After discussing the needs and desires for the Flathead Reservation Water Management Board's website, as well as attending the FRWM board meeting, I am convinced I would be the most suitable candidate to build and maintain your website. With my extensive background in marketing, as well as my dedication to one client at a time, I know I would be able to meet the deadlines we discussed and would be available for one-on-one support as needed throughout the entirety of the project. Furthermore, I am prepared to pay extreme attention to the quality and detail for the purpose of organization that a website of this nature needs. Within the proposal below, I have included the base website design and upkeep costs for the first three months. The goal is to have the base website live before or by June 15th while continuing to build the remaining site with up to 10 tabs included (Home, Meetings, Forms, Jobs, Q+A, Contact, etc) and pushed live as they are completed before or by the three-month deadline. My desire is to readdress the board's needs for continued website management and development upon the 3 month deadline.

Website Design Services

1) **Web Pro Polson will provide the following website design and management services at a one-time charge:**

• A fully functioning, easily navigable, well organized, informative base website with a goal of June 15th to go live.

• Continued content development for up to 3 months

• Up to 10 tabs included

• Unlimited forms

- Unlimited downloads

- Unlimited links

- Unlimited and reliable website support and troubleshooting by phone or in person as needed.

- 3-months website maintenances

- Unlimited revisions and content development up to 3 months from start date.

The costs for the tasks listed above are $5,200

Hosting & Domain Services

2) **Web Pro Polson will provide the following services at a set annual cost of $735.88, which will expire or renew 1- year from the start date of the project.**

- Website hosting

- Website domain/domain renewal

- Search engine visibility

- SSL (basic security)

- Google analytics

- Daily website backups

- On-demand backup copies

- CDN (content delivery network)

- Enhanced Security using Web Application Firewall

- NGINX-based static and dynamic Caching

- Up to 100,000 visitors monthly

- Software Updates

If you have any questions or concerns please don't hesitate to contact me. I look forward to hearing from you.

Sincerely,

Kara Schumaker
