upon approval of the Forest Officer. Snags cut for safety purposes shall remain in the unit.

TABLE 2.					
PRODUCT	TREES DESIGNATED FOR CUTTING		SAWLOG MANUFACTURING AND RECOVERY STANDARDS		
	The Purchaser must fell all trees marked or designated for cutting that contain a log of this minimum size.		The Purchaser must skid and haul all logs that meet this minimum specification.		
	Top DIB	Length	Top DIB	Length	Sawlogs meeting standards in Section VII.C.1.b through c
Sawlogs	5.6"	16.5'	5.6"- 8.5" 8.6"+	10.5' 8.5'	

D. TREE AND BOUNDARY MARKING:

1. TREES MARKED TO LEAVE:horizontal **BLUE** paint mark at Diameter Breast Height (DBH).
2. TREES MARKED TO CUT: horizontal **ORANGE** paint mark at DBH.
3. HARVEST UNIT BOUNDARIES: **BLUE** flagging.
4. PROPERTY BOUNDARIES: three horizontal **RED** paint stripes facing into the unit and **RED** flagging.
5. STREAM/WETLAND MANAGEMENT ZONES: two **ORANGE** painted X's and flagging stenciled with "**STREAMSIDE MANAGEMENT ZONE**".
6. TREES MARKED TO CUT IN SMZ: horizontal **ORANGE** paint mark at DBH.

TIMBER SALE CONTRACT

E. HARVEST SCHEDULE: The Purchaser must cut and remove trees from the sale or portions of the sale, such as units, by the dates shown on the HARVEST COMPLETION SCHEDULE, Table 3:

TABLE 3. HARVEST COMPLETION SCHEDULE		
Priority	Unit or Portion of Sale	Completion Date
1	All Harvest Units	October 1, 2029

F. UNIT DESIGNATIONS: The following requirements are to be performed by the Purchaser in the harvest units listed below and as shown on the sale map, Attachment A. Paragraph headings refer to paragraphs listed in Section VII.G, SPECIAL OPERATING REQUIREMENTS.

HARVEST UNIT NUMBER(S)	ACRES	ESTIMATED VOLUME (Tons)
1601, 3002, 3603, 3604, 2601, 2401	517	14,098
YARDING METHOD: Skyline Yarding OR Tethered logging System Units 1601, 2601, and 3604 have small segments of Tractor ground		
MARKING: Trees designated for harvest are <u>not</u> marked. Purchaser will select cut and leave trees based on the following criteria:		
<ul style="list-style-type: none"> • Ponderosa pine <18" DBH with <30% crown, forked or dead tops are to be cut, all other ponderosa pine will be left. • All Douglas-fir, lodgepole pine, Engelmann spruce and grand fir that contains a merchantable sawlog should be cut. • Western larch maintain a maximum spacing 100 feet between western larch or ponderosa pine leave trees. If present, this will leave approximately 4 western larch leave trees per acre. • If present, retain an additional 2 trees/acre: Live with good wildlife characteristics ponderosa pine and western larch >21" DBH and retain 2 dead trees/acre >21" DBH with good wildlife characteristics. • If needed, the Forest Officer can leave tree mark small areas for reference to display the cutting prescription. • Cut trees in the SMZ are marked in orange. 		
OPERATING PERIOD: Year-round when soil conditions allow (Section VII.L.1&2)		
SPECIAL OPERATING REQUIREMENTS: 1. SMZ AND WETLAND MAY BE PRESENT (No SMZ in Unit 3603) 2. ALTERNATE YARDING SYSTEMS MAY BE APPROVED 3. SLASHING OF LOGGING-DAMAGED SUB-MERCHANTABLE TREES 4. PURCHASER LOPPING REQUIRED		

TIMBER SALE CONTRACT

<p>SPECIAL OPERATING REQUIREMENTS:</p> <p>1. SMZ AND WETLAND PRESENT (No SMZ in Unit 1602)</p> <p>3. SLASHING OF LOGGING-DAMAGED SUB-MERCHANTABLE TREES</p> <p>4. PURCHASER LOPPING REQUIRED</p>		

G. SPECIAL OPERATING REQUIREMENTS:

1. **SMZ AND WMZ PRESENT IN UNITS:** Equipment is prohibited from operating in areas designated as Stream Management Zone (SMZ) and Wetland Management Zone (WMZ). Slash will not be piled or pushed into these areas. All slash will need to be removed between the ordinary high water marks of a stream or wetland as marked on the ground. Designated crossings, if needed, must be approved by the Forest Officer.
2. **ALTERNATE YARDING SYSTEMS MAY BE APPROVED:** The Forest Officer may approve alternative yarding methods besides those specified for each sale unit. An alternative system proposed by the Purchaser must be approved by the Forest Officer at or before the time the Logging Operations Plan for the unit is approved. The Forest Officer will only approve alternatives that are consistent with planned mitigation and resource protection measures. Alternatives may include tethered equipment or other systems. Costs of alternative systems will be borne by the Purchaser.
3. **SLASHING OF LOGGING-DAMAGED SUB-MERCHANTABLE TREES REQUIRED:** The purchaser shall fell all sub-merchantable trees with logging-related root or stem damage causing lean. Maximum stump height shall not be greater than 12 inches on the uphill side.
4. **PURCHASER LOPPING REQUIRED:** Purchaser shall buck and delimb all logging slash as required to reduce main stems to within 12 inches of the ground from bottom side, and reduce total slash depth, including branches, to within 18 inches of the ground.

H. LOGGING OPERATIONS PLAN: The Forest Officer shall approve a plan for felling, yarding, and landing logs (both Sawlogs and Other Material) in each harvest unit prior to the start of operations in that unit.

I. SKID TRAIL LAYOUT AND YARDING PLAN: The Purchaser must follow these requirements along with those shown under VII.G. SPECIAL OPERATING REQUIREMENTS when developing a yarding plan for each unit. The Forest Officer may approve exceptions to these requirements in writing.

1. The Purchaser shall lay out skid trails and have locations approved by the Forest Officer prior to felling trees.
2. All skid trails will be located within the harvest unit boundaries.
3. Any constructed skid trails shall be completed and approved by the Forest Officer prior to felling timber.
4. Skid trails will not be located in draws, and may only cross draws at locations flagged and approved by the Forest Officer.

J. LANDINGS AND LOG DECKS:

1. The Purchaser shall construct landings at locations approved by the Forest Officer prior to felling timber.
2. Landings shall be kept to the minimum size necessary to allow the safe handling of logs. The Forest Officer must approve landing size.
3. All deck locations shall be approved by the Forest Officer prior to clearing or use. Decks shall be located so as to minimize the number of trees cut for construction of the deck area.

K. FELLING:

1. In each harvest unit, a felling pattern shall be used which conforms to the logging operations plan and causes the least damage to reserve trees and other resources.
2. Felling shall be systematic and continuous to avoid lost logs and minimize the number of skidding trips.
3. Trees shall be directionally felled away from features requiring protection within or adjacent to harvest units. Features requiring protection include streams, meadows, wet areas, and areas specified under Section VII.F. UNIT DESIGNATIONS. Wedges, jacks, winches, or other special equipment may be required to direct trees when felling. Trees falling into protection areas shall be winch-line skidded out of protected features. All necessary mitigation for damage caused by improper and/or non-approved felling into a protected zone is the responsibility of the Purchaser. The Forest Officer must approve all mitigation work.
4. Traffic Control Required For Felling along Roads: If felling operations occur along public roads, traffic guards with "STOP" signs shall be posted 500 feet in both directions from the units on open roads, providing a safety zone to warn oncoming traffic that logging operations are in progress. All traffic shall be stopped when tree felling is in progress. Traffic stops should not exceed 15 minutes at any one time. All saws will be shut off when traffic is moving through the safety zone. Wedges and/or jacks shall be used to ensure trees do not fall onto the roadway. In the event a tree falls across the roadway, all debris shall be removed immediately from the roadway and right-of-way. The Forest Officer must approve any extended road closures for logging operations.

L. YARDING AND MECHANICAL FELLING: The Purchaser must follow these requirements during logging operations, along with those shown under Section VII.G. SPECIAL OPERATING REQUIREMENTS. The Forest Officer will determine when restrictive conditions apply, and may approve exceptions to these requirements in writing.

1. Soil Compaction Restrictions: In order to prevent soil resource impacts, ground-based mechanical felling and yarding are restricted to periods when one or more of the following conditions occur:
 - a. Soil moisture content at 4-inch depth less than 20% oven-dry weight.
 - b. Minimum frost depth of 4 inches.
 - c. Minimum snow depth of 18 inches, loose, or 12 inches, packed.
2. Suspended Operations for Soil Compaction and Displacement: The Purchaser will be required to restrict or suspend logging operations when soils are subject to compaction or displacement by heavy equipment.
3. Equipment Restrictions:
 - a. Equipment shall not be operated in areas designated as EQUIPMENT RESTRICTION ZONES, WETLAND MANAGEMENT ZONES or STREAMSIDE MANAGEMENT ZONES as shown in Section VII.D.6 and 7, unless authorized by this Contract or the Forest Officer.
 - b. Equipment shall not be operated in soft soils, boggy areas or areas where skidding would cause excessive compaction and displacement.
 - c. Any trees designated for harvest within such zones shall be winchline skidded to skid trails outside the zone.
 - d. Slash will not be piled in or pushed into these zones.

- e. The Forest Officer must approve any designated crossings of restricted areas.
 4. Protection of Reserved Trees: The Purchaser shall exercise reasonable care to prevent damage to trees reserved from cutting during logging operations.
- M. CLEAN-UP AND COMPLETION:** The Purchaser must follow these requirements and those shown under Section VII.G. SPECIAL OPERATING REQUIREMENTS during logging operations. The Forest Officer will determine when restrictive conditions apply, specifications and dates to meet these requirements and may approve exceptions in writing. The Forest Officer must approve all designated work prior to the removal of Purchaser's equipment.
1. Logging Debris Confined To Units: All debris from logging shall be confined within the harvest unit boundaries. Any logging debris outside a harvest unit must be returned to within the unit boundary.
 2. Skidding Debris on Roads: The Purchaser shall remove logging slash remaining on any portion of a road cutbank or traveled way. Cut and fill slopes, ditches, or road surfaces damaged by skidding operations shall be restored to original conditions. Reseeding is required if vegetation is damaged by skidding.
 3. Repair of Improvements: Damage caused by the Purchaser's operations to culverts, waterlines, fences, roads, bridges, gates, cattleguards, signs, and all other improvements must be adequately repaired or replaced.
 4. Erosion Control:
 - a. The Purchaser shall construct slash and debris erosion barriers, dips, water bars or ditches in skid trails and landings as directed by the Forest Officer.
 - b. The kinds and frequency of erosion control structures shall be adjusted to soil types, topography and climatic conditions as directed by the Forest Officer.
 - c. The Purchaser is required to recontour any excavated skid trails, and provide for effective erosion control in the trail location as directed by the Forest Officer.
 - d. Erosion control work shall commence as soon as skidding is completed on each skid trail or landing, and must be kept current with unit operations.
 - e. Erosion control work shall be completed and approved by the Forest Officer in unfinished units before operations cease for inactive periods including heavy winter snowfall, spring breakup and restricted dates.
 - f. All erosion control work in each unit shall be completed prior to notification pursuant to Section VII.M.7. Acceptance of Completed Harvest Units.
 - g. The Purchaser shall maintain erosion control structures in active sale areas throughout the contract period or extensions thereof.
 5. Landing and Decking Area Cleanup: The Purchaser is required to pile logging residues on landings and log-decking areas. Proper equipment (e.g. brush blade, log loader) shall be used to ensure that no dirt is incorporated into the piles. Mechanical scarification of landing and decking areas may be required. Where logs have been decked on the downhill or fill side of a road, the Purchaser may be required to pile residue with a log loader or by hand. Residue piles shall be a minimum of 15 feet away from any live trees. Piles shall be located and constructed as directed by the Forest Officer.

TIMBER SALE CONTRACT

6. Systematic Harvest Unit Operations: When harvest operations are begun on a designated harvest unit, the harvest operations on that unit shall be fully completed before cutting may begin on other harvest units.
 7. Acceptance of Completed Harvest Units: The Forest Officer will notify the Purchaser in writing when all contract requirements for each specified harvest unit or area have been met. After notice has been received, the Purchaser is not required to do additional work on the specified area except as provided in Section VII.A.4. FIRE KILL, INSECT INFESTATION, AND WIND THROWN.
- N. HAULING RESTRICTIONS:** The Purchaser will be required to restrict or suspend hauling during periods when the compacted road surface would be damaged, as directed by the Forest Officer. Restrictions are required when hauling would cause rutting into the subgrade, or surfacing materials would be displaced, such as during heavy rainfall or spring breakup freezing and thawing cycles
- O. LOGGING OPERATIONS SAFETY SIGNS:** Road signs warning of logging and road construction operations shall be posted 500 feet from the operations. When log hauling is in progress, warning signs shall be posted at major road junctions as directed by the Forest Officer. Warning signs must comply with specifications in the Manual on Uniform Traffic Control Devices.

ROAD CONSTRUCTION, IMPROVEMENT AND MAINTENANCE SPECIFICATIONS	
SALE NAME Lion Point	SALE NUMBER

I. CONSTRUCTION REQUIREMENTS

A. ROADS: The Purchaser is required to construct the roads shown in Table B-1 per the schedules stated, as shown on the Sale Map, Attachment A, and to the specifications and drawings in Attachment B and other applicable attachments.

TABLE B-1. ROAD CONSTRUCTION REQUIREMENTS				
Road Name	Approximate Length (miles)	Type of Construction	Operation Period	Completion Date or Requirement
USFS 343	9.50	Maintenance	Dry, non-frozen conditions	Prior to hauling
USFS 7724	0.85			
USFS 7750	1.42			
USFS 341	2.10			
Talus	0.21	New Construction	Dry, non-frozen conditions	March 1, 2029
Fir	0.61			
North	0.93			
Lookout (FWP)	2.07	Maintenance/ Reconstruction		
Bench	3.33			
Point B (FWP)	4.77			
Lookout B	0.46	Maintenance		
Gate Road (FWP)	1.83			
Grand Fir	0.29 Mile	Temporary (Optional)

B. ROAD CONSTRUCTION MATERIALS ESTIMATE:

TABLE B-2: MATERIALS FURNISHED AND INSTALLED BY THE PURCHASER:					
The Purchaser is required to furnish the described material and install as required in Attachment B. Quantities are estimated, and the Attachment B requirements and specifications must be met regardless of the estimated amounts. All materials furnished by the Purchaser become the property of the State when installed. If, due to a minor design change, material is not installed, the material will be delivered to the nearest DNRC Unit Office and become property of the State upon delivery.					
Corrugated Metal Pipe				Other Materials	
Type	Dia.	Length	Gauge	Amount	Description
CMP Ruben Road/new install.	18"	25'	16	4	Bridge deck running boards MP 7.94 USFF 7750 Road

Yards	Type			Delivery Location	
120	Native fill material locations found when building new road or approved areas from the Forest Officer.			As Needed See VIII.ROAD LOG AND SITE DESCRIPTIONS for specific locations	

TABLE B-2 (CONTINUED): SEED AND FERTILIZER REQUIREMENTS			
The Purchaser is required to furnish and apply certified noxious weed-free, pure live seed mixture(s) and fertilizer in the amounts shown. Total pounds mixed seed are pure live seed, corrected for germination and purity. Germination and purity tests must have been conducted within the last 12 months prior to delivery. Purchaser shall furnish documentation of germination and purity tests to the Forest Officer prior to application.			
Certified Noxious Weed-Free Seed			Fertilizer
DNRC ROADS			Pounds
Pounds	Description		N/A

TABLE B-2 (Continued): MATERIALS FURNISHED BY THE PURCHASER FOR DELIVERY:	
The Purchaser is required to furnish the described material, to be delivered and unloaded by the Purchaser at the DNRC Unit name Unit office, address or location. Materials shall be delivered before date. All materials furnished by the Purchaser become the property of the State when delivered.	
Amount	Description and Specifications
	N/A

C. MINOR CHANGES: The Forest Officer may require minor changes in location, design or specifications of road construction, improvement or maintenance requirements. Such changes must be within the scope of Attachment B requirements, and must not result in a significant (one thousand dollars [\$1,000.00] or greater) increase or decrease in cost as agreed to by the Forest Officer and the Purchaser.

D. ADJUSTMENT FOR CHANGE IN REQUIREMENTS: If the State requests a change in road construction, improvement or maintenance specifications and the State in its discretion determines that the change would significantly increase the cost to the Purchaser, then the State must compensate the Purchaser. If the Purchaser requests a change in road construction, improvement or maintenance specifications and the State in its discretion determines that the change is acceptable and would significantly reduce the cost to the Purchaser, then the Purchaser must compensate the State. Compensation to the Purchaser will be in the form of stumpage credit. Compensation to the State will be in cash and will be billed as a supplement to the stumpage bill. All significant changes and compensation will be described in a contract modification.

II. RIGHT-OF-WAY CLEARING

A. CLEAR LIMIT DEFINITIONS are shown in Section IX. SPECIFICATIONS AND DRAWINGS.

B. CLEAR LIMIT MARKING:

1. Clear limits for existing roads are marked N/A.
2. Clear limits for all new construction will be marked by the Forest Officer if requested.
3. Centerline is marked with one orange dot and pink flagging.

C. CLEARING REQUIREMENTS:

1. Brush or trees on existing roads may be removed by sawing individual stems, cutting with a rotary brush cutter, uprooting with an excavator or other methods approved by the Forest Officer.
2. Inside the clear limits, but outside the road prism, trees and brush less than 20 feet tall and less than 3 inches in diameter that do not interfere with visibility or slope stability may be left as directed by the Forest Officer.
3. All merchantable timber within the clear limits on all roads to be constructed under the terms of this Contract shall be cut to the specifications in the timber sale contract and skidded to decks, or decked with an excavator, prior to earth moving.
4. Clearing procedures shall protect residual stands, prevent incorporation of construction slash into the road prism, and protect roadside appearance outside clear limits.
5. Grubbing will be limited to only those stumps and large roots within the road prism.

III. TREATMENT OF RIGHT-OF-WAY CLEARING MATERIALS

A. GENERAL TREATMENT REQUIREMENTS:

1. Road construction slash more than 3 inches in diameter and 6 feet long and all concentrations of slash which would adversely affect the stability of the road shall be disposed of by the methods described in this section.
1. Slash and debris shall not be placed in drainages, roadside ditches or heads of culverts where the flow of water may be obstructed and shall be removed if placed therein.
3. Lopping and scattering is defined as delimiting and sawing slash materials into lengths which will easily scatter to a maximum depth of 18 inches. Materials shall be scattered outside the road prism.
4. All slash to be disposed of by piling and burning shall be piled at locations approved by the Forest Officer. Construction of piles will be of such size and at a sufficient distance from trees so that burning does not result in unnecessary damage to remaining trees. The Purchaser may be required to remove any trees damaged by burning operations at current contract rates. If burning is incomplete the residue must be disposed of as directed by the Forest Officer.

B. SIDESLOPES OF 35% OR LESS AND EXISTING ROADS:

1. Disposal will be by hand or machine piling for burning as directed by the Forest Officer.
2. Minor concentrations of slash or individual trees may be disposed of outside of the road prism by lopping and scattering as directed by the Forest Officer.
3. Tree stumps, large boulders and cull logs may be scattered outside the road right-of-way clear limits if approved in writing by the Forest Officer. Scattered stumps and boulders shall be placed away from trees and positioned so they will not roll.

C. SIDESLOPES OF 35% AND GREATER:

1. Treatment will be by excavator only, or by whole tree skidding to a decking area.
2. Where topography and timber types permit, piling for burning will be required as directed by the Forest Officer.
3. Where piling is not practical, treatment will be by windrowing at the toe of the fill. Slash will be windrowed on a trail constructed at the bottom of the right-of-way. Slash will be trampled and covered with organic surface material taken from the road prism as directed by the Forest Officer. Fill material may butt up against but not cover or bury the windrow.
4. Minor concentrations of slash or individual trees may be disposed of by lopping and scattering as directed by the Forest Officer.
5. Tree stumps, large boulders and cull logs may be scattered outside the road right-of-way clear limits if approved in writing by the Forest Officer. Scattered stumps and boulders shall be placed away from trees and positioned so they will not roll.

IV. EXCAVATION AND EMBANKMENT OF FILL MATERIALS

A. EXCAVATION OF ROAD CROSS SECTION:

1. All grubbing and clearing shall be completed prior to the beginning of any excavation.

2. Surface organic layer and ash cap (surface reddish-brown soils with low gravel content) will be bladed to the side of the road and not incorporated into fills.
3. Wasted soils and organic layer will be shaped and spread to natural contours at locations approved by the Forest Officer.
4. When excavating on tangents and when balanced section construction is indicated, the following table will be used as a guideline to determine if sufficient excavation of road solid has occurred. Tolerances for road solid will be +1.0 feet and -0.5 feet.

TABLE B-3: EXCAVATION OF ROAD SOLID			
SIDESLOPE PERCENT	ROAD WIDTH		
	12 FT.	14 FT.	16 FT.
	FEET OF ROAD SOLID		
5	8.7	10.1	11.4
10	8.8	10.2	11.5
15	8.9	10.2	11.6
20	8.3	9.5	10.8
25	7.8	8.9	10.1
30	7.6	8.9	10.1
35	7.8	9.0	10.2
40	8.1	9.2	10.6
45	8.5	9.4	11.0
50	8.8	9.8	11.6
55	9.4	10.2	12.2
60	10.1	11.7	13.3
65 & over	12.0	14.0	16.0

B. EMBANKMENT OF FILL MATERIALS:

1. Fill materials shall be unfrozen and free of snow and ice.
2. Fill materials shall be sorted to remove large rocks over 6 inches in diameter near the surface, which may interfere with surface blading.
3. Where possible all fill materials shall be applied in layers not to exceed 18 inches and each layer compacted with heavy equipment prior to application of the next layer.
4. If fill materials are too dry to allow compaction, the Forest Officer may require watering of layers followed by heavy equipment compaction.
5. Gravel used for surfacing shall be compacted into place using loaded dump trucks or a vibratory drum roller if specified in the Road Log.

C. PIT DEVELOPMENT AND RECLAMATION:

1. While the gravel pit or borrow area is open the surface of the pit shall be kept clean of noxious weeds. The Purchaser shall remove any weeds found growing at the pit by pulling, cultivating, covering with plastic, spraying, or other methods as directed by the Forest Officer.
2. At completion of use, the pit area will be reshaped to as near natural contours as possible.

Backslope ratios shall not exceed 3:1. Purchaser may be required to save topsoil, recontour the pit wall, and reclaim the disturbed portion of pit. All disturbed portions of the pit shall be grass seeded and fertilized.

3. At completion of use, talus slopes shall be backsloped and reshaped as directed by the Forest Officer. Grass seeding and fertilizing are required on any disturbed areas with exposed soil.

V. DRAINAGE STRUCTURES

A. CORRUGATED METAL PIPE: The corrugated metal pipe required in Table B-2 will be installed as follows:

1. All pipes shall be installed with a backhoe or excavator. The exact locations shall be determined and approved by the Forest Officer after the right-of-way is brushed and cleared.
2. The excavation trench for culvert installation shall not be wider than necessary to permit satisfactory jointing and thorough tamping of the bedding material under and around the pipe.
3. The bedding surface shall be constructed to provide a firm foundation of uniform density through the entire length of the culvert and shall be slightly cambered along the centerline to correct for expected settlement.
4. Where the bedding surface is not firm at the grade established, all unstable soil under the pipe and for a width of at least one diameter on each side of the pipe shall be removed and replaced with suitable selected material. Rock encountered in the bedding foundation will be removed to at least 12 inches below the bottom of the pipe and one diameter on each side. The final bedding area shall consist of fine, compacted granular material.
5. Selected material shall be placed alongside the pipe for backfill in alternating layers not exceeding six inches in depth and thoroughly compacted by a hand held mechanical tamper (wacker packer). Special care must be taken to compact the fill thoroughly under the haunches of the pipe. Wacker packer compaction of backfill must be done for a horizontal distance on each side of the pipe equal to either one pipe diameter or to the outside limits of the trench, whichever is less. The depth of wacker packer compaction must extend at least to the top of the pipe.
6. Selected native fill material will be free from rocks and hard earth clods larger than 3 inches in size. Frozen material, sod or a high percentage of organic matter is not permitted.
7. The remainder of the fill above the top of the pipe may be compacted by tractor or rubber-tired roller. Fill is to extend above each pipe at least one-half the pipe diameter or a minimum of 12 inches, whichever is greater.
8. The pipe shall be protected by adequate fill cover before heavy equipment is permitted to cross during roadway construction.
9. Pipe that is damaged or improperly installed shall be repaired or replaced at Purchaser expense as directed by the Forest Officer.
10. The Forest Officer must be contacted two days before any culvert installation and must be present at any wet site culvert installation.
11. Riprap consisting of angular native rock of graded sizes 6 to 12 inches in diameter shall be installed to armor cuts and fills at both ends of all culverts installed in streams.
12. Energy dissipators consisting of native rock at least 24 inches in diameter with flat cross section shall be installed below culvert outlets in all perennial streams.

B. WET SITE CULVERT INSTALLATION REQUIREMENTS:

1. The Forest Officer and the Purchaser shall agree upon a site specific sediment and erosion control plan that meets the requirements of all attachments and permits for each wet installation prior to any construction. Sediment and erosion control features may include any or all of the following at each site:
 - a. Filter Fabric Sediment Traps.
 - b. Sediment Control Fence.
 - c. Slash Filter Windrows.
 - d. Other measures as directed by Forest Officer.
2. The Forest Officer and the Purchaser shall agree upon a site specific water diversion plan for each wet installation. Diversions may include: by-pass ditches, plastic lined by-pass ditches, plastic or metal pipe by-passes or other methods as directed by the Forest Officer. Pumping with discharge back into the channel is not permitted.
3. All wet site culvert installations require seeding of all disturbed areas with Quick Cover Mix the same day as installation is completed.
4. Any equipment operated within the high-water level of any stream or river channel shall be free of oil and fluid leaks and shall be clean of mud. Said equipment must be inspected by the Forest Officer and approved prior to any use.
5. Filter fabric sediment traps shall be installed prior to any construction activities on all wet culvert installations.

VI. ROAD MAINTENANCE

A. ROAD MAINTENANCE SCHEDULE AND REQUIREMENTS:

1. Road maintenance may be required on all native material or gravel roads designated for hauling purposes.
2. Road maintenance is defined to include all operations listed under Section VI. of Attachment B.
3. Initial maintenance of the roads shall be completed prior to use for logging and hauling.
4. The Forest Officer will determine the number, type, extent and frequency of intermediate maintenance operations. Road maintenance shall be repeated as needed to facilitate traffic and proper road drainage. The Purchaser will be advised of the time limitations to complete each maintenance project.
5. Final maintenance of the road system is required after all logging and hauling and prior to termination of the Timber Sale Contract.

B. SURFACE BLADING:

1. Description: Surface blading is keeping a native or aggregate roadbed in a condition to facilitate traffic and provide proper drainage. It includes maintaining the crown or slope, shoulder, drainage dips, leadoff ditches, berms and turnouts, and provides a level of smoothness appropriate for the amount and kind of traffic served and consistent with existing surfacing.

2. Specifications:

- a. The existing roadbeds, including turnouts, shall be bladed and shaped to reasonably conform to the designed cross section, and to eliminate ruts. Existing aggregate surfacing shall be bladed to conserve material and to prevent segregation of particle sizes. Rocks or other material remaining on the traveled way surface after final blading which are 4 inches or larger in size shall be removed from the road surface.
- b. Roadside cutslopes should not be undercut when cleaning ditches or removing road sloughs. Berms shall be removed from road shoulders when blading, except where berms are located as part of road design.
- c. Cutslopes that have been undercut may require backsloping, seeding and fertilizing.
- d. At intersections, the roadbeds at side roads shall be graded for a reasonable distance to assure proper blending of the two riding surfaces.
- e. Drainage dips and leadoff ditches shall be cleaned and graded to form their previous line and grade.
- f. Crowned roads should slope towards shoulders at least 2-5% (1/4-1/2 inch per foot road width) on native and gravel roads.
- g. At intersections where side roads enter the main road and the entering side road exceeds +3%, shallow ditching across the side road may be required to divert surface runoff and protect the main road's stability.
- h. The side-casting of road material into a stream, lake, wetland, or other body of water during road maintenance operations is prohibited in the SMZ.

C. DITCH CLEANING:

- 1. Description: Ditch cleaning is removing and disposing of all foreign and slough material from roadside ditches to provide an unobstructed waterway conforming reasonably to previous line, grade and cross section.
- 2. Specifications:
 - a. Slough material removed from the ditch may be blended into existing native road surface or shoulder only if it is the same material as the road surface. Slough material that is not suitable for blending should be disposed of as directed by the Forest Officer.
 - b. Live vegetation and other organic material shall be removed and disposed of as directed by the Forest Officer.
 - c. Unstable stumps, rocks, leaning trees or other debris shall be removed from the cutslope as directed by the Forest Officer.

D. CULVERT MAINTENANCE:

- 1. Description: Maintenance is work performed on inlets, outlets, catch basins, related channels, existing riprap, trash racks and any other facilities related to the drainage structure.
- 2. Specifications: Catch basins, outlets and energy dissipaters shall be kept functioning and cleaned of debris. Ends of culverts shall be kept straight and undamaged. Any washing alongside or underneath the culvert shall be repaired.

E. ROADSIDE VEGETATION MAINTENANCE:

1. Description: Maintenance of roadside vegetation includes removal of brush, tree growth, deadfall or other obstructions to passage, safety or visibility, as such obstructions are present or develop during the contract period.
2. Specifications:
 - a. All trees that have fallen across the road shall be removed from the road prism unless otherwise agreed upon. Merchantable timber, if any, shall be cut in appropriate lengths and decked along the roadside in locations where traveled way width or sight distances will not be impaired.
 - b. Brush and seedling trees that encroach upon the original road clear limits shall be removed when they reduce safe sight distances. Low shrubs and brush that do not restrict sight distance but provide cover and reduce erosion shall not be removed. Brush and seedling trees removed shall be disposed of as directed by the Forest Officer.

F. SNOWPLOWING: If hauling occurs during the winter months, the Purchaser will be required to plow snow to the following guidelines on all State and private roads.

1. Snow should be windrowed beyond the fill shoulder line.
2. To protect the road surface, a 1 to 4-inch cushion of snow may be left on the road.
3. At termination of use, the road will be prepared for spring runoff by opening drainage outlets through the plowed berms and by installing a snow-berm road closure.
4. Tracked equipment will not be used to plow snow without prior written approval from the Forest Officer.
5. The side-casting of road material into a stream, lake, wetland, or other body of water during snow plowing operations is prohibited in the SMZ.

G. DUST ABATEMENT: The Purchaser may be required to perform dust abatement on any of the roads designated as part of the haul route. Any dust abatement must conform to current standards of the owner of the road.

1. If the Purchaser applies Magnesium Chloride or Calcium Chloride for dust abatement, the following specifications will be followed:
 - a. Dust abatement will be applied prior to summer hauling of logs.
 - b. Scarify road surface and grade to final grading specifications. A minimum of two inches of loose material is required on the road surface prior to applying the abatement.
 - c. The road surface will be moist to a minimum of depth of two inches or watered uniformly to moisten the road. If the road is watered, it will be done twelve to twenty-four hours prior to application of the abatement.
 - d. The abatement will be applied at the rate of 0.25 gallons Magnesium Chloride per square yard or 0.20 gallons Calcium Chloride per square yard, followed immediately by another application at the same rate, for a total of 0.5 gallons Magnesium Chloride per square yard or 0.4 gallons Calcium Chloride per square yard.
 - e. Chemical abatement will not be applied for 50 feet on either side of any stream crossing.
 - f. Additional treatments using water may be required if deemed necessary by the Forest Officer.

H. NOXIOUS WEED MANAGEMENT: The Purchaser may be required to perform noxious weed management on any of the roads designated as part of the haul route and on landings. Noxious weed management may include grass seeding, equipment washing and herbicide spraying.

1. Grass seeding, if required, is shown in Section IX, GRASS SEEDING SPECIFICATIONS.
2. All road construction equipment and equipment used in off-road logging activity must be pressure-washed by the Purchaser and inspected by the Forest Officer prior to entering the sale area. This cleaning will remove all dirt, plant parts, and material that may carry noxious weed seeds into the sale area. Other equipment and vehicles entering and leaving the sale area shall be cleaned prior to start up and kept reasonably clean during the course of operations. All subsequent move-ins of logging and construction equipment shall be treated the same as the initial move-in.
3. If spraying is required in Attachment B, it shall be done by a commercial applicator licensed by the State of Montana or by personnel under the direct supervision of the licensed applicator. All herbicide applications shall follow EPA label requirements. Any weed control must comply with the current standards of the County Weed Board and as directed by the Forest Officer.
4. **The Purchaser shall be responsible for 1 (one) application of Tordon, 2- 4- D and Escort on approximately 16.62 miles road. (50 total acres) spot spraying existing knapweed, houndstongue, St. Johnwort, thistle, mullein, and sulphur cinquefoil on Roads: Ruben, Point B, Lookout, Bench, Park B, South, Gate, Grass and Lower Grass. The application shall be completed after harvest and prior to July 15, 2029. Herbicide application shall only occur between May 15 through July 15. Road spray width shall be 25 feet. Any changes to the herbicides used must be approved by the Forest Officer.**
5. The Purchaser will notify the Forest Officer 48 hours in advance of spraying operations.
6. Herbicide application will be site specific to areas along roads where noxious weeds occur as directed by the Forest Officer. All no-spray areas will be designated on the ground or adequately described to the Purchaser before application begins.
7. Picloram (Tordon) and Escort, a restricted use herbicide, will not be applied within 50 feet of surface water. 2- 4- D will not be applied within 25 feet of surface water.
8. Herbicides will not be applied to areas that may contribute run-off directly into surface water.
9. Application is only permitted on calm, dry days to limit drift and possible surface movement of road prisms.
10. Applicator is responsible for taking proper safety precautions for pesticide handling and waste disposal. The applicator is required to have a contingency plan and remedial actions in the event of accidental spill or exposure.
11. Warning signs may need to be posted and maintained on entrance roads to the area 72 hours prior to spraying, during the period of operations, and 7 days after spraying.
12. The road site mix and harvest unit mix: Tordon, Escort and 2- 4- D will be applied at the rate of 1.25 pint of Tordon/acre, 1 ounce of Escort/acre, a quart of 2- 4- D/acre and surfactant.
13. Purchaser and/or applicator must supply DNRC Forest Officer with spray records within 72 hours after spraying is complete.

VII. ADDITIONAL REQUIREMENTS

A. TEMPORARY SPUR ROAD SPECIFICATIONS: Temporary spur roads are defined as any roads constructed by the Purchaser to access a harvest unit or landing which is not an existing road and may not be shown as a required road to be constructed in Table B-1. All temporary roads will be constructed to the following specifications:

1. Forest Officer shall approve the location prior to any construction.
2. Clearing and excavation shall be kept to the absolute minimum for safe truck hauling and to prevent erosion and water quality impacts. Some sidehill excavation, minor through cuts, ditching and turnpiking may be required.
3. Temporary culverts may be required at ditch crossings, wet areas or other locations as directed by the Forest Officer.
4. Temporary erosion control measures may be required to meet BMP standards on the road and/or the landing area while being used.
5. (Contact Forest Officer for specifications before operations) At the completion of use the road shall be shaped back to natural contours, temporary culverts removed, erosion control measures installed, the disturbed areas grass seeded and the access closed to all vehicular traffic. The Forest Officer may require scarification or ripping of compacted landings and temporary spur roads.

B. GATES ON PRIVATE ROAD EASEMENTS: When using private road easements to access the timber sale area, any gate encountered on private land will be left as prescribed by the easement grantor.

C. TRAFFIC CONTROL AND WARNING SIGN SPECIFICATIONS:

1. The Purchaser shall furnish, erect, and maintain all necessary barricades, suitable and sufficient lights, danger signals, signs, and other traffic control devices, and shall take all necessary precautions for the protection of the work and safety of the public. Suitable warning signs shall be provided to properly control and direct traffic as requested by the Forest Officer.
2. All road barricades, warning signs, lights, temporary signals, flagger and pilot car operations and equipment, and other protective devices, shall conform with the specifications in the Manual on Uniform Traffic Control Devices (MUTCD).

VIII. ROAD LOG AND SITE DESCRIPTIONS

USFS 343 Road (Existing Road)

STATION (Miles)	Notes
0.00	Start at junction with Rivulet County Road (pavement). Road maintenance needs to be completed prior to hauling required by USFS TRUP, contact Forest Officer before operations. Blade road as required by USFS TRUP. Water truck may be required during hauling in dusty conditions.
3.38	Clean/armor existing CMP.
5.84	Clean/armor existing CMP.
6.38	Clean/armor existing CMP.
7.56	Clean/armor existing CMP.
7.58	Junction with USFS 7750 Road.
7.94	Replace 4 running boards on bridge.
9.50	End of maintenance, junction with Bench Road.

Ruben Road (Existing Road)

Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with USFS 343 Road.
0.04	Junction with Point Road.
0.07	Install 18" X 25' CMP and 50' ditch. Armor inlet/outlet.
0.09	Construct rolling dip with leadout ditch.
0.18	Construct rolling dip with leadout ditch.
0.23	Construct rolling dip with leadout ditch.
0.29	Junction with Larch Road.
0.33	Construct rolling dip with leadout ditch.
0.38	Clean/armor existing CMP
0.42	Construct rolling dip with leadout ditch.
0.53	Construct rolling dip with leadout ditch.
0.61	Construct rolling dip with leadout ditch.
0.71	Construct rolling dip with leadout ditch.
0.75	Junction with Upper Road.
0.79	Construct rolling dip with leadout ditch.
1.00	Construct rolling dip with leadout ditch.
1.08	Junction with Ridge Road.
1.20	End of road maintenance.

Larch Road (Existing Road)

Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with Ruben Road.
0.10	Construct rolling dip with leadout ditch.
0.18	End of road maintenance.

Upper Road (Reconstruction Road)

STATION (Miles)	Notes
0.00	Start at junction with Ruben Road. Remove regen/brush. Road is currently 10'-12' road, widen to 14'-16' road.
0.22	Construct rolling dip with leadout ditch.
0.32	End of road maintenance, construct truck turnaround, start Hay Road if needed.

Hay Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Upper Road. Install water bars or dips as conditions require.
0.35	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Ridge Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Ruben Road. Install water bars or dips as conditions require.
0.16	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Point Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Ruben Road.
0.10	Clean/armor existing CMP. Clean 100' of existing ditch.
0.18	Maintain existing dip.
0.34	Clean/armor existing CMP. Clean 100' of existing ditch.
0.38	Maintain existing dip.
0.42	Construct rolling dip with leadout ditch.
0.51	Junction with Rock Road.
0.63	Construct rolling dip with leadout ditch.
0.83	Move centerline 5' to the north for 50', use material to build up road. Construct rolling dip with leadout ditch.
0.85	Clean/armor existing CMP. Clean 100' of existing ditch.
0.89	DNRC section line, start Point B Road.

Rock Road (Existing Road)
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with Point Road.
0.02	Construct rolling dip with leadout ditch.
0.11	Construct rolling dip with leadout ditch. May need rock hammer after ridge to widen road.
0.42	End of road maintenance.

Point B Road (Existing Road) – FWP Road
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at DNRC section line, end of DNRC easement. This road was last used by Plum Creek for a haul route for line logging 20 years ago. Remove regen/brush and widen road as needed for operation. May need rock hammer to widen road in segments where cutslope is fractured rock.
0.08	Construct rolling dip with leadout ditch and slash filter.
0.11	Construct rolling dip with leadout ditch and slash filter.
0.16	Clean/armor existing CMP.
0.18	Maintain existing dip.
0.22	Maintain existing dip.
0.47	Maintain existing dip.
0.82	Maintain existing dip.
1.06	Maintain existing dip.
1.16	Maintain existing dip.
1.26	Maintain existing dip.
2.06	Existing CMP.
2.14	Maintain existing dip.
2.21	Maintain existing dip.
2.24	Existing CMP.
2.28	Maintain existing dip.
2.38	Existing CMP.
2.40	Maintain existing dip.
3.00	Maintain existing dip.
3.02	Maintain existing dip.
3.04	Existing CMP.
3.05	Junction with Lookout Road.
4.01	Maintain existing dip.
4.77	End of road, start new construction Talus Road.

Talus Road (New Construction)

STA. (Miles)	% GRD.	% S.S.	Material	Clearing	Notes
0.00					Start at junction with Point B Road. Begin new construction of a 14' minimum wide road. May need rock hammer for fractured rock.
	+5	60	C-50%, R-50%	M	
0.08					Construct rolling dip with leadout ditch.
	+6	60	C-50%, R-50%	M	
0.21					End of road, construct truck turnaround.

Lookout Road (Existing Road) – FWP Road

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Point B Road. This road was last used by Plum Creek for a haul route for line logging 20 years ago. Remove regen/brush and widen road as needed for operation. May need rock hammer to widen road in segments where cutslope is fractured rock.
0.02	Maintain existing dip.
0.06	Maintain existing dip.
0.34	Construct rolling dip with leadout ditch.
0.42	Maintain existing dip.
0.71	Maintain existing dip.
0.80	Construct rolling dip with leadout ditch.
1.01	Construct rolling dip with leadout ditch.
1.16	Maintain existing dip.
1.26	Construct rolling dip with leadout ditch.
1.33	Maintain existing dip.
2.07	End of road, DNRC section line.

Lookout B Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Lookout Road. Remove regen/brush and widen road as needed for operation.
0.11	Construct rolling dip with leadout ditch.
0.46	End of road at DNRC section line.

Bench Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with USFS 343 Road. Construct rolling dip with leadout ditch. Widen road to 14' minimum. For 500' (from junction to top of bench), lower grade where possible.
0.09	Construct rolling dip with leadout ditch.
0.42	Add 80 yards of native fill material for low spots in next 200'.
1.12	Construct rolling dip with leadout ditch.
1.24	Construct rolling dip with leadout ditch.
1.37	Clean/armor existing CMP. Add 20 yards of native fill material over CMP.
1.40	Construct rolling dip with leadout ditch. Existing gate.
1.60	Junction with temporary Break Road.
1.71	Junction with Wolf Road.
1.80	Maintain existing dip.
2.00	Junction with existing road. Remove regen/brush and widen road to a 14' minimum width.
3.33	End of road, start of new construction Fir Road.

Break Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Bench Road. Install water bars or dips as conditions require.
0.15	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Wolf Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Bench Road
0.20	End of road at DNRC section line.

Fir Road (New Construction)

STA. (Miles)	% GRD.	% S.S.	Material	Clearing	Notes
0.00					Start at junction with Bench Road. Begin new construction of a 14' minimum wide road. May need rock hammer for fractured rock.
	+5	65	C-50% R-50%	M	
0.12					Construct rolling dip with leadout ditch.
	+7	60	C-50% R-50%	M	
0.30					Start ripping fractured rock. Construct rolling dip with leadout ditch.
	-2	70	R-100%	M	
0.35					End ripping fractured rock. Construct rolling dip with leadout ditch.
	+8	65	C-50% R-50%	M	
0.48					Construct rolling dip with leadout ditch.
	-7	65	R-100%	M	
0.53					Construct rolling dip with leadout ditch.
	-5	65	C-50% R-50%	M	
0.61					End of road, construct truck turnaround.

USFS 7724 Road (Existing Road)

STATION (Miles)	Notes
0.00	Start at junction with USFS 343 Road. Road maintenance needs to be completed prior to hauling required by USFS TRUP, contact Forest Officer before operations.
0.25	Start turnpike road construction, construct 14'-16' road, install rolling dip with leadout ditch. Remove old flapper.
0.33	Construct rolling dip with leadout ditch. End turnpike.
0.38	Junction with Lodgepole Road.
0.85	End of road maintenance at DNRC section line.

Park Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with USFS 7724 Road.
0.11	Junction with Bear Road.
0.15	Junction with Lodgepole Road. Construct rolling dip with leadout ditch.
0.33	Construct rolling dip with leadout ditch.
0.39	End of road at DNRC section line, start Park B Road.

Park B Road (Existing Road) – FWP Road
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at DNRC section line and junction with Park Road.
0.17	Maintain existing dip.
0.23	Fix fillslope, widen road by using cutslope material. Install dip 100' above road repair.
0.35	Maintain existing dip.
0.59	Maintain existing dip.
0.72	Maintain existing dip.
0.94	End, use existing truck turnaround.

Bear Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Park Road. If used, may need to turnpike road where needed to improve low spots. Use upper portion of Park Road cutslope for 100 yards of native fill material.
0.28	End of road maintenance, DNRC section line.

Lodgepole Road (Existing Road)
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with Park Road.
0.06	Maintain existing dip.
0.15	Maintain existing dip.
0.32	Maintain existing dip.
0.37	End of road maintenance, DNRC section line.

South Road (Existing Road) - FWP Road

STATION (Miles)	Notes
0.00	Start at junction with Park Road.
0.36	End, DNRC section line. After haul, maintain existing water bars 200'-300' and install a tank trap.

South B Road (Temporary Road)

STATION (Miles)	Notes
0.00	Start at junction with South Road. Install water bars or dips as conditions require.
0.18	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Flat Road (Existing Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with USFS 343 Road.
0.25	End of road maintenance, DNRC section line. If used, water bar and cover with slash and grass seed after hauling.

USFS 7750 Road (Existing Road)

STATION (Miles)	Notes
0.00	Start at junction with USFS 343 Road. Road maintenance needs to be completed prior to hauling required by USFS TRUP, contact Forest Officer before operations.
0.36	Clean/armor existing CMP.
0.42	Clean/armor existing CMP.
0.54	Clean/armor existing CMP and add slash filter.
0.72	Clean/armor existing CMP.
0.78	Clean/armor existing CMP.
0.85	Repair fillslope and construct ditch relief before dry draw.
1.05	Junction with USFS 341 Road.
1.10	Clean/armor existing CMP.
1.42	End at junction with FWP Road.

Old Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with South Road. Install water bars or dips as conditions require.
0.12	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Northwest Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with South Road. Install water bars or dips as conditions require.
0.18	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

USFS 341 Road (Existing Road)

STATION (Miles)	Notes
0.00	Start at junction with USFS 7750 Road. Road maintenance needs to be completed prior to hauling required by USFS TRUP, contact Forest Officer before operations.
0.05	Maintain existing dip.
0.15	Maintain existing dip.
0.30	Maintain existing dip.
0.35	Maintain existing dip.

0.88					Construct rolling dip with leadout ditch.
	+8	55	C-100%	M	
0.93					Start of temporary/optional Grand Fir Road, construct truck turnaround.

Grand Fir Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with North Road. Install water bars or dips as conditions require.
0.29	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Grass Road (Existing Road) – FWP Road
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with USFS 7750 Road.
0.46	Existing boulders blocking road, replace after hauling.
0.49	Maintain existing dip.
0.63	Maintain existing dip.
0.67	Existing CMP, clean/armor the inlet/outlet.
0.74	Maintain existing dip.
0.83	Maintain existing dip.
1.03	Maintain existing dip.
1.20	Maintain existing dip.
1.35	Maintain existing dip.
1.52	Construct rolling dip with leadout ditch.
1.58	Junction with Lower Grass Road.
1.63	Maintain existing dip.
1.72	Maintain existing dip.
1.85	End, DNRC section line.

Grass B Road (Existing Road)
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with Grass Road. Remove regen/brush and widen road to a 14' minimum width.
0.04	Remove tank trap and construct rolling dip with leadout ditch.
0.14	Construct rolling dip with leadout ditch.
0.23	Construct rolling dip with leadout ditch.
0.33	Construct rolling dip with leadout ditch.
0.43	Construct rolling dip with leadout ditch.
0.46	Junction with Connector Road.
0.54	Construct rolling dip with leadout ditch.
0.65	Construct rolling dip with leadout ditch.
0.90	End of road, start of temporary/optional Grass Road C.

Grass C Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Grass B Road. Remove regen/brush and widen road as needed for operation. Install water bars or dips as conditions require.
0.22	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Connector Road (Temporary Road)

STATION (Miles)	Notes
0.00	Start at junction with Grass B Road. Install water bars or dips as conditions require.
0.89	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Connector B Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Connector Road. Install water bars or dips as conditions require.
0.11	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Junction Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Cedar B Road. Remove regen/brush and widen road as needed for operation.
0.11	End of road, DNRC section line.

Trail Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Cedar B Road. Maintain existing dips.
0.27	End of road.

Lower Grass Road (Existing Road) – FWP Road

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Grass Road.
0.27	End of road, DNRC section line.

Lower Grass B Road (Existing Road)

**Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.**

STATION (Miles)	Notes
0.00	Start at junction with Lower Grass Road.
0.04	Remove existing tank trap. Remove regen/brush and widen road to a 14' minimum width.
0.24	Clean/armor existing CMP.
0.64	End of road, start of temporary/optional Lower Grass C Road.

Lower Grass C Road (Temporary Road/Optional)

STATION (Miles)	Notes
0.00	Start at junction with Grass B Road. Remove regen/brush and widen road as needed for operation. Install water bars or dips as conditions require.
0.09	End of road. Remove any vertical cutslope, cover with slash and grass seed after hauling.

Cedar Road (Existing Road/Optional) – FWP Road
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Start at junction with USFS 341 Road. If building the Connector Road and hauling out Grass Road this road is not needed.
0.11	Existing gate.
0.14	Maintain existing dip.
0.19	Maintain existing dip.
0.25	Maintain existing dip.
0.27	Existing CMP, clean/armor the inlet/outlet and install a slash filter.
0.30	Maintain existing dip.
0.34	Clean ditch to station 0.27.
0.39	Existing CMP, clean/armor the inlet/outlet and install a slash filter.
0.60	Maintain existing dip.
0.63	Existing CMP, clean/armor the inlet/outlet and install a slash filter.
0.65	Construct rolling dip with leadout ditch and slash filter.
0.83	End, DNRC section line.

Cedar B Road (Existing Road)
Spot Blading only required on existing haul route:
Areas with good grass and no ruts do not require blading.

STATION (Miles)	Notes
0.00	Junction with Cedar Road at DNRC section line. Remove regen/brush and widen road to a 14' minimum. Maintain existing dips.
0.61	Clean/armor existing CMP.
0.93	Clean/armor existing CMP.
0.99	Construct rolling dip with leadout ditch.
1.30	Construct rolling dip with leadout ditch.
1.59	Junction with Trail/Junction Roads.
1.62	Construct rolling dip with leadout ditch.
2.02	End of road.

IX. SPECIFICATIONS AND DRAWINGS

A. REQUIREMENTS: Any construction requirements or structures shown in the Timber Sale Contract or Attachment B shall be constructed and installed by the Purchaser to specifications in this section. Structures shall be constructed at locations shown in the Road Log and as specified or staked by the Forest Officer.

B. SPECIFICATIONS:

1. Road Construction Fabric: When road construction fabric is required the following specifications shall be met: minimum twenty mills thick with minimum trapezoid tear strength (ASTMD-1117-80) of 110 and mullen burst strength (ASTMD-3786-80) of minimum 375 psi; (e.g. Mirafi 500x or AMOCO 200208).

GRASS SEEDING SPECIFICATIONS

A. SEED REQUIREMENTS: The Purchaser shall furnish certified noxious weed-free, pure live seed mixture(s) and fertilizer in the amounts shown in Table B-2. Total pounds mixed seed is pure live seed, corrected for germination and purity. Germination and purity tests must have been conducted within the last 6 months prior to delivery. Purchaser shall furnish documentation of germination and purity tests to the Forest Officer prior to application.

B. APPLICATION REQUIREMENTS:

1. Fertilizer and seed may be applied with a hand spreader or power blower, which adjusts to distribute seed evenly at the specified rate while limiting application to the desired area. Seed and fertilizer shall be applied separately. Mixing of seed and fertilizer is prohibited.
2. Seed and fertilizer shall be applied as listed in the following tables. In the event weather conditions or time of year are not conducive for successful seed establishment, the Forest Officer may require a different application schedule from the ones stated.
3. Application estimates are approximate figures only to be used for estimating purposes.

SEEDING CONCURRENT WITH WET CULVERT INSTALLATION.			
Areas shown in this table shall be seeded within one day of culvert installation, or as otherwise directed by the Forest Officer.			
Areas To Be Seeded	Remarks	Pounds per acre	Acres
Ruben Road – Station 0.07 mile, CMP install	CMP 18" x 25'	30	0.2
Total Pounds Mixed Seed:		6	

SEEDING CONCURRENT WITH ROAD CONSTRUCTION

Areas shown in this table shall be seeded and fertilized concurrent with initial road construction according to the following schedule:

Cut slopes shall be seeded within 7 calendar days of the day that each segment of cut slope is rough shaped with the dozer or excavator. A cut slope segment is defined as one day's work regardless of the amount of work accomplished or the length of the cut slope. Even if the driving portion of the road is not shaped, graded or drivable, cut slope seeding is still required.

FILL SLOPES, DITCHES, SHOULDERS OF THE ROAD AND OTHER DISTURBED AREAS SHALL BE SEEDED WITHIN 15 CALENDAR DAYS AFTER COMPLETION OF EACH ROAD SEGMENT.

Road Name	Length	Seed pounds per acre	Fertilizer pounds per acre	Acres
Talus, Fir, North	1.75	30	N/A	4.7
Total Pounds Mixed Seed:		141		
Total Pounds Fertilizer:		N/A		

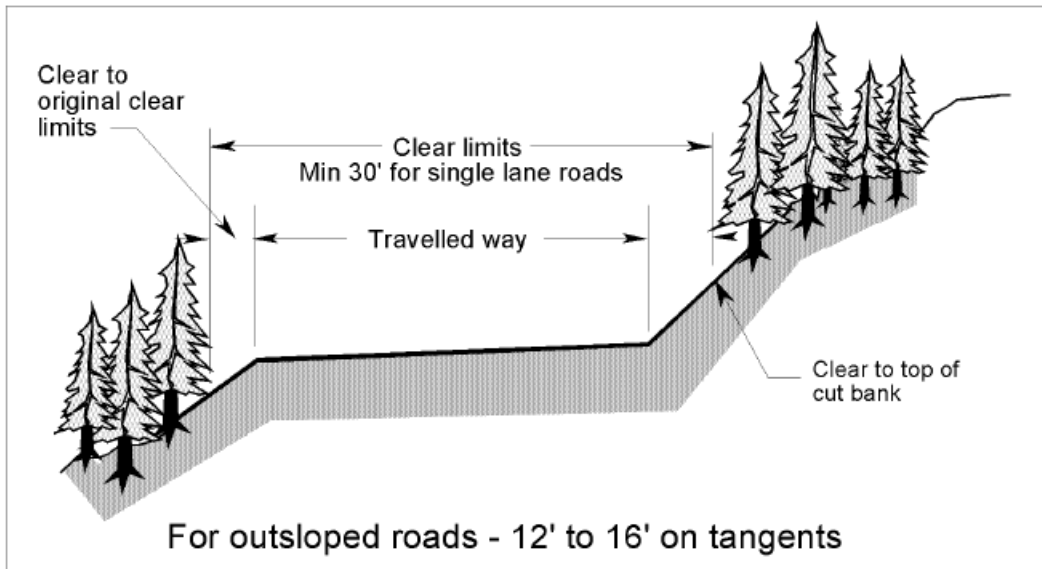

SEEDING FOLLOWING FINAL BLADING

Areas shown in this table shall be seeded and fertilized within 15 calendar days after completion of final road blading and shaping.

Road Name	Length	Seed pounds per acre	Fertilizer pounds per acre	Acres
Point B, Talus, Lookout, Fir, Park B, South, Gate, North, Grass, Lower Grass	8.50 Miles	30	N/A	16.4
Total Pounds Mixed Seed:		493		
Total Pounds Fertilizer:		N/A		

GRAVEL AND ROCK SPECIFICATIONS	
Material	Specifications
3/4" minus crushed gravel	Crushed gravel. Well graded. Fine fraction (minus 200 sieve) not to exceed 15%
Pit run gravel	Native gravel, well graded, with binder, compactable and not containing any rocks over 4" diameter.
Drain rock	1"- 3" diameter, screened clean rock.
<p>General Large Rock Requirements</p> <p>Stone shall be hard, durable, angular in shape, resistant to weathering and weather action, and free from overburden, soil, and organic matter. Stone must be hard enough so pieces do not fracture or break during the loading, hauling, or placement activities. Neither breadth nor thickness of stone shall be less than one-third its length. Rounded stone or boulders from a streambed will not be accepted unless authorized by the State.</p>	
Rock armor	Large rock with most sizes ranging from 6" to 12" diameter, used to armor fill slopes and catch basins.
Talus rock	Large rock of variable sizes used as load-bearing fill or drainage rock in soft areas or French drains, as approved by Forest Officer.
Energy dissipators	Large rock 18-24" diameter placed in streams at culvert outlets.

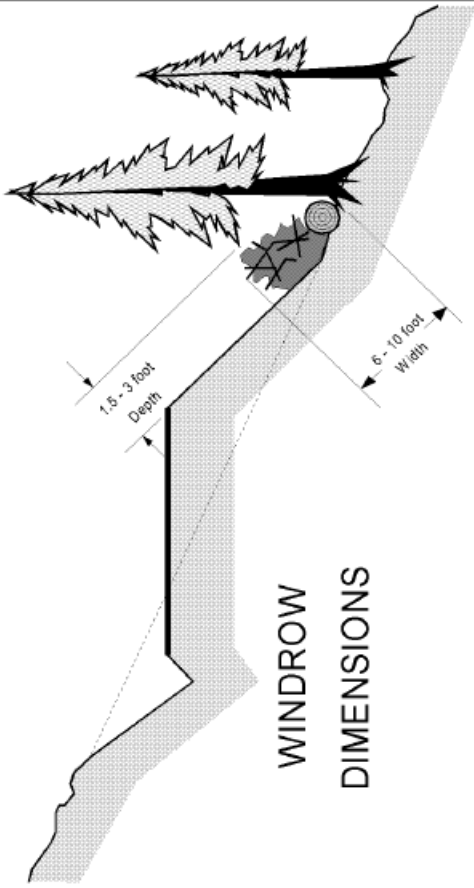

CLEAR LIMIT DEFINITIONS FOR EXISTING ROADS

SLASH FILTER WINDROW SPECIFICATIONS

- Materials must be stockpiled prior to construction of windrows.
- Cull logs must be anchored in place against undisturbed stumps, large rocks or trees at the toe of the fill.
- Slash must be placed above the logs with a backhoe and tamped into place with the bucket.
- Slash should be tamped so it is embedded approximately 6 inches into the fill surface to prevent water from running under the windrow.
- Slash, limbs and tops must be smaller than 12 feet long and 6 inches diameter. Stumps and root wads may not be used.
- Anchor logs must be larger than 16 inches diameter. Reasonably sound cull logs may be used.
- Windrows shall not interfere with the functioning of drainage structures or block stream channels.
- All locations will be staked or flagged by the Forest Officer.
- When installing windrows over the top of culverts, pipe length must be increased by 3 - 4 feet to accommodate windrow placement.

Warning Sign Specifications

Size: 30"x 30"
 Shape: Diamond
 Color: Diamond: Orange and Black. Barricade: Red and Silver
 Lettering: Minimum 4 inch letters. Standard Alphabet Series C. 1/2 inch Border.
 Reflective Background Required
 Mounting: Posts or portable sign stands, clearly visible to drivers. Do not mount on trees.

FOREST FIRE RULES & REGULATIONS

These rules apply to all activities on all classified forest lands within Montana during the legal Forest Fire Season, including any extension thereof (see 77-5-103(3), 76-11-101, 76-13-102(7), and 76-13-109 MCA). Reference also ARM 36.10.119 through 132.

Related State statute numbers are provided as a reference.

RULE I - DEBRIS BURNING

1. The person conducting the burn shall obtain written authorization from the recognized fire protection agency before igniting any open fire during the legal forest fire season (required by 76-13-121 MCA). The recognized fire protection agency may deny, restrict, or rescind any authorization by notifying the person conducting the burn.
2. All burning must comply with the Department of Environmental Quality or State/county/local open burning regulations.
3. Written authorization is not required for campfires.

RULE II - CAMPFIRES

1. Campfires cannot be left unattended and must be completely extinguished (see 76-13-123 MCA).
2. All campfires must be constructed in cleared or bare areas, and not allowed to spread beyond the established ring, pit, grate, or container.
3. Anyone igniting a campfire is required to have fire tools listed in Rule VIII (4).

RULE III - RAILROADS AND POWERLINES

Railroad and powerline companies are required to prepare and annually update working agreements with recognized fire protection agencies. These agreements must stress safety and fire response procedures; and identify, remove, prevent, modify, abate, or correct forest fire hazards and risks associated with railroad and powerline company operations (see 69-14-721 MCA).

RULE IV - EQUIPMENT

1. All internal combustion engines must be equipped with an approved and effective spark-arresting system, as established in the National Wildfire Coordinating Group's Spark Arrester Guides. Spark-arresting devices must be marked, properly installed, and maintained in accordance with the Guides. The following vehicles are exempt:
 - a. automobiles and light trucks of less than 23,000 GVW when all exhaust gases pass through a properly installed and maintained exhaust system, baffle-type muffler, and tailpipe. Vehicles with glass-pack mufflers do not qualify for the exemption.
 - b. heavy-duty trucks of 23,000 GVW or greater, with a muffler and vertical stack exhaust system extending

above the cab.

- c. vehicles with other spark-arresting systems providing equal or increased effectiveness. Such vehicles must be inspected and have written authorization from the recognized fire protection agency.
2. Equipment used for commercial, ranching, or industrial activities must meet the fire extinguisher and tool requirements listed in Rule VIII (5).

RULE V - FLAMING AND GLOWING SUBSTANCES

1. All flaming and glowing substances, including but not limited to, lighted cigarettes, cigars, ashes, and matches, must be extinguished before being discarded (see 76-13-124 MCA).
2. Smoking is allowed only at areas free of flammable or combustible material. Examples of these areas include a graveled road or an enclosed vehicle.

RULE VI - FIREWORKS

Use of fireworks is prohibited on all classified forest lands unless written authorization is obtained from the recognized fire protection agency. Authorization will only be considered between June 24 and July 5, inclusive, to coincide with the legal dates for the sale of fireworks in Montana (see 50-37-106 MCA).

RULE VII - WILDLAND/URBAN INTERFACE

1. County governments without subdivision wild-fire protection standards are encouraged to establish standards for all new subdivisions by January 1, 2000.
2. The Fire Protection Guidelines for Wildland/Residential Interface Development (DSL/DOJ, 1993) is available for use to assist counties in the development of standards.

RULE VIII - FIRE EXTINGUISHERS AND FIREFIGHTING TOOLS

1. Chainsaw operators shall carry a fully charged and operable fire extinguisher, minimum-capacity 8-ounce liquid or 1-pound dry chemical, with a 4BC or higher rating.
2. Vehicles and equipment, mobile or stationary, with a combustion engine/motor used for commercial, ranching, or industrial activities must have one operable, dry-chemical fire

extinguisher with a minimum 2-1/2 -pound capacity and 4BC or higher rating.

3. Chainsaw operators shall maintain one usable shovel at chainsaw-fueling sites.
4. All persons or parties igniting a campfire shall have one usable shovel and bucket. Persons igniting a barbecue need not have a shovel or bucket if the ashes are not removed from the container and the ashes or container are not placed on or near combustible material.
5. All commercial, ranching, or industrial activities must have:
 - a. one usable shovel or pulaski with each vehicle and equipment with an internal combustion engine/motor, mobile or stationary.
 - b. one backpack pump with each vehicle and with any equipment, used off road, mobile or stationary, with an internal combustion engine/motor, that cannot be used to build fireline and is being operated on combustible material.
6. Other types of firefighting tools that provide increased efficiency or effectiveness may be substituted by written authorization from the recognized fire-protection agency. For example, a [combi] firefighting tool may be substituted for a shovel or pulaski.

RULE IX - FOREST ACTIVITY RESTRICTIONS

In areas designated by public proclamation by the administrator, division of forestry, as areas of high fire hazard, the administrator may request all persons, firms, or corporations present or engaged in any activity in the areas to voluntarily cease operations or to adjust working hours to less critical periods of the day. In the event such a request is refused, the administrator may issue a written order directing compliance.

RULE X - FOREST CLOSURE

1. During periods of dangerous fire conditions, no person may enter or be upon those forest lands designated by public proclamation by the governor of the state of Montana as areas of dangerous fire hazard except under written permit issued by a recognized agency.
2. Permits to enter upon such areas during the closure may be issued by the recognized agency upon a showing of real need by the applicant. Permits may be issued to those persons having actual residence as a permanent or principal place of abode in the forest lands designated or to persons engaged in non-fire hazardous employment.
3. However, no permit may be required of persons engaged in either firefighting, fire prevention, or law enforcement who are engaged in official business.

RULE XI - CORRECTION OF HAZARD AND UNUSUAL CIRCUMSTANCES OR EVENTS

The recognized fire-protection agency may require identified wildland-fire hazards and/or risks be halted, prevented, abated, removed, disposed of, mitigated, or patrolled. This applies to public, private, nonprofit, commercial, and/or residential circumstances or events.

RULE XII - REQUEST FOR REVIEW

If any operator believes that in his case any requirement of a recognized agency is excessive, the operator may request the administrator, division of forestry, to review the requirements. If in the opinion of the administrator any or all are not necessary in the interest of public safety, he may make such changes as he considers advisable.

RULE XIII - DEFINITIONS

Backpack Pump: 5-gallon minimum; standard galvanized metal, fiberglass, or rubberized backpack water container with attached handpump; full of water at all times.

Bucket: Metal, plastic, canvas, or fiberglass container capable of holding at least one gallon of water. Motorcycle helmets qualify. **[Campfire]** means a fire set for cooking, warming, or ceremonial purposes; not more than 3 feet in diameter or height; void of overhanging branches; with all combustible material cleared at least 1-1/2 times the diameter of the fire; or a barbecue in a noncombustible container.

Combi Tool: A tool combining a shovel and pick.

Fireworks: As defined in 50-37-101 MCA.

Forested Land: As defined in 76-13-102 MCA and 36.10.101 ARM.

Hazard: Condition that promotes the ignition and/or spread of a wildland fire.

Open Fire: The burning of a bonfire, rubbish fire, or other fire in an outdoor location where fuel being burned is not contained in a closed incinerator, or outdoor fireplace. Barbecue pits and burn barrels are considered open fires and therefore require a burning permit (Rule I).

Pulaski: An ax with a medium size sharp grub hoe opposite the ax blade.

Recognized Fire-Protection Authority: An agency organized for the purpose of providing fire protection and recognized by the board as giving adequate fire protection to forest lands in accordance with rules adopted by the board.

Risk: Action or device that could cause a wildland fire to ignite.

Shovel: Vehicle, equipment, and chainsaw operator shovels will have a minimum overall length of 36 inches with a round pointed shovel head with a minimum width of 6 inches. Shovels required for campfires must be at least 24-inches in length with a pointed shovel head. Folding handles qualify.

RULE XIV - APPLICABILITY

The forest fire rules, Rule I through Rule XIII, (ARM 36.10.119 through 30.10.132) are in effect each year on classified forest land during the forest fire season May 1st to September 30th inclusive, or any legal extension thereof. Requirements pertaining to motor vehicles do not apply to those being operated solely on roads that are a part of federal or State maintained highway systems or on any paved public road.

WORKING IN BEAR HABITAT

12/03/12

Grizzly bear distribution is expanding in Montana and human/bear encounters are becoming more common. Working in bear habitat increases the likelihood of interactions with bears. It is important for contractors and their employees to be aware of steps that can be taken to minimize conflicts and how to react if an interaction occurs. This pamphlet provides information about bear behavior, preventive measures, and what to do in the event an encounter occurs. *This pamphlet is intended to provide information about possible ways of avoiding encounters with bears. It should not, however, be relied on as the sole means of doing so. In addition to adhering to the guidelines outlined in this document, you should always rely on your experience, training, education and judgment about the best, safest manner to avoid encounters with bears.*

ENCOUNTERS

- ▲ Stay calm and keep the animal in view, but avoid direct eye contact. Bears may interpret eye contact as a sign of aggression. Back away slowly. Never run from a bear unless you know you can reach safety. Determine whether the animal is a black bear or a grizzly bear.
- ▲ If the bear charges, stand your ground. Bears commonly “bluff charge,” stopping within a few feet of a person, before fleeing in a different direction.
- ▲ Keep bear spray handy. Always have a canister of bear spray (at least eight ounces) on your belt. Make sure it is an EPA registered bear spray with 1 to 2% capsaicin and related capsaicinoids, has a spray duration of at least six seconds, and a range of 25 feet. Familiarize yourself with the directions for using the spray. Use it only if confronted by a charging bear. Spray toward the bear, aiming slightly downward.
- ▲ In the event that you have no bear spray, or it was ineffective and the charge is not a bluff, or the bear is exhibiting predatory behavior, you must change your approach. Signs of predatory behavior include: following, showing interest, coming into a tent, and unprovoked attacks. How you respond will depend on the species of bear attacking you. **Black bear and young grizzly attacks:** Always fight back. Jump up and down, wave your arms and yell. Try to look as large as possible. Never play dead – it makes you easier prey. Remember that black bears and small grizzlies can climb trees, so stay on the ground. **Mature grizzly attacks [particularly females with young]:** If a surprise encounter occurs or if bear spray is ineffective, drop to the ground and play dead. Lie on your stomach, clasp your hands behind your neck, and use your elbows and toes to avoid being rolled over. If the bear rolls you over, keep rolling until you land back on your stomach. Remain still and don't struggle or scream. A defensive bear will stop attacking once it feels the threat is gone. Don't move until you are sure the bear has left the area. **If the grizzly is exhibiting predatory behavior or comes into a tent at night, do all you can to escape or fight back.**
- ▲ **If an encounter occurs, contact the DNRC forest officer immediately and notify Montana FWP.**

JOB SITE PREVENTION

- ▲ Watch for bear signs. Signs include: tracks; droppings; recently overturned rocks or logs; logs torn apart; clawed, bitten or rubbed trees; bear trails; hair on tree bark; fresh diggings; and crushed vegetation. If you observe any of these signs, be aware that a bear may be frequenting the area. If camping, or stopping to eat your lunch, select a different area.
- ▲ When working or walking alone, make noise and carry bear spray. Bears don't like surprises, but will move on if they hear people approaching. Make noise, especially when approaching blind corners, dense shrubs and streams, and when walking into the wind. Maintain regular communication with co-workers.
- ▲ If camping on site, leave coolers, food and beverages inside campers or secured vehicles. If cooking over an open fire, do not discard food or grease in fire pits.
- ▲ Don't leave trash, groceries or animal feed in your vehicle for extended periods. Bears can, and do, pry open car and truck doors and break windows to get at food and other items they associate with food.
- ▲ Bears are attracted to petroleum based products. Keep all fuel and oil canisters in bear resistant containers. Bears have been known to damage hoses, oil filters and foam seats on heavy equipment. Dispose of empty containers promptly.

TEMPORARY ROAD USE PERMIT

- 1 **Montana Fish Wildlife & Parks** (“FWP” or “Grantor”), grants to the **Montana Department of Natural Resources** (“DNRC” or “Permittee”) a non-exclusive, temporary road use right-of-way permit to occupy and use roads across FWP owned parcels in Mineral County, Montana.
- 2 The FWP owned parcels containing roads relevant to this permit (“the FWP Lands”) are legally described as:
 - T13N R25W, P.M.M., Mineral County**
Section 1
 - T14N R24W, P.M.M., Mineral County**
Sections 20,21,29
 - T14N R25W, P.M.M., Mineral County**
Sections 23,25,26,35
- 3 The road rights-of-way granted by this permit are across existing roads on the FWP Lands, as shown in **Attachment A**.

RECITALS

- 4 The purpose of this permit is to grant DNRC, its personnel, contractors, representatives, and other authorized agents access across the FWP Lands for the purpose undertaking timber sale activities, which includes hauling timber across the FWP Lands.
- 5 DNRC expects to log 2.3 million board feet during the term of this permit.

TERMS AND CONDITIONS

- 6 This permit authorizes Permittee, along with its contractors or third parties under the supervision of the Permittee, to use certain existing roads across the FWP Lands.

TERM OF PERMIT

- 7 This permit shall **begin on February 1, 2026, and terminate on October 31, 2029** (or upon completion of all permit activities), unless earlier terminated by FWP due to Permittee’s breach of any terms or conditions herein, or upon written request by Permittee.
 - 7.1 Provided however, FWP shall provide Permittee with written notice a minimum of 60 days prior to termination for breach and shall provide Permittee with reasonable opportunity to satisfactorily correct the breach.
- 8 Permittee will provide a minimum of 10-days’ notice of project activity in order to allow adequate time to notify affected members of the public.
- 9 Permittee may request renewal of this permit, which may be granted or denied at the sole discretion of FWP.

RIGHT-OF-WAY DIMENSIONS

- 10 The road rights-of-way granted by this permit are across approximately 12.92 miles of existing roads on the FWP Lands, as shown in **Attachment A**.

11 The permitted road area is 14 feet in width, 7 feet on each side of the centerline, with such additional width allowed for clearing as required for adequate protections of cuts and fills.

11.1 The centerline of said roads as constructed are hereby accepted by FWP and Permittee as the true centerlines of the rights-of-way granted.

12 This road right-of-way area contains approximately 46.98 acres total.

COST OF PERMIT

13 Total Permit Cost: \$0

NO PERMANENT INTEREST CONVEYED

14 This permit does not convey any right, title, or interest in real property.

14.1 Permittee claims no interest in the FWP Lands by virtue of this permit, or through occupancy or use hereunder.

COMMUNICATIONS BETWEEN PARTIES

15 Permittee will maintain an active and open line of communication with FWP throughout the period of this permit.

16 Communications should be addressed as follows:

To DNRC:

Amy Helena, Missoula Unit Manager
DNRC Missoula Unit
3206 Maverick Lane
Missoula, MT 59804

To FWP:

Montana Fish, Wildlife & Parks Region 2
Attn: Fish Creek WMA Manager
3201 Spurgin Road
Missoula, MT 59923

17 Either party may designate an alternate contact via written notice to the other party.

USE REPORTS

INCIDENT NOTIFICATION

18 Permittee must notify the FWP Region 2 Office within 24 hours of any observed hazards, safety problems, accidents, or incidents that occur on lands covered by this permit.

PERMITTEE'S MAINTENANCE AND REPAIR REQUIREMENTS

19 FWP is under no obligation to improve or maintain the Road for Permittee's use. Any improvements deemed necessary to facilitate the transport of logs shall be first reviewed by regional FWP staff, and all costs shall be borne by DNRC.

20 Permittee will perform road maintenance equal to Permittee's proportionate share of the use of the roads with others who may be granted like permission, so that at the termination of this permit, the roads will be in a condition equal to that prevailing on roads of like standards.

21 If Permittee's exercise of the rights-of-way granted by this permit causes damage which requires more than normal maintenance to repair, Permittee shall fully repair such damage to bring the road up to the aforementioned standard, and all costs shall be borne by DNRC.

22 At the termination of the permit, FWP staff shall inspect and approve permit road areas and adjoining land for satisfactory condition and completion of any necessary restoration, including erosion control.

- 22.1 FWP Lands (not within road right-of-way clearing limits, *see* ¶ 38) must be restored as nearly as possible to preexisting conditions.
- 23 More detailed Road Maintenance and Reconstruction responsibilities are outlined in **Attachment B** as performance requirements of Permittee under this permit.

RESTRICTIONS ON PERMITTEE'S ACTIVITIES

- 24 Permittee will not construct any structures or improvements without express written permission from FWP.
- 25 Permittee shall prevent unnecessary damage to the FWP Lands, including timber, soil, water, improvements, and other resources.
- 26 Permittee shall ensure its operations on the FWP Lands comply with applicable federal and state laws, regulations, and standards, including those regarding resource protection, fire prevention and control, slash disposal, erosion control, noxious weed prevention and control, and protection of cultural resources.
- 27 Permittee will cooperate with county weed control boards, conservation districts, special weed districts, adjacent private landowners, lessees, and public agencies to control the spread of noxious weeds.
- 28 All equipment used for off-road activity must be washed by Permittee prior to entering the area to prevent transfer of weed seed.
- 29 Permittee is responsible for the actions of employees, clients, contractors, participants, and guests while on the FWP Lands.
- 30 Permittee will comply with all applicable provisions of State and Federal laws pertaining to forest protection and will take all reasonable steps to prevent and, if necessary, suppress forest fires on the FWP Lands.
- 31 Permittee shall remove all garbage or other project byproducts from the FWP Lands prior to project completion.
- 32 No historic or cultural artifacts or archeological or geological features will be disturbed or removed from the FWP Lands.
- 33 Permittee will ensure that special natural features, such as but not limited to bald eagle nests, heron rookeries, or other critical wildlife habitat are left undisturbed.
- 34 Permittee will not restrict or reduce public access on the road beyond the policy FWP has implemented.
- 34.1 This area receives public recreational use.
- 34.2 Permittee will provide signage for commercial logging activity and implement standard safety procedures for the road to accommodate both logging activity and public use.
- 35 Log hauling and other related logging traffic is not permitted on roads on the FWP Lands during periods when the roadway is soft and subject to damage, e.g., spring runoff.
- 36 No camping by the Permittee, purchasers or its' contractors will be allowed on the FWP Lands for the purposes of this permit.
- 37 It is also understood and agreed that Permittee shall keep the FWP Lands free from liens arising in any manner out of the activities of Permittee and shall promptly discharge any such liens that are legitimately asserted.

TIMBER CLEARING FOR RIGHT-OF-WAY

- 38 If necessary, and with notice to FWP, Permittee shall cut only such timber as necessary to clear the authorized right-of-way for road use and maintenance.
- 38.1 DNRC will be responsible for removal and disposal of any material generated as a result of road improvements.

FWP AND PUBLIC ACCESS

- 39 This permit is non-exclusive in nature.

- 40 FWP reserves to itself, its successors and assigns, all rights accruing from ownership of the Road, including the right to engage in or permit others to engage in uses of the Road consistent with its State Park rules and procedures.
- 41 Representatives of FWP shall have the right to enter the FWP Lands for the purpose of managing the land and/or inspecting and examining uses thereof, including, but not limited to, the permissive uses set forth in this permit.
- 42 FWP reserves the right to allow others, **including members of the public**, to continue to use the FWP Lands according to FWP access and management policies.

INSURANCE REQUIREMENTS

- 43 The Permittee and its purchasers or contractors must possess and maintain workers' compensation insurance for all people employed by the permittee during the terms of this permit.
 - 43.1 Independent contractors utilized by the permittee must do the same or have a valid Independent Contractor Exemption Certificate.
- 44 It is also understood and agreed that, prior to exercising any rights under this permit, Permittee will require its purchasers or contractors to obtain—and maintain until all obligations assumed hereunder have been performed—liability insurance issued in a form and by an insurance company acceptable to FWP.
- 45 Minimum coverage requirements shall be as follows:
 - 45.1 Comprehensive General Liability policy with limits of \$1,000,000 per occurrence and \$2,000,000 aggregate.
 - 45.2 Automobile Liability insurance covering owned, non-owned, hired and other vehicles, with Combined Single Limit for bodily Injury, Death and Property Damage of \$1,000,000 per occurrence. .
 - 45.3 Loggers Broad Form B Property Damage Liability Insurance with a limit of \$2,000,000 per occurrence, separate and apart from the property coverage required under (a) above.
 - 45.4 Contractual Liability Insurance with a limit of \$100,000, separate and apart from the coverage required above.
- 46 Prior to commencement of any work or hauling operations to be performed on the FWP Lands pursuant to this permit, the Permittee shall deliver to FWP a Certificate of Insurance from the insurer(s) of said Permittee or contractors certifying that coverage is not less than the minimum amounts is in force.
 - 46.1 FWP reserves the right to require a certified copy of the policy, or to examine the policy itself.
- 47 Permittee shall indemnify, defend, and hold harmless FWP for any injury to persons and/or property caused by or arising out of Permittee's use of the FWP Lands.

FORCE MAJEUR

- 48 DNRC shall be under no liability or obligation for any failure to give Prior Notice or seek Prior Approval for any activity undertaken by DNRC necessitated by virtue of fire, flood, acts of God, or other element, or any other emergency reasonably deemed by DNRC to exist.
 - 48.1 However, after such an event, if there is damage to the FWP Lands, Permittee shall notify FWP of any such damage as soon as practicable.

COMPLIANCE WITH OTHER LAWS AND REQUIREMENTS

- 49 Permittee is responsible for obtaining any additional permits or requirements from any other affected regulatory agencies.
- 50 Permittee shall comply with all Federal, State, and local laws, ordinances, regulations, orders, postings, or written requirements applicable to the area or operations covered by the Restricted Use Permit.

FWP RESERVED RIGHTS

- 51 FWP reserves the right to restrict or preclude any surface activity on FWP Lands during periods of adverse weather and other conditions which may contribute to accelerated erosion, flooding, fire, disruption of seasonal wildlife, or any other potentially adverse outcome.
- 52 FWP reserves the right to alter the terms and conditions of this permit if significant impacts are documented to state park natural or cultural resources, or significant management actions, including but not limited to the development of park amenities occur within or adjacent to the project area.
- 53 An authorized representative of FWP may examine any of the records or other documents related to the permit, the Permittee or the Permittee's purchasers or contractors or agent for up to 3 years after the expiration of the permit.

AMENDMENT

- 54 No changes may be made to this permit without the written agreement of both parties.

NO ASSIGNMENT

- 55 This permit may not be assigned.

BREACH AND TERMINATION

- 56 If FWP determines that Permittee has violated the terms of this Permit, including if Permittee undertakes any activity requiring approval of FWP without first obtaining such approval, FWP shall give written notice to Permittee of the violation and demand corrective action sufficient to cure the violation within 60 days.
 - 56.1 In the event Permittee fails to cure the breach within 60 days, FWP may terminate this permit by providing written notice to Permittee 30 days prior to termination.
- 57 This permit may be revoked by FWP in the event Permittee fails to use it or discontinues using it during the permit term.
- 58 If any of the following conditions occur, FWP may bring an action in a court of competent jurisdiction to enforce the terms of this Permit:
 - 58.1 Permittee fails to cure the violation within 60 days after receipt of notice from FWP; or,
 - 58.2 under circumstances where the violation cannot reasonably be cured within a 60-day period, Permittee fails to begin curing the violation within the 60-day period; or,
 - 58.3 if, within 60 days of Permittee's receipt of notice from FWP, Permittee fails to agree with FWP in writing on a date by which efforts to cure such violation will reasonably begin; or,
 - 58.4 if Permittee fails to continue diligently to cure such violation until finally corrected.
- 59 In the event of such litigation to enforce the terms of this permit, each party shall bear its own costs and attorney's fees and costs.

MEDIATION FOR DISPUTES

- 60 If a dispute arises between Permittee and FWP concerning interpretation of the terms of this permit or concerning the consistency of any proposed use or activity with the terms of this permit, and if Permittee agrees in writing not to proceed with the use or activity pending resolution of the dispute, either Permittee or FWP may refer the dispute to mediation by request made in writing to the other Party.
 - 60.1 Within 10 days of receipt of such referral, DNRC and FWP will select an impartial mediator who shall conduct the mediation and thereby assist the parties in resolving the dispute cooperatively.
 - 60.2 Each party shall pay an equal share of the mediator's fee.

- 60.3 In referring any matter arising under this permit to mediation, Permittee and FWP agree that mediation offers an alternative to the expense and time required to resolve disputes by litigation and is therefore often preferable to litigation.
- 60.4 Nevertheless, mediation pursuant to this Paragraph shall be voluntary, and this mediation provision shall not be interpreted as precluding or limiting the Parties from seeking legal or equitable remedies.

PERSONAL PROPERTY & FIXTURES.

- 61 Any personal property or fixture allowed by FWP to be placed on the FWP Lands by the Permittee or their agents shall be removed immediately upon expiration or termination of this permit.
 - 61.1 Any personal property or fixture left on the FWP Lands after the expiration or termination of the permit shall become the property of the State of Montana.
 - 61.2 FWP shall have the authority to dispose of any property or fixture remaining on the licensed area at the termination of the permit.
 - 61.3 Permittee will not be entitled to any value received by FWP through disposal of any property or fixture remaining on the FWP Lands after expiration or termination.
 - 61.4 This subsection does not authorize placement of improvements or personal property upon the FWP Lands that were not otherwise authorized.

NOTICE OF HISTORIC OR CULTURAL ARTIFACTS

- 62 If any evidence or artifacts of archaeological, historical, cultural, or special significant are discovered in the course of using or maintaining the road, Permittee will protect the same and notify FWP immediately.
 - 62.1 If implicated, Permittee must comply with the Human Skeletal Remains and Burial Site Protection Act, Mont. Code Ann. §§ 22-3-801, et seq.

ENFORCEMENT AND WAIVER

- 63 Enforcement of the terms of this permit is at the discretion of FWP.
- 64 Any forbearance by FWP in exercising its rights under this permit in the event of any breach of any term of this permit by Permittee may not be deemed or construed to be a waiver by FWP of that term or of any subsequent breach of the same or any other term of this permit.
- 65 No delay or omission by FWP in the exercise of any right or remedy upon any breach by Permittee may impair the right or remedy or be construed as a waiver, nor may any forbearance or delay give rise to a claim of laches, estoppel, or prescription.

SEVERABILITY

- 66 If any provision of this permit is found to be invalid, the remainder of the provisions of this permit shall not be affected.

COUNTERPARTS

- 67 This permit may be executed in counterparts which, taken together, shall constitute one and the same instrument.

ATTACHMENT B

ROAD MAINTENANCE AGREEMENT

I. ROAD MAINTENANCE

Permitted Roads are shown in Attachment B. Roads are to be used for the sole purposes of Permittee to mobilize and demobilize logging equipment, conduct road construction, reconstruction, and maintenance activities, conduct forest management activities, and haul approximately 2.3 MMBF of timber harvested exclusively from land owned by the Permittee in Sections 16 and 30 T14N R24W and Section 24, 26, and 36 T14N R25W, P.M.M., Mineral County, Montana. It shall be the responsibility of Permittee to obtain any other necessary access over other public or private party lands.

This Permit is transferable to the Purchaser of Permittee's Lion Point Timber Sale ("Purchaser"), and shall become a part of Permittee's Timber Sale Agreement with Purchaser, provided that Permittee shall remain primarily responsible for compliance with all terms and conditions of this Permit, including road maintenance and upgrade obligations. It shall be the responsibility of Permittee to obtain any other necessary access over other public or private party lands.

1. The land to be used shall be of the minimum width necessary for roads of like standards with such additional width as required for adequate protection of cuts and fills. All road work performed under this permit shall have the prior approval of the Owner. Road reconstruction will adhere to the following general standards:
 - 14' road plus slough widening, as needed,
 - 30' minimum right-of-way clearing with maximum right-of-way clearing limits determined by % sideslope,
 - Drain dips and other water quality measures will be incorporated into the construction as needed,
 - Road prisms and other disturbances will be grass seeded upon completion of road reconstruction with an Owner-approved seed mix.
2. Permittee shall cut only such timber from the Lands as may be necessary to cut in clearing the right of way for use and maintenance of the Roads, and that timber so cut shall, unless otherwise agreed to, be cut into lengths specified by the Owner, and decked along the road for disposal by the Owner.
3. Permittee shall dispose of all refuse caused by construction, use and maintenance of the Roads off of Owner lands in accordance with all the laws of the State of Montana covering such disposal.
4. Permittee shall comply with all the applicable provisions of the State and Federal laws pertaining to forest protection and shall do all in Permittee's power to prevent and suppress fires on the Lands.

5. Permittee shall provide maintenance equal to Permittee's proportionate share of the use of the Roads with others who may be granted like permission. In order to facilitate traffic and so that at the termination of this permit the Roads will be in a condition equal to that normally prevailing on roads of like standards and unless otherwise agreed to in writing, lead-off drainage and water barriers to prevent erosion must be constructed on the Roads as directed by the Owner. In order to not cause excessive damage to Roads, Permittee may not haul logs during spring break-up or wet weather conditions.
6. Permittee's construction, use and maintenance of the Roads must be conducted in accordance with the "Best Management Practices for Forestry in Montana" (BMP). Permittee does hereby acknowledge receipt of said BMP.
7. In lieu of Owner charging a road use fee, Permittee or Purchaser shall maintain and upgrade Roads during the term of this Permit as shown in Attachment B and as specified by Owner and detailed in II. ROAD LOG AND SITE DESCRIPTIONS (below).
8. Permittee must re-grade the Roads as specified by the Owner during the term of the permit.
9. Permittee's construction, use and maintenance of the Roads must be conducted in accordance with the "Best Management Practices for Forestry in Montana" (BMP). Permittee does hereby acknowledge receipt of said BMP.

II. NOXIOUS WEED MANAGEMENT

The Permittee may be required to perform noxious weed management on any of the roads designated as part of the haul route and on landings. Noxious weed management may include grass seeding, equipment washing and herbicide spraying.

1. Grass seeding, if required, is shown in Section IV, GRASS SEEDING SPECIFICATIONS.
2. All road construction equipment and equipment used in off-road logging activity must be pressure-washed by the Purchaser and inspected by the Forest Officer prior to entering the sale area. This cleaning will remove all dirt, plant parts, and material that may carry noxious weed seeds into the sale area. Other equipment and vehicles entering and leaving the sale area shall be cleaned prior to start up and kept reasonably clean during the course of operations. All subsequent move-ins of logging and construction equipment shall be treated the same as the initial move-in.

0.94	End, truck turnaround.

IV. SPECIFICATIONS AND DRAWINGS

A. REQUIREMENTS:

Any construction requirements or structures shown in the Timber Sale Contract or Attachment B shall be constructed and installed by the Purchaser to specifications in this section. Structures shall be constructed at locations shown in the Road Log and as specified or staked by the Forest Officer.

B. SPECIFICATIONS:

Road Construction Fabric: When road construction fabric is required the following specifications shall be met: minimum twenty mills thick with minimum trapezoid tear strength (ASTMD-1117-80) of 110 and mullen burst strength (ASTMD-3786-80) of minimum 375 psi; (e.g. Mirafi 500x or AMOCO 200208).

C. SPECIFICATION TABLES AND DRAWINGS:

usable road	
surface) 22 feet	
Tangents: 1 foot	
Curves and all fills over 6 feet height:	
2 feet.	

GRASS SEEDING SPECIFICATIONS

A. SEED REQUIREMENTS: The Purchaser shall furnish certified noxious weed-free, pure live seed mixture(s) and fertilizer in the amounts shown in Table B-2. Total pounds mixed seed is pure live seed, corrected for germination and purity. Germination and purity tests must have been conducted within the last 6 months prior to delivery. Purchaser shall furnish documentation of germination and purity tests to the Forest Officer prior to application.

B. APPLICATION REQUIREMENTS:

1. Fertilizer and seed may be applied with a hand spreader or power blower, which adjusts to distribute seed evenly at the specified rate while limiting application to the desired area. Seed and fertilizer shall be applied separately. Mixing of seed and fertilizer is prohibited.
2. Seed and fertilizer shall be applied as listed in the following tables. In the event weather conditions or time of year are not conducive for successful seed establishment, the Forest Officer may require a different application schedule from the ones stated.
3. Application estimates are approximate figures only to be used for estimating purposes.

Grass Species No noxious weed seed , No cheatgrass included Minimum 80% germination, All on PLS basis	Pounds per acre Pure Live Seed Basis
Slender Wheatgrass <i>Elymus trachycaulus</i> "Pryor" or "Revenue" 20% of mix	4
Intermediate Wheatgrass "Tegmar", " Manska" or "Oahe 28% of mix	6
Mountain Brome <i>Bromus marginatis</i> (Bromar) 20% of mix	4
Hard Fescue, <i>Festuca duriscala</i> "Durar or Whitmar" 14% of mix	3
Canada Bluegrass , <i>Poa compressa</i> "Ruebens" or "Talon" 20% of mix	4
	Total Pounds mixed seed per acre PLS Pure Live Seed Basis
	21

SEEDING FOLLOWING FINAL BLADING

Areas shown in this table shall be seeded and fertilized within
15 calendar days after completion of final road blading and shaping.

Road Name	Length	Seed pounds per acre	Fertilizer pounds per acre	Acres
All Roads	6 Miles	21	N/A	14.50
Total Pounds Mixed Seed: 305				
Total Pounds Fertilizer: N/A				

GRAVEL AND ROCK SPECIFICATIONS

MATERIAL	SPECIFICATIONS
3/4" minus crushed gravel	Crushed gravel. Well graded. Fine fraction (minus 200 sieve) not to exceed 15%
Pit run gravel	Native gravel, well graded, with binder, compactable and not containing any rocks over 4" diameter.
Drain rock	1"- 3" diameter, screened clean rock.
General Large Rock Requirements	
Stone shall be hard, durable, angular in shape, resistant to weathering and weather action, and free from overburden, soil, and organic matter. Stone must be hard enough so pieces do not fracture or break during the loading, hauling, or placement activities. Neither breadth nor thickness of stone shall be less than one-third its length. Rounded stone or boulders from a streambed will not be accepted unless authorized by the State.	
Rock armor	Large rock with most sizes ranging from 6" to 12" diameter, used to armor fill slopes and catch basins.
Talus rock	Large rock of variable sizes used as load-bearing fill or drainage rock in soft areas or French drains, as approved by Forest Officer.
Energy dissipators	Large rock 18-24" diameter placed in streams at culvert outlets.

**PERMIT FOR USE OF ROADS, TRAILS, OR AREAS
RESTRICTED BY REGULATION OR ORDER**

Authority: 16 U.S.C. 532-538

For Official Use Only					DATE OF APPLICATION
REGION	STATE	COUNTY	FOREST	RANGER DISTRICT	
01	MT	Missoula	Lolo	Ninemile	7/17/2025
1. PERMIT HOLDER (name, address, and e-mail address) Montana Department of Natural Resources and Conservation 3206 Maverick Lane Missoula, MT 59804 ahelena@mt.gov Authorized agent is: Amy Helena					TELEPHONE NUMBER (406) 542-4309
2. DESCRIPTION OF RESTRICTED ROADS, TRAILS, OR AREAS					
DATES OF AUTHORIZED USE 3/1/2026 – 2/28/2031			AUTHORIZED MOTOR VEHICLE CLASSES AND NUMBER OF MOTOR VEHICLES All vehicles and equipment related to timber sale activities		
3. DESCRIPTION OF AUTHORIZED USES OTHERWISE PROHIBITED This permit authorizes the Montana DNRC, hereinafter referred to as the holder, to perform the following activities: All road activities associated with the Rock On and Lion Point timber sales including log haul, road maintenance, road reconstruction, snow plowing, and dust abatement.					
<ul style="list-style-type: none"> • Fish Creek road 343 from the int. with Cyr-Iron Mountain road 344 at milepost 2.37 to the int. with road 44316 at milepost 12.09. • Fish Creek - Bear Creek road 7724 from the int. with Fish Creek road 343 at milepost 0.00 to State of MT/ MT Fish Wildlife & Parks property boundary with at milepost 0.74. • West Fork Fish Creek road 7750 from the int. with Fish Creek road 343 at milepost 0.00 to the int. with road 443292 at milepost 1.46. • William Pass Road 341 from West Fork road 7750 at milepost 6.10 to milepost 4.00 • William Pass Road 341 from the Cyr-Iron Mountain road 344 at milepost 0.00 to the int. with road 44207 at milepost 3.37 • Road 44192 from the int. with William Pass Rd 341 at milepost 0.00 to the int. with Rock Creek – Tarkio Rd 7764 at milepost 0.342 • Rock Creek – Tarkio Road 7764 from the int. with Cyr - Iron Mountain Road 344 at milepost 0.00 to property boundary at milepost 2.12. 					
4. CONDITIONS OF USE					
1. The use authorized by this permit is not exclusive. The Forest Service reserves the right to use the roads authorized by this permit and to allow others to use them at any time. The holder shall use the roads authorized by this permit in a manner that will not unreasonably or unnecessarily interfere with their use by others, including the Forest Service. Except for any restrictions that the holder and the Forest Service agree are necessary to protect public safety and road investments, the roads authorized by this permit shall remain open to use by others for all lawful purposes.					
2. Prior to timber haul, perform reconstruction work items previously agreed to on the following roads: <ul style="list-style-type: none"> a. Road 341: Repair fill slope, Clean culverts, construct drain dips b. Road 343: Replace deformed running planks on bridge and clean culverts c. Road 7724: Reconstruct steep road section to improve drainage, and construct drain dips d. Road 7750: Reconstruct road prism and clean culverts e. Road 7764: Stabilize narrow road section by armoring fill slope or shifting road into hillside to establish a stable, 14-foot road base. Clean culverts and construct drain dips 					
3. The holder shall perform maintenance commensurate with the holder's use of the roads authorized by this permit (the holder's commensurate share) in accordance with Exhibit B – Maintenance Specifications. Maintenance includes blading all roads at the end of use to repair damage incurred from road use.					
Continued on Page 2					

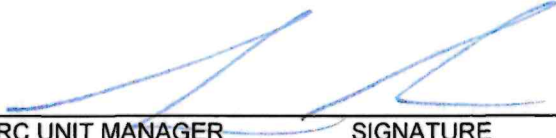

4. Control dust in accordance with Exhibit B – Maintenance Specifications; T-103 Dust Abatement. On Fish Creek Road 343, control dust to prevent elevated levels of airborne dust resulting from timber haul. On all other roads, control dust as necessary to control surface loss and provide that vehicles are always intervisible within their stopping sight distance.
5. Snow removal specifications:
 - a. Remove snow from the entire width of the road surface, including turnouts.
 - b. Construct holes in the berm as needed prior to break up to allow snowmelt to freely drain from the road surface.
 - c. Leave at least 2 inches of snow to protect the road.
 - d. Dozers or skidders shall not be used to plow snow on system roads without approval of Forest Service engineers. If approved, dozers and skidders must be equipped with shoes or runners to keep the plow blade a minimum of two inches above the road surface.
 - e. Restore any damage resulting from snow removal in a timely manner.
6. When the holder is engaged in commercial hauling adjacent to or on National Forest System roads or National Forest System trails open to public travel, the holder shall provide users with adequate warning of hazardous conditions associated with the holder's operations. During log haul, "LOG TRUCKS" signs shall be installed and clearly visible. Signs shall be retroreflective on an orange background. Warning signs shall be covered or removed when hauling is not active. Flags and other warning devices shall comply with the Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD).
7. Authorized uses are subject to all the permit terms and conditions on page 3.
8. The following attachments are included as additional conditions of this permit:
 - Exhibit A: Project Area Map
 - Exhibit B: Maintenance Specifications

1. This permit shall expire on the last date shown in Block 2. This permit shall not be extended or renewed.
2. This permit is for use only by the holder or the holder's authorized representatives listed in block 2 of the corresponding application when they are acting within the scope of their delegated authority. This permit is not assignable or transferable.
3. There is no fee for this permit.
4. This permit is a federal license that constitutes written authorization for the holder to be on National Forest System roads, on National Forest System trails, or in areas on National Forest System lands that are closed or restricted by regulation or order. This permit does not constitute a contract or lease for purposes of the Contract Disputes Act, 41 U.S.C. 601; does not convey any interest in real property; and may not be used as collateral for a loan.
5. This permit is subject to all valid outstanding rights.
6. The use authorized by this permit is not exclusive. The Forest Service reserves the right to use the roads, trails, and areas authorized by this permit and to allow others to use them at any time. The holder shall use the roads, trails, and areas authorized by this permit in a manner that will not unreasonably or unnecessarily interfere with their use by others, including the Forest Service.
7. A copy of this permit shall be carried in all motor vehicles operated under this permit. When vehicles are parked in restricted areas, a copy of this permit shall be displayed on the dashboard. When a parked motor vehicle does not have a dashboard, a note shall be left on the parked vehicle and the permit copy locked in a vehicle compartment or carried in the operator's possession. This permit shall be presented upon request to any Forest Service officer.
8. Unless specifically authorized by attachments to this permit, the holder shall not reconstruct or maintain routes, plow snow, post signs, erect closure devices, or otherwise restrict use of routes by other authorized traffic.
9. In exercising the privileges granted by this permit, the holder shall comply with all present and future federal laws and regulations and all present and future state, county, and municipal laws, regulations, and other legal requirements, including state traffic laws, that apply to the permit area, to the extent they do not conflict with federal law, regulation, or policy.
10. The holder assumes all risk of loss associated with use of the roads authorized by this permit, including theft, vandalism, fire and any fire-fighting activities (including prescribed burns), avalanches, rising waters, winds, falling limbs or trees, and acts of nature.
11. The holder shall be liable for all injury, loss, or damage, including but not limited to the value of resources damaged or destroyed, the costs of restoration, cleanup, or other mitigation, and fire suppression or other types of abatement costs, associated with the use and occupancy authorized by this permit.
12. The holder shall indemnify, defend, and hold harmless the United States for any costs, damages, claims, liabilities, and judgments arising from past, present, and future acts or omissions of the holder in connection with use of the roads authorized by this permit. The responsible official may prescribe terms that allow the holder to replace, repair, restore, or otherwise undertake necessary curative actions to mitigate damages in addition to or as an alternative to monetary indemnification.
13. The holder shall have in force motor vehicle insurance covering losses associated with the use authorized by this permit in at least the minimum amounts prescribed by law for operating motor vehicles on public roads in the State.
14. The responsible official may suspend or revoke this permit in whole or in part for noncompliance with federal, state, or local law; noncompliance with the terms of this permit; or abandonment or other failure of the holder to exercise the privileges granted. Prior to revocation or suspension, other than immediate suspension under clause 15, the responsible official shall give the holder written notice of the grounds for revocation or suspension and a reasonable time, typically not to exceed 7 days, to cure any noncompliance. Revocation or suspension of this permit shall not give rise to any claim for damages by the holder against the Forest Service.
15. The responsible official may immediately suspend this permit in whole or in part when necessary to protect public health or safety or the environment. The suspension decision shall be in writing.
16. The holder and the responsible official shall keep each other informed of current mailing addresses.
17. No member of or delegate to Congress or Resident Commissioner shall benefit from this permit either directly or indirectly, except to the extent the authorized use provides a general benefit to a corporation.
18. If there is a conflict between any of the preceding printed clauses and any clauses contained in attachments to this permit, the preceding printed clauses shall control.

THIS PERMIT IS ACCEPTED SUBJECT TO ALL ITS TERMS AND CONDITIONS.

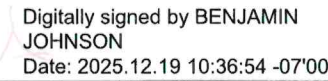

BEFORE ANY PERMIT IS ISSUED TO AN ENTITY, DOCUMENTATION MUST BE PROVIDED TO THE RESPONSIBLE OFFICIAL OF THE AUTHORITY OF THE SIGNATORY FOR THE ENTITY TO BIND IT TO THE TERMS AND CONDITIONS OF THE PERMIT.

Exhibit B – Maintenance Specifications

SPECIFICATION T-103 DUST ABATEMENT

DESCRIPTION

1.1 Dust abatement consists of road surface preparation and application of materials.

MATERIALS

2.1 Water, bituminous products, lignin sulfonates, chloride products, and other materials may be used for dust abatement. Materials other than water will require approval of the Forest Service and shall meet specifications furnished by the Forest Service.

REQUIREMENTS

3.1 Dust abatement materials shall be applied to the road surface as necessary to control surface loss and provide that vehicles are always intervisible within their stopping sight distance. The average user speed on the road shall be used to determine stopping sight distance. Preparation shall be in accordance with Specification T-101, Surface Blading.

3.2 The rate of application shall be such that the selected material will not run off the surface and cause pollution or unnecessary waste.

3.3 When water is the selected material, it shall be applied as often as necessary to abate dust from all Purchaser operations.

Dust abatement shall be maintained as needed throughout the duration of operations.

SPECIFICATION T-101 SURFACE BLADING

DESCRIPTION

1.1 Surface blading is keeping the native or aggregate surfaced road in a condition to facilitate traffic, minimize additional future maintenance, reduce erosion, and provide proper drainage. It includes maintaining the crown, inslope or outslope of the traveled way and shoulders, drainage dips, leadoff ditches, berms, turnouts, removal of minor slides and slumps, and other irregularities that prevent normal runoff from the road surface.

REQUIREMENTS

3.1 Surface blading shall be performed as often as necessary and to the standards required to facilitate traffic and proper drainage.

3.2 The blading shall be performed in such a manner as to preserve the existing cross section and to conserve surface materials. On gravel surfaced roads, the base must not be disturbed and no surface material may be bladed into the ditch or over the road shoulders. Blading of native surface roads shall be performed so no base material under four (4) inches in the greatest dimension is lost. All ruts, holes, etc., shall be removed by scarifying and/or cutting to the bottom of any surface irregularities. Oversize material brought to the surface in the scarification process shall be removed from the roadway. Surface material which has been displaced to the shoulders, turnouts, outside of curves, etc., shall be brought back so as to leave a uniform depth on the traveled way at completion of blading. Water shall be applied during blading if sufficient moisture is not present to prevent segregation.

3.3 Roadside cut slopes or berms shall not be undercut.

3.4 At intersections, the roadbeds of sideroads shall be graded for a reasonable distance to assure proper blending of the two riding surfaces.

3.5 Drainage dips and leadoff ditches shall be cleaned and continually maintained to conform reasonably to their original constructed lines, grade, and cross section.

3.6 Berms shall be repaired promptly by placing selected material as needed to restore the berm to its original condition.

3.7 Surface blading of native surface roads also includes ditch cleaning, which shall be done in accordance with T-301, Ditch Cleaning.

SPECIFICATION T-108 SLIDE REMOVAL AND SLUMP REPAIR

DESCRIPTION

1.1 Slide removal and slump repair consists of all work necessary to restore the road to its original cross section as necessary to facilitate use and provide drainage. This work is such that it cannot be handled by a grader during surface blading and ditch cleaning operations.

Slump repair is the filling with selected material of depressions or washouts in roadway which cannot be routinely filled by a motor grader.

Slide removal and slump repair includes excavation, loading, hauling, placing, and compacting of replacement material and the removal and disposal of waste material. This includes the development of disposal or borrow areas at locations approved by the Forest Service.

REQUIREMENTS

3.1 Purchaser shall deposit slide material in an approved manner at designated locations.

Material shall not be disposed of on road fills unless otherwise agreed.

The slope which contributed the slide material shall be reshaped as practicable to reduce future sliding unless otherwise agreed.

3.2 When filling slumps and depressions, select material shall be used, placed in layers, and compacted to conform with or exceed the density of existing subgrade.

Existing aggregate surfacing shall be salvaged and relayed or replaced after slumps have been filled.

Damaged aggregate base, aggregate surfacing, and asphalt surfacing shall be repaired under Specification T-113, Surfacing Repair.

3.3 Following slide removal, roadway shall be shaped so as to reasonably conform to its original subgrade template.

3.4 Slump, waste, and borrow areas shall be seeded as required under T-508.

SPECIFICATION T-301 DITCH CLEANING

DESCRIPTION

1.1 Ditch cleaning is removing and disposing of all slough material from roadside ditches to provide an unobstructed waterway conforming reasonably to previous line, grade, and cross section.

REQUIREMENTS

3.1 Slough Material.

- A. Native Surfaced Roads. Slough material from ditch cleaning, if suitable, may be placed and blended into the existing road surface or shoulders or placed in a designed berm during surface blading.
- B. Aggregate Surface Roads. Slough material from ditch cleaning shall not be mixed with aggregate surfacing or left on the road surface unless otherwise agreed. Material shall be disposed of in an agreed manner at designated locations.
- C. Asphalt Surfaced Roads. Equipment, methods, and timing shall be agreed to before start of ditch cleaning operations so as to protect the asphalt pavement. Material shall be disposed of in an agreed manner at designated locations.

SPECIFICATION T-310 MINOR DRAINAGE STRUCTURES

DESCRIPTION

1.1 Minor drainage structures are single passages with maximum waterway opening equivalent to a 78-inch round pipe (87- by 63-inch arch) or multiple passages with maximum, single waterway opening equivalent to a 60-inch round pipe (66- by 51-inch arch). They include overside drains. Maintenance is work performed on inlets, outlets, related channels, existing riprap, trash racks, and drop inlets.

MATERIALS

2.1 All materials used in the maintenance of minor drainage structures shall conform by type and specification to the material in the structure being maintained.

REQUIREMENTS

- 3.1 All minor drainage structures are to be maintained in accordance with these specifications in the spring following any significant runoff and prior to the beginning of winter storms.
- 3.2 Clear inlet and outlet channels, inlet trash racks, and drop inlets of loose material that could cause plugging or prevent the free flow of water. Debris shall be disposed of in agreed manner at designated locations.
- 3.3 If outlet riprap was originally placed to dissipate water energy, it shall be maintained in good condition including the replacement of riprap if necessary.
- 3.4 Make whatever minor repairs are necessary to ensure the proper functioning of the head walls, aprons, inlet assemblies, overside drains, riprap, trash racks, and other facilities related to the drainage structure.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0016. The time required to complete this information collection is estimated to have no associated burden per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
