

# Project Timeline Teton County Floodplain Maps Update

**Estimated Completion date** 

#### Mid- 2024 (est.) preliminary Mid 2026-Late 2026 Late 2023 Draft data Completed 2021 Completed 2023 Late 2024-Early 2025 (est.)appeal **Open Houses Spring 2024** (est.) period Measurements are made of The elevation and the topography around the Draft data is survey data are **FEMA Preliminary Maps FEMA Flood** river, along with any culverts, delivered to the combined with the flood are produced and ready Insurance Rate bridges, and road crossings. communities. flow data to determine for public review and Maps finalized. LiDAR uses an airplane to Public open houses where the water will go comment period. A collect ground elevation over will be conducted for when it overflows the second public open a large area, and ground landowners to channel and how far it house is usually survey supplements the review the will spread out. The area conducted to review the airborne data. Flood flow information Spring of shown to be underwater information. 90-day data determine how much 2024. and at high risk is official comment & water there will be in a river mapped as the appeal period held. during a flood event. regulatory floodplain. **Preliminary Data** Flood Insurance Rate **Engineering and** Draft Data available Data gathering public comment Maps become floodplain modeling public review and appeal period effective

# Flood Study Conducted

4 steps of a flood study.

- 1) Survey & LiDAR
- 3) Hydraulics (engineering)
- 2) Hydrology (flood flow)
- 4) Mapping (delineation)

### **Resiliency and Mitigation efforts**

Once new maps become effective the community can determine what mitigation efforts it would like to pursue to reduce flood risks.

#### **Public Review**

A public open house will be held after draft data release and before preliminary map release.

During this time public comments are encouraged. There will be an official 90-day appeal period after the maps become preliminary.

## Community work

Update floodplain ordinance.

Prepare initiatives to reduce flood risk.
