Chainsaw Consumables for Incident Replacement

Incident personnel may replace chainsaw consumable and select durable items through the Supply Unit, cache system, incident purchasing or their home unit. Requests should be submitted on an Incident Replacement Requisition, (OF 315) or other approved form [e.g., General Message, (ICS 213), or saw parts order]. If the Supply Unit or cache cannot fill the request, a resource order (S#) may be issued for item replacement by incident purchasing or the home unit upon completion of the assignment, in accordance with NWCG Standards for Interagency Business Management, Chapter 30.

---
