

File Memo: October 31, 2025

LUL application for Produced Water Line additional 15' workspace

Applicant: Glacier Peak Midstream, LLC, a Delaware Limited Liability Company

Location: Township 28N Range 59 E Section 16.

Devon Energy on behalf of Glacier Peak Midstream, LLC, has located a well pad on the above legal description tract of Montana Trust Land. This request for an easement was approved by the land board in the October meeting.

This memo is to add a 8" poly water line to carry produced water within and additional 15" added to the 35' easement approved by the Land board last week.

Payment for this LUL will be apportioned by REMB for this water line from the total fee charged to the initial easement for the Crude Oil Pipeline.

This file memo is intended to supplement the requested EA to provide a Land Use License from 10/1/2025 for a period of 10 years with an end date of 9/30/2025 for this produced water line. Increasing the width of the easement to accommodate the additional 15' will not likely result in additional concerns previously identified in the existing EA. Thus, no significant impacts are anticipated to this LUL as a result of this action.
