

# CHECKLIST ENVIRONMENTAL ASSESSMENT

**Proposed Action:** Approve Drilling Permit (Form 22)

**Project/Well Name:** Pinehurst 2958 24-11 4B

**Operator:** Oasis Petroleum North America LLC

**State:** Montana

**Location:** SENE T29N R58E Sec. 11

**County:** Roosevelt

**Field (or Wildcat):** Wildcat

**Proposed Project Date:** TBD

## I. DESCRIPTION OF ACTION

Triple derrick drilling rig to drill a single lateral horizontal Bakken Formation test, 31,497' MD/10,325' TVD.

## II. PROJECT DEVELOPMENT

### A. PUBLIC INVOLVEMENT, AGENCIES, GROUPS, OR INDIVIDUALS CONTACTED

10 days from public notification opportunity to protest for hearing:

- Published in the Helena Independent Record on 3/7/2026.
- Published in the Northern Plains Independent on 3/19/2026.

A protest was received on 3/17/2026. The protest was heard and dismissed at the April 2026 hearing.

### B. ALTERNATIVES CONSIDERED

**No Action Alternative:** Permit to drill the well would not be issued by BOGC.

**Action Alternative:** Referred to the BOGC for further environmental review.

### III. IMPACTS ON THE PHYSICAL ENVIRONMENT

#### A. AIR QUALITY

**Long drilling time:** No, 5-10 days.

**Unusually deep drilling (high horsepower rig):** No

**Emission sources:** Vehicles traveling on county road to location, combustion engines on location during drilling operations. Fugitive dust from traveling operations and location during active drilling.

**Possible H<sub>2</sub>S gas production:** Potentially in Mississippian formations.

**In/near Class I air quality area:** No.

**Air quality permit for flaring/venting (if productive):** Yes, DEQ air quality permit required under 75-2-211. AQB review.

**Comments:** No special concerns – Triple derrick drilling rig to drill a single lateral horizontal Bakken Formation test, 31,497' MD/10,325' TVD. If there are no gas gathering systems nearby, associated gas can be flared under Board Rule 36.22.1220.

#### B. WATER QUALITY

**Salt/oil-based mud:** Steel surface casing hole will be drilled with freshwater and freshwater mud system to 2233', Rule 36.22.1001. Will drill with oil-based invert drilling fluids for the intermediate casing hole. Horizontal hole will be drilled with saltwater.

**High water table:** No.

**Surface drainage leads to live water:** Perennial Sand Creek is approximately 326' west of location.

**Water well contamination:** There are no water wells within a ½ miles radius. The surface hole will be drilled with freshwater and freshwater mud to 2233' and steel surface casing will be run and cemented back to the surface to protect groundwater.

**Porous/permeable soils:** No, silty clay loam.

**Class I stream drainage:** None.

**Groundwater vulnerability area:** No.

**Mitigation:**

☐ Lined reserve pit

☒ Adequate surface casing

☐ Berms/dykes, re-routed drainage

☒ Closed mud system

☒ Off-site disposal of solids/liquids (in approved facility)

☐ Other:

**Comments:** Steel surface casing will be run to 2233' and cemented back to surface to protect freshwater zones (Fox Hills aquifer) in adjacent water wells, Rule 36.22.1001. Adequate surface casing and BOP equipment to prevent problems, (5,000 psi annular and double ram), Rule 36.22.1014.

#### C. SOILS/VEGETATION/LAND USE

**Vegetation:** Grassland/grazing land.

**Stream crossing:** None anticipated.

**Erosion potential:** High, cut of up to 34.2' and fill of up to 17.3'.

**Loss of soil productivity:** No, location will be restored after drilling if unproductive.

**Unusually large wellsite (Describe dimensions):** A well site of 639'X 500' required for a five-well pad.

**Damage to improvements:** Slight, to grassland/grazing land.

**Conflict with existing land use/values:** Slight.

**Mitigation:**

- ☐ Avoid improvements (topographic tolerance)
- ☐ Exception location requested
- ☒ Stockpile topsoil
- ☐ Stream Crossing Permit (other agency review)
- ☒ Reclaim unused part of wellsite if productive
- ☐ Special construction methods to enhance reclamation

**Access road:** Access will be from a +/- 300' proposed access road from RD 1006.

**Drilling fluids/solids:** Oasis Petroleum North America LLC will not be utilizing a drilling pit. Drilling fluids and solids will be transported to a state approved disposal facility.

**Comments:**

## D. HEALTH HAZARDS/NOISE

**Proximity to public facilities/residences:** There are no occupied structures within a ¼ mile radius. The closest occupied structure is approximately 0.68 miles northeast in NENE Section 11 T29N R58E.

**Possibility of H2S:** Possibility in Mississippian formations.

**Size of rig/length of drilling time:** 5-10 days.

**Mitigation:**

- ☒ Proper BOP equipment
- ☐ Topographic sound barriers
- ☐ H2S contingency and/or evacuation plan
- ☐ Special equipment/procedures requirements
- ☐ Other:

## E. WILDLIFE/RECREATION

**Sage Grouse:** No.

**Proximity to sensitive wildlife areas (DFWP identified):** None.

**Proximity to recreation sites:** None.

**Creation of new access to wildlife habitat:** No.

**Conflict with game range/refuge management:** No.

**Threatened or endangered species within 5 miles:** Nelson's Sparrow, Baird's Sparrow, Bobolink, Chestnut-collared Longspur, and Whooping Crane.

**Mitigation:**

- ☐ Avoidance (topographic tolerance/exception)
- ☐ Other agency review (DFWP, federal agencies, DNRC Trust Lands)
- ☐ Screening/fencing of pits, drillsite
- ☐ Other:

**Comments:** Grassland/grazing land. There may be species of concern that may be impacted by this wellsite. We ask the operator to consult with the surface owner as to what he would like done if a species of concern is discovered at this location. The Board of Oil & Gas has no jurisdiction over private surface lands. No concerns.

## IV. IMPACTS ON THE HUMAN POPULATION

### A. HISTORICAL/CULTURAL/PALEONTOLOGICAL

**Proximity to known sites:**

**Mitigation:**

- ☐ Avoidance (topographic tolerance, location exception)
- ☐ Other agency review (SHPO, DNRC Trust Lands, federal agencies)

**Other:** The Board of Oil & Gas has no jurisdiction over private surface lands.

## B. SOCIAL/ECONOMIC

**Substantial effect on tax base:**

- ☐ Create demand for new governmental services
- ☐ Population increase or relocation

**Comments:** No concerns.

## IV. SUMMARY

No long-term impacts expected. Some short-term impacts will occur but can be mitigated.

I conclude that the approval of the subject Notice of Intent to Drill (does/**does not**) constitute a major action of state government significantly affecting the quality of the human environment, and (does/**does not**) require the preparation of an environmental impact statement.
