RE: Request of Assistance for Updated Floodplain Studies

Dear Steve,

Jefferson County utilizes 1986 Federal Insurance Rate Maps showing Approximate Zone A areas for current floodplain maps. Without elevations for the base flood, the burden of determining these elevations becomes the landowners. Over the years many landowners have applied to FEMA for a Letter of Map Amendment and have been successful in demonstrating portions of their property are not within Approximate Zone A areas. In the north end of the County, the only resource we have is aerial photos from the flood of 1981; however, we recently were informed these maps can not be used for regulatory purposes.

Jefferson County is committed to protecting surface water, managing flood risks and participating in the Federal Flood Insurance Program. Detailed studies would be beneficial to County residents and current information would allow for better regulation of flood prone areas.

Thank you for the opportunity to participate in this effort to update Floodplain Studies in Jefferson County. Having better available data will provide much needed support we've waited a long time for.

- Update existing 1986 FEMA floodplain maps in county
- Flood elevations and better data
- New studies and FEMA floodplain maps on: Prickly Pear Creek, Buffalo Creek, Clancy Creek, Warm Springs Creek

Draft Maps – ready for review

Madison-Ruby-Jefferson Watersheds and Jefferson County Floodplain Mapping Update

1 Draft Floodplain Mapping

(+) and (-) signs.

The flood hazard information in this section is currently a **draft** product. It only includes Madison County, Jefferson County, and selected areas pertaining to this study in Broadwater and Gallatin Counties. The draft floodplain designations are undergoing public review and are based on updated flood study information.

To see the current FEMA mapping, go to section 2.

2 Current FEMA Floodplain Mapping

3 Compare Draft 100-year Floodplain Map to Current FEMA Floodplain Map

4 Compare Draft Floodway Map to Current FEMA Floodway Map

5 Estimated Ground Elevation for Buildings

Draft Maps:

- Represent study results of 100 year Floodplain (1% annual chance)
- Will be used to produce Preliminary FEMA Maps

Jefferson County Flood Maps Update

Jefferson County has been working with the Federal Emergency Management Agency (FEMA) and Montana Department of Natural Resources and Conservation (DNRC) to produce new and updated 100-year floodplain maps. The project includes updating all the existing mapped floodplains in the county, and producing new floodplain maps for portions of Prickly Pear Creek and tributaries in the northern part of the county. [View study extents here.](#)

Updated floodplain maps will depict the latest, most accurate flood risk data, and will eventually result in updated FEMA floodplain maps. Most of the existing FEMA floodplain maps in Jefferson County are based off of data from the 1970s. For more information see: [Floodplain FAQs](#) [Flood Study Process](#)

Public Open House Meetings

June 21, 2022 in Montana City | 6:30-8:30pm | Montana City Fire Station | 1192 Hwy 282
(to listen in remotely via zoom: <https://ogilvy.zoom.us/j/92224421559> Passcode: 7477)
June 23, 2022 in Boulder | 6:30-8:30pm | County Fairgrounds Hall | 21 N. Whitetail Rd
(to listen in remotely via zoom: <https://ogilvy.zoom.us/j/93249435883> Passcode: 7477)

Jefferson County and Montana DNRC are hosting June public open house meetings about draft floodplain maps in the northern and central portion of Jefferson County.

Additional public meetings will be scheduled later in summer to share draft floodplain maps for the southern part of Jefferson County.

JEFFERSON COUNTY FLOOD MAP UPDATES

www.floodplain.mt.gov/jefferson

Owning property in a 100-YEAR FLOODPLAIN

A 100-YEAR FLOODPLAIN (1% Annual Chance Floodplain) is considered that is expected to be inundated by a 100-Year Flood, an event having a 1% chance of occurring in any given year. The 100-Year Flood is also referred to as a 1% Annual Chance Flood.

DEVELOPMENT REGULATIONS

Jefferson County, City of Boulder, and the Town of Whitehall require Floodplain Development Permits for development in the 100-Year Floodplain (1% Annual Chance Floodplain) to protect human life and property.

- New building construction must obtain a Floodplain Development Permit.
- New residential construction must be elevated 2 feet above the 100-Year Flood Elevation (Base Flood Elevation).
- Improvements to existing structures must obtain a Floodplain Development Permit. Existing structure greater than 50% of a structure's market value (a Substantial Improvement) must be brought into compliance with floodplain regulations.
- Other federal, state, and local regulations may apply.

Draft floodplain maps are going through review and are not yet effective. It is important to review your community's floodplain regulations with County, City, or Town staff to understand updates on proposed construction projects in a mapped floodplain.

INSURANCE REQUIREMENT

If you own a building in an area that will be newly mapped into a 100-Year Floodplain, contact your insurance agent or lender about flood insurance.

Lenders will typically reevaluate their loans to reassess flood risk when a new flood map or revision goes effective. When this happens, your lender will require you to carry flood insurance if you own a building that is located in a mapped floodplain that is above the flood elevation or outside of the 100-Year Floodplain.

There can be some cost-saving options available if you are newly mapped into a floodplain. Contact your insurance agent or lender as early as possible to find the best flood insurance comparison of Newly Mapped rates, Grandfathered rates, etc.

JEFFERSON COUNTY FLOOD MAP UPDATES

www.floodplain.mt.gov/jefferson

Owning property in a FLOODWAY

A FLOODWAY is the area within a 100-Year Floodplain that must be kept open so that the 100-Year Flood (1% Annual Chance Flood, Base Flood) can be discharged without increasing flood heights. The Floodway will usually see the highest water inundation during a 100-Year Flood event.

DEVELOPMENT REGULATIONS

Jefferson County, City of Boulder, and the Town of Whitehall strictly regulate development in Floodways to protect human life and property by ensuring that there are no increases in flood elevations.

- In accordance with each community's Floodplain Regulations:
- New building construction is not permitted in the Floodway.
 - Improvement to existing structures in a Floodway must obtain a Floodplain Development Permit.

INSURANCE REQUIREMENT

If you own a building in an area that will be newly mapped into a 100-Year Floodplain (including Floodway), contact your insurance agent or lender about flood insurance.

Lenders will typically reevaluate their loans to reassess flood risk when a new flood map or revision goes effective. When this happens, your lender will require you to carry flood insurance if you own a building that is located in a mapped floodplain that is above the flood elevation or outside of the 100-Year Floodplain.

There can be cost-saving options available if you are newly mapped into a floodplain. Contact your insurance agent or lender as early as possible to find the best flood insurance comparison of Newly Mapped rates, Grandfathered rates, etc.

JEFFERSON COUNTY FLOOD MAP UPDATES

www.floodplain.mt.gov/jefferson

Owning property in a 500-YEAR FLOODPLAIN

A 500-YEAR FLOODPLAIN (0.2% Annual Chance Floodplain) is considered to have a MODERATE flood risk. It is an area that is expected to be inundated by a 500-Year Flood, a flood event having a 0.2% chance of being equaled or exceeded in any given year. The 500-Year Flood is also referred to as a 0.2% Annual Chance Flood.

DEVELOPMENT REGULATIONS

Jefferson County, City of Boulder, and the Town of Whitehall do not regulate development in the 500-Year Floodplain (0.2% Annual Chance Floodplain) although flooding is still possible in this area.

New construction and building improvements may occur in the 500-Year Floodplain without a Floodplain Development Permit. Other federal, state, and local regulations may apply.

If your property has areas of both 100-Year and 500-Year Floodplain, proposed projects may require a Floodplain Development Permit depending on exactly where the development will occur. It is important to discuss the location of any development with County, City or Town staff to understand the impacts of the community's floodplain regulations and flood map updates on proposed projects in or near a mapped 100-Year Floodplain.

INSURANCE REQUIREMENT

If you own a building in a 500-Year Floodplain (0.2% Annual Chance Floodplain), you are considered to be at a moderate risk of flooding. It is therefore recommended that you purchase flood insurance even if your lender does not require you to do so in order to protect your investment.

Lenders will typically review their loans to reassess flood risk when a new flood map or revision goes effective. When this happens, if your building is located in a 500-Year Floodplain, your lender might choose to require you to carry flood insurance and/or provide building elevation documentation to prove your building is above the flood elevation.

Some property owners may not see any insurance changes with this mapping update. Talk to your lender or insurance agent early if you are considering purchasing flood insurance in order to find the best option for you.

Development Regulations

Counties and Towns have floodplain regulations that regulate development within the 100-year floodplain.

Floodplain permits are required for any manmade activities including construction and modifications to existing structures.

New construction and additions- elevated 2' **Improvements** and additions to existing structures \geq 50% of building's value, will require the entire structure to be brought into compliance.

No new structures and limited development is allowed in the **Floodway**

Flood Insurance

Flood insurance is mandatory for buildings with a federally backed loan in a high-risk area.

Flood insurance is not mandatory in a lower risk areas but is highly recommended. Lenders can always require insurance in any area.

Flood insurance is the best form of personal risk management and is an important form of economic protection against flooding.
